| 1  | Page 113 back and check.  | 1  | Page 115<br>Q. So part of the construction that you've  |
|--|---|--|---|
| 2  | BY MS. CARSON:  | 2  | applied for database is "organized according to a   |
| 3  | Q. What is a relational database?   | 3  | database schema."   |
| 4  | MR. KASTENS: Objection. Form.   | 4  | What does it mean to be "organized  |
| 5  | THE WITNESS: Like a typical   | 5  | according to a database schema"?  |
| 6  | example is like MySQL where there's a core  | 6  | A. That means there needs to be some set  |
| 7  | relationship between the different elements in the  | 7  | fields or schema that's used for storing the  |
| 8  | database.   | 8  | information.  |
| 9  | BY MS. CARSON:  | 9  | Q. Would you agree that a database schema   |
| 10   | Q. Does DynamoDB fit that characteristic  | 10   | is a description of a database to a database  |
| 11   | that you just identified?   | 11   | management system in the language provided by the   |
| 12   | MR. KASTENS: Objection. Form.   | 12   | database management system?   |
| 13   | THE WITNESS: DynamoDB does have   | 13   | MR. KASTENS: Objection. Form.   |
| 14   | a schema with regard to the primary key, but then   | 14   | THE WITNESS: Could you read that  |
| 15   | other components of it might not. So that's why   | 15   | one more time?  |
| 16   | it's more of a hybrid.  | 16   | BY MS. CARSON:  |
| 17   | BY MS. CARSON:  | 17   | Q. Would you agree that a database schema   |
| 18   | Q. You think it's a hybrid?   | 18   | is a description of a database to a database  |
| 19   | MR. KASTENS: Objection. Form.   | 19   | management system in the language provided by the   |
| 20   | BY MS. CARSON:  | 20   | database management system?   |
| 21   | Q. What do you mean by "hybrid"?  | 21   | MR. KASTENS: Objection. Form.   |
| 22   | A. Well, with DynamoDB, there is an   | 22   | THE WITNESS: That would   |

# DOCKET

# Explore Litigation Insights

Docket Alarm provides insights to develop a more informed litigation strategy and the peace of mind of knowing you're on top of things.

## **Real-Time Litigation Alerts**

Keep your litigation team up-to-date with **real-time** alerts and advanced team management tools built for the enterprise, all while greatly reducing PACER spend.

Our comprehensive service means we can handle Federal, State, and Administrative courts across the country.

## **Advanced Docket Research**

With over 230 million records, Docket Alarm's cloud-native docket research platform finds what other services can't. Coverage includes Federal, State, plus PTAB, TTAB, ITC and NLRB decisions, all in one place.

Identify arguments that have been successful in the past with full text, pinpoint searching. Link to case law cited within any court document via Fastcase.

### **Analytics At Your Fingertips**

Learn what happened the last time a particular judge, opposing counsel or company faced cases similar to yours.

Advanced out-of-the-box PTAB and TTAB analytics are always at your fingertips.

#### API

Docket Alarm offers a powerful API (application programming interface) to developers that want to integrate case filings into their apps.

#### **LAW FIRMS**

Build custom dashboards for your attorneys and clients with live data direct from the court.

Automate many repetitive legal tasks like conflict checks, document management, and marketing.

#### **FINANCIAL INSTITUTIONS**

Litigation and bankruptcy checks for companies and debtors.

### **E-DISCOVERY AND LEGAL VENDORS**

Sync your system to PACER to automate legal marketing.
