Rebecca,

We are producing the charts that were referenced in Finjan's Response to Juniper's Interrogatory No. 6 in a separate email which are bearing bates numbers FINJAN-JN 303431-468. While two of the charts include watermarks of "DRAFT – FOR INTERNAL REVIEW ONLY" or "DRAFT – ATTORNEY WORK PRODUCT," these charts do not contain any attorney work product and were the final charts that are referred to in the interrogatory response. These watermarks were maintained, but would have been removed before being shared with Juniper around October 2015 as part of the parties' licensing discussions. We are producing the document as it was maintained and confirm that they are not drafts and do not contain any attorney work product.

Sincerely,
Kris

Rebecca,

Regarding the email you attached, the attachment should be the next document in the production after the email (FINJAN-JN193518-520).

We're looking into your other requests.

Sincerely,
Kris

Subject: [EXTERNAL] Finjan/Juniper - missing documents

Counsel:

In Finjan's supplemental response to Interrogatory No. 6, Finjan refers to "already prepared confidential claim charts on other Patents-in-Suit, including the '494 Patent." Please identify the Bates number for these alleged claim charts, including the alleged claim chart for the '494 patent, or produce them by close of business today so that they can be used at Thursday's deposition. We have not been able to find them in Finjan's production.

In addition, Finjan does not appear to have produced a complete copy of the attached email. It contains an attachment, and we have not been able to locate the attachment in Finjan's production. Please produce a complete version of the email (with attachment) by close of business today so that it can be used at Thursday's deposition.

Regards,
Rebecca
