Dear Dr. Abbi:

Please refer to your supplemental new drug applications (sNDAs) dated August 15, 2019, received August 15, 2019, and your amendments submitted under section 505(b) of the Federal Food, Drug, and Cosmetic Act (FDCA or the Act) for AFINITOR (everolimus) tablets, for oral use and for AFINITOR DISPERZ® (everolimus tablets for oral suspension).

These Prior Approval labeling supplemental new drug applications to retitle the WARNINGS AND PRECAUTIONS, (5.7) subsection of the prescribing information as Risk of Impaired Wound Healing and to state that AFINITOR/AFINITOR DISPERZ should be withheld for at least 1 week prior to elective surgery, that AFINITOR/AFINITOR DISPERZ should not be resumed for at least 2 weeks after major surgery and until adequate wound healing; and that the safety of resumption of AFINITOR/AFINITOR DISPERZ after wound healing complications was not known. Additionally, the Patient Counseling (17) section of the prescribing information and Patient Package Insert were updated to reflect changes in subsection 5.7.

**APPROVAL & LABELING**

We have completed our review of this application, as amended. It is approved, effective on the date of this letter, for use as recommended in the enclosed agreed-upon labeling.

**WAIVER OF ½ PAGE LENGTH REQUIREMENT FOR HIGHLIGHTS**

Please note that we have previously granted a waiver of the requirements of 21 CFR 201.57(d)(8) regarding the length of Highlights of Prescribing Information.

## **CONTENT OF LABELING**

As soon as possible, but no later than 14 days from the date of this letter, submit the content of labeling [21 CFR 314.50(l)] in structured product labeling (SPL) format using the FDA automated drug registration and listing system (eLIST), as described at FDA.gov.<sup>1</sup> Content of labeling must be identical to the enclosed labeling text for the Prescribing Information and Patient Package Insert, with the addition of any labeling changes in pending “Changes Being Effectuated” (CBE) supplements, as well as annual reportable changes not included in the enclosed labeling.

Information on submitting SPL files using eList may be found in the guidance for industry *SPL Standard for Content of Labeling Technical Qs and As*.<sup>2</sup>

The SPL will be accessible from publicly available labeling repositories.

Also within 14 days, amend all pending supplemental applications that include labeling changes for this NDA, including CBE supplements for which FDA has not yet issued an action letter, with the content of labeling [21 CFR 314.50(l)(1)(i)] in Microsoft Word format, that includes the changes approved in this supplemental application, as well as annual reportable changes. To facilitate review of your submission(s), provide a highlighted or marked-up copy that shows all changes, as well as a clean Microsoft Word version. The marked-up copy should provide appropriate annotations, including supplement number(s) and annual report date(s).

## **REQUIRED PEDIATRIC ASSESSMENTS**

Under the Pediatric Research Equity Act (PREA) (21 U.S.C. 355c), all applications for new active ingredients (which includes new salts and new fixed combinations), new indications, new dosage forms, new dosing regimens, or new routes of administration are required to contain an assessment of the safety and effectiveness of the product for the claimed indication in pediatric patients unless this requirement is waived, deferred, or inapplicable.

Because none of these criteria apply to your application, you are exempt from this requirement.
