HIGHLY CONFIDENTIAL SOURCE CODE - ATTORNEYS' EYES ONLY

VIDEOTAPED DEPOSITION OF CHANDRA NAGARAJAN
Sunnyvale, California
Thursday, May 31, 2018
9:05 a.m.

Job No.: 189837
Pages: 1 - 245
Reported By: Charlotte Lacey, RPR, CSR No. 14224

1	10:51 a.m.	10:51:21
2	Please proceed, Counsel.	10:51:23
3	BY MR. LEE:	10:51:25
4	Q Do you recall earlier we were discussing why	10:51:25
5	Sky ATP was added?	10:51:30
6	A Yes. There was a question about that.	10:51:35
7	Q And you mentioned that it was to give SRX this	10:51:37
8	next-generation capability, correct?	10:51:42
9	MR. KAGAN: Objection; form.	10:51:45
10	A So -- so the -- the -- ATP is one of the	10:51:46
11	functionalities of NG firewall, and one of the many	10:51:53
12	functionalities of it has evolved. Since that piece was	10:51:57
13	missing in SRX, the Sky ATP was developed.	10:51:58
14	Q When you say that piece is missing, what do	10:52:11
15	you mean?	10:52:14
16	A The ATP, as a functionality, is missing in	10:52:14
17	SRX.	10:52:19
18	Q So does the ATP contribute to the	10:52:22
19	next-generation capability at all?	10:52:25
20	MR. KAGAN: Objection; form.	10:52:28
21	A The ATP is one of the many functionalities in	10:52:29
22	NG firewall. To that extent, the ATP functionality is	10:52:33
23	missing.	10:52:33
24	THE REPORTER: To...	10:52:33
25	A To NG firewall, and to that extent, it's --	10:52:39

1 it's a missing functionality. 10:52:45

2 Q How does ATP contribute to the next-generation 10:52:48
3 capability? 10:52:52

4 MR. KAGAN: Objection; form. 10:52:53

5 A So -- this is basically the market demands, 10:52:56
6 right? There's no general definition of what an NG 10:53:05
7 firewall is. So it all depends on what your competition 10:53:09
8 offers in -- in NG firewall and what are all the various 10:53:14
9 functionalities which are missing against the 10:53:19
10 competition, and that is to the extent... 10:53:22

11 Q What did SRX have before it had Sky ATP? 10:53:25

12 MR. KAGAN: Objection; form. 10:53:30

13 A So before Sky ATP -- before Sky ATP was added, 10:53:32
14 there was a AV engine functionality in SRX, which -- 10:53:38
15 which is -- which detects malwares. But it -- it only 10:53:46
16 detects known -- known malwares. 10:53:52

17 Q What do you mean by it only detects known 10:53:55
18 malware? 10:54:00

19 A So whatever is known to the AV -- AV software 10:54:00
20 we use, it detects those malwares. 10:54:04

21 Q And Sky ATP detects unknown malware, right? 10:54:08

22 A Sky ATP can -- can detect malwares which were 10:54:12
23 not previously known to others. 10:54:17

24 Q Is there a name for this AV software? 10:54:21

25 A I -- I don't work in -- in that area, so 10:54:25
