

Appendix C

Section IV.C pertains to discussion of the following claim limitations:

- Ex. 18, '278 Patent, 24:31–35 [1.E] “recognizing the document as a first target object based at least in part on the image, the symbol information, and a query of a database storing target object information associated with a plurality of target objects including the first target object”
- Ex. 15, '529 Patent, 11:62–64, [1.E] “distinguish an object present in the image from others using a database that stores data characteristics of target objects”
- Ex. 16, '252 Patent, 19:21–24 [18.E] “providing access to a distal server configured to use a database to identify pertinent information associated with the recognizable symbols based on the symbol information”
- Ex. 19, '004 Patent, 24:27–29 [1.C] “recognizing the at least one object in the scene as a target object based at least in part on the at least one characteristic of the video stream”
- Ex. 17, '036 Patent, 24:3–5 [1.A] “a target database storing known targets of different types and recognition parameters associated with the known targets”
- Ex. 17, '036 Patent, 24:6–7 [1.B] “an identification platform coupled with the target database, and that:”
- Ex. 17, '036 Patent, 24:13–16 [1.E] “recognizes the target as a known target from the target database based on comparing parameters derived from the digital representation to recognition parameters associated with the known targets; and”
