Overview

[REQUEST A QUOTE](#)

In today's complex and constantly changing threat environment, you need substantial visibility into network and threat behavior to maintain an effective security posture. The ability to quickly understand threats and their corresponding remediation empowers security teams to keep their companies safe.

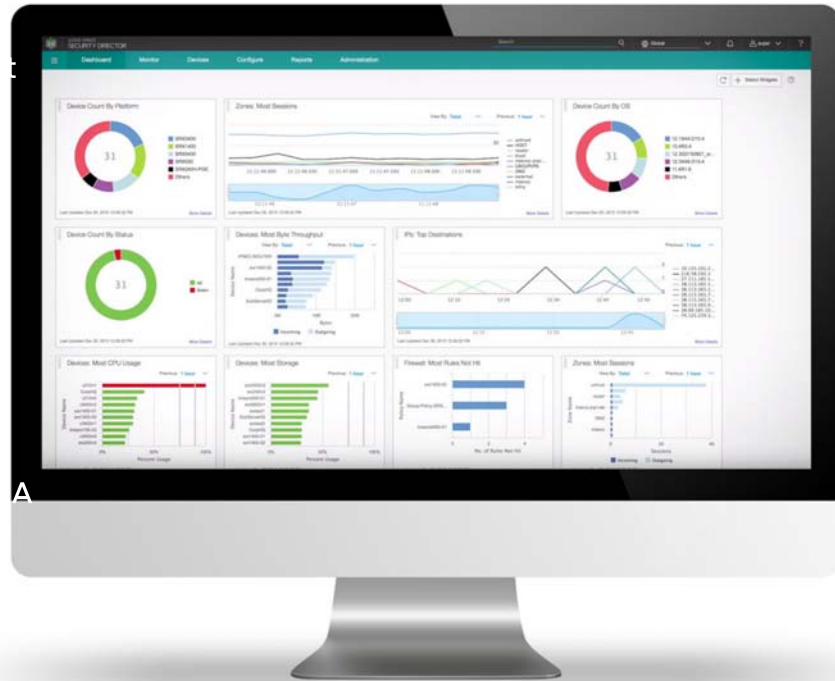

Junos Space Security Director provides security policy management through an intuitive, centralized interface that offers enforcement across emerging and traditional risk vectors. Using intuitive dashboards and reporting features, you gain insight into threats, compromised devices, risky applications, and more.

As an application running on the Junos Space platform, Security Director gives administrators extensive security management and granular policy control network-wide. It helps teams quickly manage all phases of the security policy life cycle for stateful firewall, security intelligence, unified threat management (UTM), intrusion prevention system (IPS), AppFW, VPN, and Network Address Translation (NAT).

[Policy Enforcer](#), a key Security Director capability, enhances unified management by working with Juniper Sky Advanced Threat Prevention (ATP) cloud-delivered malware detection. Policy

to new threat conditions. With this information, Policy Enforcer can automatically update policies and deploy new enforcement to firewalls and switches, quarantining and tracking infected hosts to stop the progress of threats.

Training

Cybersecurity that can keep your data and people safe—anywhere.

Features

Centralized Security Management

Lets you centrally configure and manage application security, firewalls, and security intelligence, along with VPN, IPS, and NAT security policies, all through a single interface.

Policy Definition and Enforcement

Allows you to define and enforce policies for controlling use of specific applications such as Facebook and embedded social networking widgets.

Automated Policy Enforcement

Applies consistent threat remediation across heterogeneous network environments that span SRX Series firewalls, EX and QFX switches, and third-party network switches.

Scalable Security Policy

Lets you extend a security policy across multiple SRX Series firewalls and to manage several LSYS instances on a single SRX Series device.

Network Infrastructure Optimization

Helps IT teams optimize the network infrastructure for security management innovations through integration with the open, secure Junos Space Network Management Platform.

New Threat Detection

Detects new threats and deploys new enforcement policies automatically to firewalls and switches through Policy Enforcer.

Explore Litigation Insights

Docket Alarm provides insights to develop a more informed litigation strategy and the peace of mind of knowing you're on top of things.

Real-Time Litigation Alerts

Keep your litigation team up-to-date with **real-time alerts** and advanced team management tools built for the enterprise, all while greatly reducing PACER spend.

Our comprehensive service means we can handle Federal, State, and Administrative courts across the country.

Advanced Docket Research

With over 230 million records, Docket Alarm's cloud-native docket research platform finds what other services can't. Coverage includes Federal, State, plus PTAB, TTAB, ITC and NLRB decisions, all in one place.

Identify arguments that have been successful in the past with full text, pinpoint searching. Link to case law cited within any court document via Fastcase.

Analytics At Your Fingertips

Learn what happened the last time a particular judge, opposing counsel or company faced cases similar to yours.

Advanced out-of-the-box PTAB and TTAB analytics are always at your fingertips.

API

Docket Alarm offers a powerful API (application programming interface) to developers that want to integrate case filings into their apps.

LAW FIRMS

Build custom dashboards for your attorneys and clients with live data direct from the court.

Automate many repetitive legal tasks like conflict checks, document management, and marketing.

FINANCIAL INSTITUTIONS

Litigation and bankruptcy checks for companies and debtors.

E-DISCOVERY AND LEGAL VENDORS

Sync your system to PACER to automate legal marketing.
