Juniper Sky Advanced Threat Prevention (ATP) uses real-time information from the cloud to provide your business with anti-malware protection and defend against sophisticated cyber crimes such as advanced persistent threats and ransomware.

Today's rapidly evolving threat landscape is outpacing the efficacy of many security solutions. New malware campaigns are launched every day, with threats hiding in carefully crafted spear-phishing emails.

Sky ATP provides an extra layer of protection on top of antivirus and anti-spam tools, extending your defense beyond traditional security solutions by detecting never-before-seen malware attachments and stopping them before they hit their target. Whether your mail server is hosted on-premises or moved to Office 365 in the cloud, Sky ATP stops cyber attacks in their tracks.

Sky ATP integrates with SRX Series next-generation firewalls to deliver deep inspection, inline blocking, and actionable alerts. Using state-of-the-art machine learning, Sky ATP continuously analyzes web and email files for evasive malware.

Sky ATP's identification technology uses a variety of sophisticated techniques to quickly detect

- Powerful machine learning algorithms.
- Dynamic analysis with techniques to trick malware into activating and self-identifying.
- Rapid cache lookups to speed up previous malware identification.
- Antivirus signature-based engine to identify known files.
- Static analysis that analyzes software code to identify possible dangerous fragments.

If you're just getting started, Juniper Professional Services is ready to help you deploy with our [Sky ATP JumpStart service](#), providing onsite expertise and training to ensure that your implementation is quick, smooth, and effective.

Security

Watch Sky Advanced Threat Prevention outsmart the sneakiest malware.

Security Intelligence

Features

Cloud-Based Analysis

Extracts compromised files, sends them to the cloud for advanced malware analysis to generate a security verdict.

Instant Identification of Malware

Rapidly detects malware and communicates verdict to SRX Series firewalls to block attacks.

Rich Reporting and Analytics

Provides a web interface for performing management tasks, including configuration and product updates, and provides rich reporting and analytics tools for visibility into threats and compromised hosts.

Quarantine of Systems

Feeds information about compromised systems to SRX Series firewalls to quarantine the affected systems.

Spotlight Secure Integration

Communicates with the Juniper Spotlight Secure Threat Intelligence service to cascade threat information to SRX Series firewalls for immediate action.

Command-and-Control Data

Provides command-and-control data to SRX Series firewalls to prevent compromised internal systems from communicating with the affected devices.

Email Analysis and Remediation

Isolates and quarantines malware, preventing email from being used as an attack vector. Machine learning algorithms analyze email traffic, detect malicious attachments and block files at the firewall.

Explore Litigation Insights

Docket Alarm provides insights to develop a more informed litigation strategy and the peace of mind of knowing you're on top of things.

Real-Time Litigation Alerts

Keep your litigation team up-to-date with **real-time alerts** and advanced team management tools built for the enterprise, all while greatly reducing PACER spend.

Our comprehensive service means we can handle Federal, State, and Administrative courts across the country.

Advanced Docket Research

With over 230 million records, Docket Alarm's cloud-native docket research platform finds what other services can't. Coverage includes Federal, State, plus PTAB, TTAB, ITC and NLRB decisions, all in one place.

Identify arguments that have been successful in the past with full text, pinpoint searching. Link to case law cited within any court document via Fastcase.

Analytics At Your Fingertips

Learn what happened the last time a particular judge, opposing counsel or company faced cases similar to yours.

Advanced out-of-the-box PTAB and TTAB analytics are always at your fingertips.

API

Docket Alarm offers a powerful API (application programming interface) to developers that want to integrate case filings into their apps.

LAW FIRMS

Build custom dashboards for your attorneys and clients with live data direct from the court.

Automate many repetitive legal tasks like conflict checks, document management, and marketing.

FINANCIAL INSTITUTIONS

Litigation and bankruptcy checks for companies and debtors.

E-DISCOVERY AND LEGAL VENDORS

Sync your system to PACER to automate legal marketing.
