**REDACTED VERSION OF DOCUMENT SOUGHT TO BE SEALED****I. INTRODUCTION**

This Court should deny Finjan's motion for summary judgment. But the Court likely knew that before it even started reading this opposition. Parties seeking summary judgment generally provide a clear, concise legal theory based on a defined set of undisputed facts. Finjan, however, did not do this; its motion presented a variety of confusing and facially deficient legal theories based on a convoluted (and easily disputed) set of facts. Why? Because Finjan knows full well that it is not entitled to summary judgment on Claim 1 of the '154 Patent, and it is simply trying to again use this Court's "showdown" procedure (improperly) to get claims involving Juniper's SRX products before a jury on an expedited basis. Indeed, Finjan cares so little about prevailing on this motion that it did not even bother to have its infringement expert—Dr. Michael Mitzenmacher (or his staff)—review the computer containing Juniper's source code while preparing his declaration on the '154 Patent. This Court should reject Finjan's abuse of the "showdown" procedure.

As this Court may recall, during the first round of summary judgment motions Finjan advanced a clear theory of infringement (albeit one the jury ultimately rejected). By being clear, though, Finjan revealed that its infringement arguments are directed against Juniper's Sky ATP product (alone or in combination with the SRX) but not the SRX alone. This strategy thus created a major issue for Finjan, as revenues for Sky ATP are minimal. Finjan tried to overcome this problem by sneaking revenue information for the SRX alone into the case through its damages expert and evidence. This Court was not fooled, however; first it struck Finjan's damages expert, and later it ruled Finjan was not entitled to any damages.

This time, Finjan is using a different tactic to bring SRX-alone evidence into the case. Rather than presenting a clear infringement case (which would reveal that Finjan has no case against any of the accused products, much less the SRX alone), Finjan has presented an infringement theory so convoluted that—it hopes—the Court will simply allow it to present an SRX-alone theory to a jury. This cynical strategy should fail. Not only is it an abuse of the summary judgment process, but (as discussed below) the undisputed evidence establishes that Finjan cannot establish a plausible case of infringement against the SRX alone.

Moreover, when one is finally able to divine Finjan's infringement theories, it becomes clear

# Explore Litigation Insights

Docket Alarm provides insights to develop a more informed litigation strategy and the peace of mind of knowing you're on top of things.

## Real-Time Litigation Alerts

Keep your litigation team up-to-date with **real-time alerts** and advanced team management tools built for the enterprise, all while greatly reducing PACER spend.

Our comprehensive service means we can handle Federal, State, and Administrative courts across the country.

## Advanced Docket Research

With over 230 million records, Docket Alarm's cloud-native docket research platform finds what other services can't. Coverage includes Federal, State, plus PTAB, TTAB, ITC and NLRB decisions, all in one place.

Identify arguments that have been successful in the past with full text, pinpoint searching. Link to case law cited within any court document via Fastcase.

## Analytics At Your Fingertips

Learn what happened the last time a particular judge, opposing counsel or company faced cases similar to yours.

Advanced out-of-the-box PTAB and TTAB analytics are always at your fingertips.

## API

Docket Alarm offers a powerful API (application programming interface) to developers that want to integrate case filings into their apps.

## LAW FIRMS

Build custom dashboards for your attorneys and clients with live data direct from the court.

Automate many repetitive legal tasks like conflict checks, document management, and marketing.

## FINANCIAL INSTITUTIONS

Litigation and bankruptcy checks for companies and debtors.

## E-DISCOVERY AND LEGAL VENDORS

Sync your system to PACER to automate legal marketing.
