DOCKET ALARM Find authenticated court documents without watermarks at <u>docketalarm.com</u>. Pursuant to Federal Rules of Civil Procedure 26 and 34, Defendant Juniper, Inc.
 ("Juniper") hereby submits the following first supplemented objections and responses
 (collectively, the "First Supplemental Responses") to the First Set of Requests for Production (the
 "Requests") by Defendant Finjan, Inc. ("Finjan").

5

#### PRELIMINARY STATEMENT

Juniper has not completed discovery in this action and has not completed preparation for 6 trial. These First Supplemental Responses, while based on diligent inquiry and investigation by 7 8 Juniper, necessarily reflect only the current state of Juniper's knowledge, understanding, and 9 belief based upon the information reasonably available to Juniper at this time. Juniper anticipates 10 that further facts and information may be discovered. Without in any way obligating itself to do 11 so, Juniper reserves the right to modify, supplement, revise, or amend these First Supplemental Responses and to correct any errors or omissions which may be contained herein in light of the 12 information that Juniper may subsequently obtain or discover. Furthermore, these First 13 Supplemental Responses are provided without prejudice to Juniper's use or reliance on, at trial, 14 15 hearing, or otherwise, subsequently discovered facts or information or facts or information omitted from these responses. The following First Supplemental Responses are given without prejudice to 16 Juniper's right to produce evidence of any subsequently discovered fact. Juniper accordingly 17 18 reserves the right to change any and all responses herein as additional facts are ascertained, 19 analyses are performed, legal research is completed, and contentions are investigated. This 20 introductory statement shall apply to each and every First Supplemental Response given herein 21 and shall be incorporated by reference as though set forth in each First Supplemental Response 22 appearing below.

Juniper's production will be provided on a rolling basis phased to occur after disclosures
under Patent L.R. 3-4, pursuant to the parties' agreement set forth in the stipulation regarding
discovery of ESI. Juniper's technical production related to SRX, Sky ATP, and Space Security
Director is complete. Juniper has also made ATP Appliance's source code available for review.
Juniper's production related to ATP Appliance will be provided on a rolling basis starting in
June 2018.

1

#### **GENERAL OBJECTIONS**

These objections are hereby incorporated, as though set forth in full, into the response to
each and every Request. Juniper reserves the right to make additional objections as may be
appropriate and nothing contained herein shall be in any way construed as a waiver of any such
objection. Juniper has not yet completed its investigation of the facts pertaining to this action, its
discovery, or its preparation for trial. Juniper's responses and objections as set forth below are
made without prejudice to Juniper's right to assert any additional or supplemental responses or
objections if Juniper discovers additional grounds for such responses or objections.

By making this First Supplemental Response, Juniper does not concede that any of the
requested information is proportional to the needs of the case, relevant, properly discoverable, or
admissible, and Juniper reserves its right to object to discovery into the subject matter addressed in
any information produced and to the introduction of such information into evidence.

Juniper makes the following general objections (collectively, the "General Objections") to
each request contained within Finjan's First Set of Requests for Production. The assertion of the
same, similar, or additional objections or the provision of responses to the requests does not
constitute a waiver any of Juniper's objections as set forth below:

17 1. Juniper objects to the Requests as improperly served. The parties' electronic service agreement as set forth in the Joint Case Management Statement requires email service on 18 19 at least jkagan@irell.com, rcarson@irell.com, jglucoft@irell.com, kwang@irell.com, and 20eholland@irell.com, and, in light of the written notice provided by Juniper, ccurran@irell.com. However, at least jkagan@irell.com, kwang@irell.com, and eholland@irell.com were not served 21 22 via email, and therefore Finjan's attempted email service does not comply with the parties' 23 electronic service agreement and is ineffective. These Objections and Responses are provided in an abundance of caution and in order to facilitate discovery, although the Requests are moot and 24 25 neither objections nor responses are required.

26 2. Juniper objects to the definition of "Accused Instrumentalities" as including
 27 Contrail. Contrail is not alleged to infringe any Asserted Patent. Accordingly, to the extent
 28 applicable, Juniper will interpret each and every Interrogatory as excluding Juniper's Contrail

product. Juniper also objects to the definition of "Accused Instrumentalities" as including "all 1 additional products accused of infringement by Finjan in this action in infringement contentions or 2 3 similar pleadings," particularly Spotlight Secure Threat Intelligence Platform. That product was not identified in the operative complaint and it is therefore not part of this case. See id.; see also 4 Richtek Tech. Corp. v. uPi Semiconductor Corp., 2016 WL 1718135, at \*2 (N.D. Cal. Apr. 29, 5 2016) (Alsup, J.) ("[T]he filing of a complaint sets the cut-off date for the scope of a case, subject 6 7 to the possibility of supplementation. Nevertheless, for some time, patent owners have made 8 open-ended allegations in their complaint that do not specifically identify the accused products and used amendments to their infringement contentions to expand the scope of the case to 9 10 encompass products...without the need to file a supplemental complaint-essentially sneaking 11 new products into the case through the back door of infringement contentions."). Juniper also objects to the definition of "Accused Instrumentalities" to the extent that it purports to include 12 previous or currently contemplated versions, revision, releases, or continuations of any Juniper 13 products or services other than those specifically identified (including by model number) in 14 15 Finjan's Infringement Contentions and also in the operative complaint. To the extent applicable, Juniper will interpret each and every Interrogatory as limited to only those instrumentalities 16 specifically identified in both the operative complaint and Finjan's Infringement Contentions and 17 also made, used, sold, offered for sale, or imported into the U.S. within the statutory damages 18 19 period.

20 3. Juniper objects to the Requests, including but not limited to the Instructions and Definitions, to the extent they are inconsistent with, seek to impose obligations not required by, or 21 22 seek to expand the scope of permissible discovery under the Federal Rules of Civil Procedure, the 23 Federal Rules of Evidence, the Local Rules of the Northern District of California, any Order of the Court, or any agreement between the parties, specifically including the parties' agreement set forth 24 25 in the Joint Case Management Statement and the (anticipated) stipulation regarding discovery of ESI with respect to paragraphs 15, 16, 18, and 20 of Judge Alsup's Supplemental Order. See Dkt. 26 27 No. 31 at p. 15. Juniper will not identify the Request in response to which any document is being produced for any Request. Juniper will furnish only information in the direct possession, custody, 28

# DOCKET A L A R M

# Explore Litigation Insights

Docket Alarm provides insights to develop a more informed litigation strategy and the peace of mind of knowing you're on top of things.

# **Real-Time Litigation Alerts**

Keep your litigation team up-to-date with **real-time alerts** and advanced team management tools built for the enterprise, all while greatly reducing PACER spend.

Our comprehensive service means we can handle Federal, State, and Administrative courts across the country.

## **Advanced Docket Research**

With over 230 million records, Docket Alarm's cloud-native docket research platform finds what other services can't. Coverage includes Federal, State, plus PTAB, TTAB, ITC and NLRB decisions, all in one place.

Identify arguments that have been successful in the past with full text, pinpoint searching. Link to case law cited within any court document via Fastcase.

# **Analytics At Your Fingertips**

Learn what happened the last time a particular judge, opposing counsel or company faced cases similar to yours.

Advanced out-of-the-box PTAB and TTAB analytics are always at your fingertips.

## API

Docket Alarm offers a powerful API (application programming interface) to developers that want to integrate case filings into their apps.

#### LAW FIRMS

Build custom dashboards for your attorneys and clients with live data direct from the court.

Automate many repetitive legal tasks like conflict checks, document management, and marketing.

#### FINANCIAL INSTITUTIONS

Litigation and bankruptcy checks for companies and debtors.

### E-DISCOVERY AND LEGAL VENDORS

Sync your system to PACER to automate legal marketing.
