<p style="text-align: right;">9</p> <p>1 PROCEEDINGS</p> <p>2 THE VIDEOGRAPHER: Good morning. We are now</p> <p>3 on the record. Here begins media number 1 in the</p> <p>4 videotaped deposition of Chandra Nagarajan in the matter</p> <p>5 of Finjan Incorporated versus Juniper Networks</p> <p>6 Incorporated, et al., held in the United States District</p> <p>7 Court, Northern District of California, San Francisco</p> <p>8 Division. Case number 3:17-CV-05659-WHA.</p> <p>9 Today's date is May 31st, 2018, and the time</p> <p>10 on the video monitor is 9:06 a.m.</p> <p>11 Your videographer today is John Torrealano</p> <p>12 representing on behalf of Planet Depos.</p> <p>13 This video deposition is taking place at</p> <p>14 Juniper Networks Incorporated, street address</p> <p>15 1133 Innovation Way, Building A in Sunnyvale, California</p> <p>16 94089.</p> <p>17 Would counsel please voice identify themselves</p> <p>18 and state whom they represent in this action.</p> <p>19 MR. LEE: Michael Lee from Kramer Levin</p> <p>20 representing Finjan. And with me is Linda Xu from</p> <p>21 Kramer Levin as well.</p> <p>22 MR. KAGAN: Jonathan Kagan of Irell and</p> <p>23 Manella representing Juniper Networks.</p> <p>24 THE VIDEOGRAPHER: Your court reporter today</p> <p>25 is Charlotte Lacey representing on behalf of Planet</p>	<p style="text-align: right;">11</p> <p>1 to be responsible for Junosphere, but that product is</p> <p>2 end of life right now.</p> <p>3 THE REPORTER: I'm sorry. "I was responsible</p> <p>4 for"...?</p> <p>5 THE WITNESS: Junosphere.</p> <p>6 THE REPORTER: Junosphere. Thank you.</p> <p>7 Q What is the name of the intrusion prevention</p> <p>8 product?</p> <p>9 A It's -- it's part of the SRX, but then I own</p> <p>10 the team which writes signatures to -- to stop the</p> <p>11 exploits.</p> <p>12 Q Is there a name for this intrusion prevention</p> <p>13 product?</p> <p>14 A It is -- there's a separate license in SRX for</p> <p>15 this. That's about it. It's called IPS.</p> <p>16 Q And that stands for Intrusion Prevention</p> <p>17 System?</p> <p>18 A That's right.</p> <p>19 Q You mentioned Sky ATP?</p> <p>20 A Uh-huh.</p> <p>21 Q What is Sky ATP?</p> <p>22 A Sky ATP is a cloud-delivered advanced threat</p> <p>23 prevention service. It -- it works directly with SRX</p> <p>24 and then try -- it tries to get files out of the</p> <p>25 network, whatever is going through the network and makes</p>
<p style="text-align: right;">10</p> <p>1 Depos.</p> <p>2 If there are no stipulations or comments from</p> <p>3 counsel, would the court reporter please swear in the</p> <p>4 witness.</p> <p>5 CHANDRA NAGARAJAN,</p> <p>6 the witness herein, having been first duly sworn, was</p> <p>7 examined and testified as follows:</p> <p>8 EXAMINATION</p> <p>9 BY MR. LEE:</p> <p>10 Q Where do you work?</p> <p>11 A I work in Juniper Networks.</p> <p>12 Q What's your position at Juniper Networks?</p> <p>13 A My position is a senior director in the</p> <p>14 security business group.</p> <p>15 Q What are your responsibilities?</p> <p>16 A I manage a team of engineers and -- I'm</p> <p>17 responsible for the engineering delivery of the product.</p> <p>18 So I ensure we get the right specifications for the</p> <p>19 product, and then we execute the schedule we come up</p> <p>20 with for the features requested.</p> <p>21 Q Which product?</p> <p>22 A There are a couple of products I'm responsible</p> <p>23 for. One is the Sky ATP. The other one is the -- we</p> <p>24 have an intrusion detection prevention product, so I'm</p> <p>25 responsible for that. Previously, when I joined, I used</p>	<p style="text-align: right;">12</p> <p>1 a determination, to the best of its ability, what the</p> <p>2 threat level of those files are. And it's -- it's</p> <p>3 basically a SAS type of product where the most of the</p> <p>4 functionalities reside in the cloud and the user itself</p> <p>5 logs into the cloud and most of the input -- input on</p> <p>6 the user interface is on the cloud site.</p> <p>7 Q What does Sky ATP stand for?</p> <p>8 A Sky is, I guess, is just a brand name, and the</p> <p>9 A. T. P. is for advanced threat prevention.</p> <p>10 Q What is advanced threat prevention?</p> <p>11 A What is advanced -- so the advanced threat</p> <p>12 prevention, the name mainly comes because in the market,</p> <p>13 there are a lot of AVs which can detect if something</p> <p>14 is -- is good or bad based on what they know. But</p> <p>15 advanced threat prevention is something even if you get</p> <p>16 a file, which it doesn't know about, it tries to</p> <p>17 evaluate to the best of its capability and determines</p> <p>18 the threat level.</p> <p>19 Q So advanced threat prevention is for unknown</p> <p>20 threats?</p> <p>21 MR. KAGAN: Objection; form.</p> <p>22 A Advanced threat protection is both for known</p> <p>23 threats and also for unknown threats.</p> <p>24 Q What are the key components of Sky ATP?</p> <p>25 MR. KAGAN: Objection; form.</p>
