East Hanover, NJ 07936

Dear Dr. Katz:

Please refer to your supplemental New Drug Application (sNDA) dated 13, 2017, received January 13, 2017, and your amendments, submitted under section 505(b) of the Federal Food, Drug, and Cosmetic Act (FDCA) for Afinitor (everolimus) Tablets.

This Prior Approval supplemental new drug application provides for:

1. the use of a steroid-based mouthwash to reduce the incidence and severity of stomatitis from the use of Afinitor plus exemestane.
2. addition of dose modification guidelines for hematological laboratory abnormalities and febrile neutropenia in the Dosage and Administration section.
3. revisions to the section on Stomatitis and Embryo-Fetal Toxicity in Warnings and Precautions.
4. revisions to sections on Females and Males of Reproductive Potential, Carcinogenesis, Mutagenesis, Impairment of Fertility and Patient Counseling Information.

We have completed our review of this application, as amended. It is approved, effective on the date of this letter, for use as recommended in the enclosed agreed-upon labeling text.

CONTENT OF LABELING

As soon as possible, but no later than 14 days from the date of this letter, submit the content of labeling [21 CFR 314.50(l)] in structured product labeling (SPL) format using the FDA automated drug registration and listing system (eLIST), as described at <http://www.fda.gov/ForIndustry/DataStandards/StructuredProductLabeling/default.htm>. Content of labeling must be identical to the enclosed labeling (text for the package insert, text for the patient package insert). Information on submitting SPL files using eLIST may be found in the guidance for industry *SPL Standard for Content of Labeling Technical Qs and As*, available at <http://www.fda.gov/downloads/Drugs/GuidanceComplianceRegulatoryInformation/Guidances/UCM072392.pdf>.

The SPL will be accessible via publicly available labeling repositories.

REQUIRED PEDIATRIC ASSESSMENTS

Under the Pediatric Research Equity Act (PREA) (21 U.S.C. 355c), all applications for new active ingredients, new indications, new dosage forms, new dosing regimens, or new routes of administration are required to contain an assessment of the safety and effectiveness of the product for the claimed indication(s) in pediatric patients unless this requirement is waived, deferred, or inapplicable.

Because none of these criteria apply to your application, you are exempt from this requirement.

You may request advisory comments on proposed introductory advertising and promotional labeling.
