

# EXHIBIT 24

## Sky Advanced Threat Prevention Scanned File Overview

Sky ATP keeps a record of all file metadata sent to the cloud for inspection. You can view the files sent from your network by selecting **Monitor > File Scanning** in the Web UI. See Figure 1. Your firewall policy determines what to do if a file is suspected of being malware. For example, block that file from being downloaded to the client.

**Figure 1: List of Inspected Files and Their Results**

The screenshot shows the Junos Space Security Director interface. The left sidebar contains navigation options: Hosts, C&C Servers, and File Scanning. The main content area is titled "File Scanning" and includes an "Export" button and a "Threat level" filter set to "High, Medium, Low, None; clean". A search bar contains "threat\_level ge 4". Below is a table of scanned files:

File Signature	Threat Level	Filename	Last Submitted	URL	Malware Name	Category	Status
eg. 123, 456							
714c0ec6aef294bc4...	9	unoriwik.dll	Dec 11, 2016 2:23 AM	http://notrutkonuto.org/uno...	Win32:Trojandownloader...	other	Blocked
714c0ec6aef294bc4...	9	unoriwik.dll	Dec 9, 2016 10:36 PM	http://notrutkonuto.org/uno...	Win32:Trojandownloader...	other	Blocked
714c0ec6aef294bc4...	9	unoriwik.dll	Dec 9, 2016 10:19 PM	http://notrutkonuto.org/uno...	Win32:Trojandownloader...	other	Blocked

By default, threat levels 4 and above are shown. Click the file's signature to view more information, such as file details, what other malware scanners say about this file, and a complete list of hosts that downloaded this file. See Figure 2.

**Figure 2: Viewing Scanned File Details**

The screenshot shows the Junos Space Security Director interface displaying detailed information for a scanned file. The file signature is "714c0ec6aef294bc4077...". The interface includes a "Threat Level" section showing a level of 9, with file name "unoriwik.dll", category "other", and action taken "Blocked". It also shows "Top Indicators" such as "Malware Name: Win32:Trojandownloader:Denqs" and "Prevalence" information like "Global prevalence: High" and "Unique users: 3". Below this is a "GENERAL" section with "NETWORK ACTIVITY" and a table of "HTTP Downloads" showing client host, IP address, file name, date/time, device, URL, destination IP, and user name.

Client Host	Client IP Address	File Name	Date/Time Submitted	Device	URL	Destination IP	User Name
	212.90.	unoriwik.dll	Dec 11, 2016 2:23 ...	TU3814TE2916	http://notrutkonuto...	193.0.	

For more information on the file scan details page, see the Web UI tooltips and online help.

If you suspect a file is suspicious, you can manually upload it for scanning and evaluation. Click **Monitor > File Scanning > Manual Upload** to browse to the file you want to upload. The file can be up to 32 MB.

There is a limit to the number of files administrators can upload for manual scanning. File uploads are limited by realm (across all users in a realm) in a 24-hour period. You can upload two files per each active device enrolled and 10 files per each premium-licensed device in your account. For example, if you have two Sky ATP premium-licensed SRX Series devices and one other SRX Series device, Sky ATP will allow a maximum of 22 files to be allowed in a 24-hour window.

For more information on scanning files, see the Web UI infotips and online help.
