

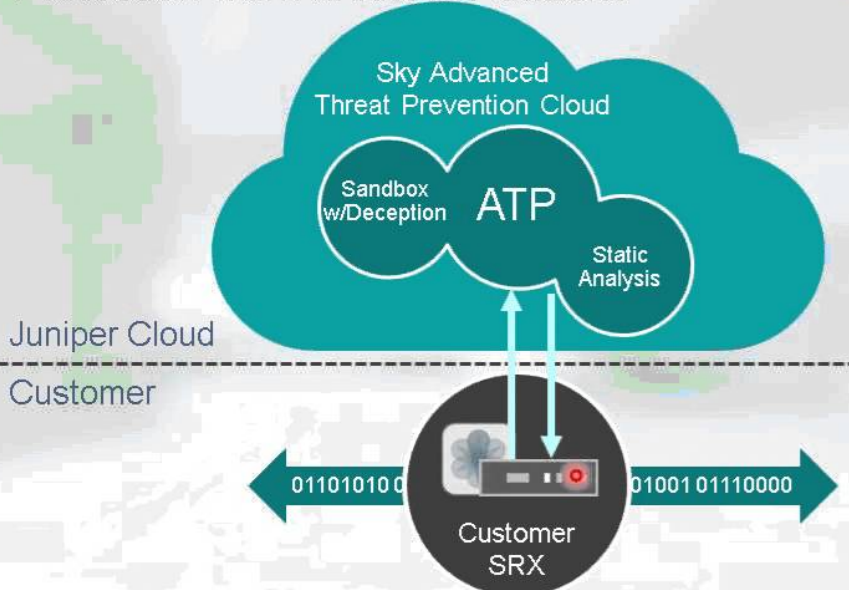

# EXHIBIT 28

# Sky Advanced Threat Protection (X49-D33)

Protection from unknown attacks

1. SRX extracts potentially malicious objects and files
2. SRX sends potentially malicious content to Advanced Threat Prevention cloud
3. Advanced Threat Prevention cloud performs static and dynamic analysis
4. Advanced Threat Prevention cloud provides malware results and C&C server data to the SRX
5. SRX blocks known malicious file downloads and outbound C&C traffic
