1   A   Okay. In general, yes. In general, this
2 virtual product is equal to.
3   Q   Can the SRX --
4   A   But I just want to make sure that -- there
5 are -- a virtual environment requires a different -- you
6 know, a custom environment is needed.
7   THE REPORTER: Can you repeat, please. I'm
8 sorry.
9   A   So the virtual products require a different
10 platform on -- environment.
11   Q   Can the SRX Gateway scan for malware locally
12 on the -- on the system?
13   MS. CARSON: Objection; form.
14   A   ██████████████████████ Could you help
15 me understand or elaborate with a specific --
16   Q   Yeah.
17   A   -- example of what the scan means?
18   Q   Does the SRX -- do the SRX Gateways have the
19 capability to scan files that are seen on the network
20 for viruses or malware?
21   MS. CARSON: Objection; form.
22   A   ████████████████████████████████████
████████████████████████
24   Q   Can the SRX Gateways have antivirus software
25 installed on them?

Page 14

1   MS. CARSON: Objection; form.
2   A   █████████████████████████████████
██
███████████████████
5   Q   What AV is currently offered on the SRX
6 appliances?
7   A   It's called Sophos AV.
8   Q   Any other AV engines that are currently
9 offered on the SRX Gateways?
10   A   ████████████████████████████████
11   Q   Do you know if any other antivirus packages
12 were previously offered on the SRX Gateways?
13   MS. CARSON: Objection; form.
14   A   No, I don't know.
15   Q   Are you aware if something called Express AV
16 was previously offered on the SRX Gateways?
17   A   I don't have a lot of good information on that
18 one because I haven't worked on that product.
19   Q   What is your level of understanding of Express
20 AV?
21   A   I have -- I don't have any understanding on
22 Express AV.
23   Q   Are you aware Kaspersky was offered as a
24 antivirus solution on the SRX Gateways?
25   A   I don't have a lot of good information on the

Page 15

1 early software releases that was -- yeah -- that were
2 running the AV that you mentioned.
3   Q   Are you aware of a term uniform -- or sorry
4 UTM?
5   A   Yeah.
6   Q   And do you know what UTM stands for?
7   A   Unified threat management.
8   Q   And are you aware of how -- if there's a
9 functionality related to the SRX Gateways that's
10 referred to do as UTM?
11   A   Yeah. So UTM offers features such as AV
12 integration and URL filtering.
13   THE REPORTER: I'm sorry. URL?
14   A   It's called URL filtering.
15   THE REPORTER: Filtering?
16   A   Yes.
17   Q   And how is the UTM sold?
18   MS. CARSON: Objection; form.
19   A   I don't have definite information on that. I
20 think it's better to contact PLM or sales.
21   Q   Is it like a software package you add to an
22 SRX Gateway? Or is it a separate appliance?
23   Just, like, what form would a customer acquire
24 UTM?
25   MS. CARSON: Objection; form.

Page 16

1   A   It's -- it's a software package that -- that
2 gets installed on the SRX operating system. That's
3 Junos.
4   But the Sophos AV that I -- just to clarify,
5 the Sophos AV that I know of, it's a cloud-based
6 service. It's the -- when I talk about the third-party
7 software labeling, that's only to enable communication
8 between SRX and then the actual Sophos cloud.
9   Q   So the SRX Gateway with the Sophos AV doesn't
10 do scanning on the box. So just sends information up to
11 the -- Sophos cloud; is that correct?
12   MS. CARSON: Objection; form.
13   A   So that's right. ████████████████████
████████████████████████████████
15   Q   Does it extract files?
16   MS. CARSON: Objection; form.
17   A   ██
████████████████████████████████████
19   Q   Do you know if the file is sent to Sophos?
20   MS. CARSON: Objection; form.
21   A   I'm not aware of that. So I haven't worked
22 deeply on that particular product. I'd have to consult
23 the code or the team that actually worked on the
24 product.
25   Q   And how -- how does Junos extract the file

1 the customer wants to not send the files to Sky ATP for
2 whatever is the reason, but -- because of the
3 sensitivity or security. If the customer configures,
4 then SRX can do hash -- can compute the hash, which is a
5 cryptographic shot of physics.

17   A   This is depending on the software release and
18 depending on the customer configuration.
19   Q   When you say depending on the software
20 release, is it a feature that was added to SRX Gateway?
21   A   Yeah. That was a feature that was added to
22 SRX, yeah.
23   Q   And is it on all SRX -- is it usable on all
24 SRX Gateways at this point?
25   MS. CARSON: Objection; form.

Page 31

1   A   Yes.
2   Q   When was it added?
3   A   It was added in December 2017 or early part of
4 this year. I can't remember exact date. But it's
5 17.4R1.
6   Q   Before this was implemented in the
7 SRX Gateway, ▇▇▇▇▇▇▇▇▇▇▇▇▇▇▇▇

14   Q   The other features that you mentioned, the
15 extraction for the SRX Gateway in relation to Sky ATP
16 related to extracting files and sending them up to
17 Sky ATP, have those been present in the SRX Gateway and
18 Sky ATP combinations since it was first released?
19   MS. CARSON: Objection; form.
20   A   Can you be more specific about the features
21 that --
22   Q   Yeah. Has the SRX Gateway always been able to
23 extract files from network traffic and send those files
24 up to Sky ATP --
25   MS. CARSON: Objection.

Page 32

1   Q   -- since it's been released?
2   MS. CARSON: Objection; form.
3   A   The -- the file extraction on SRX for HTTP
4 protocol has been added in the initial versions and more
5 protocols for supporting in the latter versions.
6   Q   When you say protocols, you mean like --
7   A   E-mail protocols.
8   Q   When were e-mail protocols added?
9   A   Can you tell me, please, when.
10   Q   When were e-mail protocols added?
11   A   I don't remember. I think I need to, yeah,
12 talk to the team.
13   Q   Any other protocols added besides e-mail
14 protocols that you're aware of since the first
15 implementation of Sky ATP?
16   MS. CARSON: Objection; form.
17   A   I'm not aware of any other protocols.
