Parent Guide

The FinjanMobile VitalSecurity Browser offers the best protection for your mobile device from malicious internet content. Not only will it sanitize every URL that you attempt to access, the app will warn you if you accidentally land on a malicious web page.

The Gen3 mobile secure browser is completely redesigned and is built-off Finjan patent technology.

It features:

- Complete browser functionality
- Detailed analysis and listing of malware threats from over 60 of the top virus companies
- Guards your privacy with private browsing functionality
- Touch ID and Passcode security to protect your browsing experience
- Support for Tabs, Bookmarks and History
- Controls all aspects of the safe browsing experience

Type in a search term and Finjanmobile VitalSecurity will scan search results and present the risk assessment in one of three levels — Safe, Caution or Danger. These risk assessment levels are shown right along side the normal search results. Users choose whether to click on the link and go right to the website, or learn about the risk associated with the site. Understanding the risks allows users to proactively eliminate any threat to their device.
