An Evolving Threat Landscape

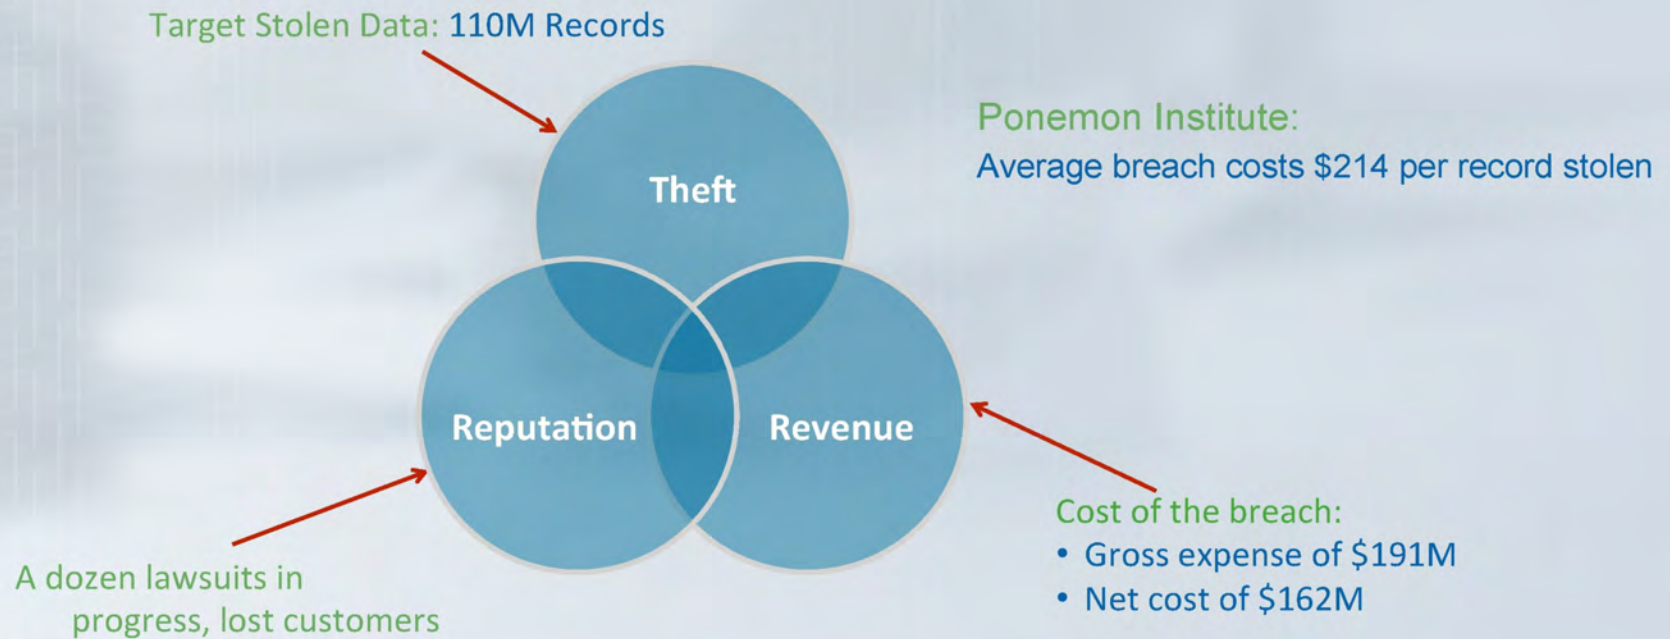

New actors, new threats, and new technologies means the threat landscape is constantly evolving.

- State sponsored actors and targeted attacks change the landscape
- Attackers are constantly looking for, and finding, new vectors
- Security solutions need to be agile to keep up
- The impact of security breaches can't be understated

The Head of Cyber of British Intelligence, in his first public, yet anonymous interview stated: "There are now three certainties in life: there's death, there's taxes and there's a foreign intelligence service on your system."
