Subject: Finjan v. Juniper - Amending Complaint

Josh,

Finjan intends to seek leave to amend its complaint to assert Claims 1 and 17 of U.S. Patent No. 7,418,731 (the “731 Patent”) against the already accused combination of SRX Gateways and Sky ATP. Juniper’s infringement of these claims of the ‘731 Patent recently became apparent during the May 8th deposition of Yuly Tenorio, who described the internal structures of Sky ATP, including the manner in which profiles and files are stored and indexed. As part of this amendment, Finjan agrees to limit the number of asserted claims in the case to no more than 16. Let us know if Juniper will stipulate to this amendment. If not, provide times that you are available on Tuesday, May 29th that you are available to meet and confer on this issue.

Sincerely,
Kris
