

EXHIBIT B

Attachment A for US Patent No. 10,341,838 Against Lyft Accused Products

Based on information presently available,¹ Defendant AGIS Software Development LLC (“AGIS Software Development”) Plaintiff Lyft Inc. (“Lyft” or “Plaintiff”) infringes claims 1-26 (the “Asserted Claims”) of U.S. Patent No. 10,341,838 through the Accused Products which are manufactured, sold, offered for sale, and/or used by Lyft.

The Accused Products comprise the Lyft and Lyft Driver applications, servers, and services manufactured and sold by Lyft Inc. during and after 2016. AGIS Software reserves the right to seek leave of court to amend this list of Accused Products upon filing of an amended complaint or as discovery progresses.

Lyft directly infringes each of the Asserted Claims by making, using, importing, testing, distributing, selling, and offering for sale the Accused Products in violation of 35 U.S.C. § 271(a).

Lyft indirectly infringes the Asserted Claims in violation of 35 U.S.C. § 271(b) by inducing third parties, including its employees and/or customers, to directly infringe through their operation and use of the Accused Products. Lyft has knowingly induced this direct infringement by, *inter alia*, (i) selling, importing, or otherwise providing the Accused Products to third parties with the intent that the Accused Products will be operated and used in a manner that practices the Asserted Claims; (ii) advertising the Accused Products. Lyft’s marketing and promotional materials for the Accused Products are found on Lyft’s website, and in App stores of operating systems for which the Accused Products are made available. For example, Lyft offers customers instructions and/or manuals for the Accused Products that instruct customers to, among other things, use the services in the Accused Products. Lyft’s website also offers support to customers, including instruction to, among other things, use the Accused Products share location information with a group of users. Lyft knows, or should have known, that its actions constitute infringement of the Asserted Claims, or subjectively believes that there is a high probability that its actions will constitute infringement of the Asserted Claims but has taken deliberate actions to avoid learning these facts.

Lyft also contributorily infringes each of the Asserted Claims in violation of 35 U.S.C. § 271(c) by selling, offering for sale, and otherwise providing the Accused Products, which when used directly infringe the Asserted Claims. These actions constitute a material part of the Asserted Claims.

¹ There is no operative complaint asserting non-infringement of any patent claim in this action at this time. AGIS Software Development reserves the right to update its contentions upon receipt of any future amended complaint.

Attachment A for US Patent No. 10,341,838 Against Lyft Accused Products

The following chart identifies specifically where each limitation of each Asserted Claim is found within the Lyft and Lyft Driver applications, and in particular, the corresponding elements that meet the limitations in the Lyft and Lyft Driver applications. On information and belief, each charted version of the Lyft servers related to the Lyft and Lyft Driver Apps and versions of the Accused Products, including all variants of the Accused Products made, sold, offered for sale, or used on the Android and iOS operating systems. AGIS Software relies on circumstantial evidence of the servers' features and features or services provided by the Lyft and Lyft Driver Apps.

AGIS Software does not concede that any claims of the '838 Patent that are not listed below are not infringed by the Accused Products. Moreover, the citations to certain documents and other information below are intended to be illustrative and in no way foreclose AGIS from citing or relying on additional documents, information, source code, and/or testimony. These contentions are preliminary in nature and an analysis of Lyft's products, internal documentation, source code, and testimony from relevant witnesses may more fully and accurately describe the infringing features of its accused products. AGIS Software reserves the right to seek leave of court to supplement, correct, modify, and/or amend these contentions once such information is made available to AGIS Software. Furthermore, AGIS Software reserves the right to seek leave of court to supplement, modify, and/or amend these contentions as discovery in this case progresses; in view of the Court's claim construction order and in view of any positions taken by Lyft, including but not limited to positions on claim construction, invalidity, and/or non-infringement in connection with the preparation and exchange of expert reports.

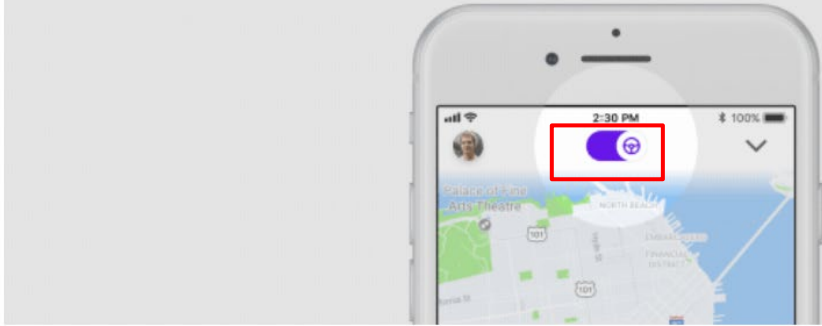

The contents of each claim cell below on which another claim cell depends are expressly incorporated into the dependent cell, as if set forth in their entirety therein.

² The construction of claim terms herein is consistent with the constructions in *AGIS Software Dev. LLC v. Huawei Technologies Co., Ltd.*, No. 2:17-cv-00513-JRG, Dkt. 205 (E.D. Tex. Oct. 10, 2018); *AGIS Software Dev. LLC v. Google LLC*, No. 2:19-cv-00147 (E.D. Tex. Dec. 8, 2020); *AGIS Software Dev. LLC v. T-Mobile USA, Inc., et al.*, No. 2:21-cv-00072-JRG, Dkt. 1 (E.D. Tex. Nov. 10, 2021). AGIS Software reserves the right to update its constructions and contentions in view of this Court's claim construction order.

Attachment A for US Patent No. 10,341,838 Against Lyft Accused Products

Claim 10,341,838	- Accused Products
<p>1[P]. A method performed by one or more servers each having one or more processors, the method comprising:</p>	<p>The Lyft Servers perform the computer implemented method as set forth below. Lyft further indirectly by performing, inducing others to perform, and/or contributing to the performance of by one or more servers each having one or more processors</p> <p>For example, Lyft provides the Lyft app for passengers and the Lyft Driver app for drivers. The Lyft app and drivers, in conjunction with Lyft's servers and services, provide users with interactive maps and track locations of passengers/riders using real-time maps and communications. Lyft provides the Lyft app to servers with processors (either hardware or software). The Lyft server(s) and their services connect to Lyft apps for riders and drivers. The Lyft server(s) and their services host information related to Lyft for processing user/device/vehicle accounts, location data, and map data.</p> <h3>Lyft Driver app</h3> <p>We've separated the passenger and driver experiences into two separate mobile apps — one exclusively for passengers (named the Lyft app) and the other exclusively for drivers (named the Lyft Driver app).</p> <p>The Lyft Driver app will eventually be standard for all drivers and required for driving. At this time, drivers can keep using the Lyft app to give rides. Don't worry! While we have some planned improvements to the Lyft Driver app, we've kept its features the same.</p> <p>https://help.lyft.com/hc/en-ca/articles/115013079208-Lyft-Driver-app</p> <h3>What is Lyft?</h3> <p>Lyft is a platform that connects drivers with individuals and organizations that need rides.</p> <p>https://www.lyft.com/drive-with-lyft</p>

	 <p data-bbox="435 1140 560 1167">Go online</p> <p data-bbox="435 1203 1624 1312">Open your Lyft Driver app and tap the steering wheel icon. Lyft will now find the closest passenger to your location requesting a ride. Turn on some music and get comfortable: that first ride request may come quickly or may take a while, depending on the number of current passenger requests.</p> <p data-bbox="435 1314 1094 1348">https://www.lyft.com/hub/posts/how-to-give-a-ride</p>

Explore Litigation Insights

Docket Alarm provides insights to develop a more informed litigation strategy and the peace of mind of knowing you're on top of things.

Real-Time Litigation Alerts

Keep your litigation team up-to-date with **real-time alerts** and advanced team management tools built for the enterprise, all while greatly reducing PACER spend.

Our comprehensive service means we can handle Federal, State, and Administrative courts across the country.

Advanced Docket Research

With over 230 million records, Docket Alarm's cloud-native docket research platform finds what other services can't. Coverage includes Federal, State, plus PTAB, TTAB, ITC and NLRB decisions, all in one place.

Identify arguments that have been successful in the past with full text, pinpoint searching. Link to case law cited within any court document via Fastcase.

Analytics At Your Fingertips

Learn what happened the last time a particular judge, opposing counsel or company faced cases similar to yours.

Advanced out-of-the-box PTAB and TTAB analytics are always at your fingertips.

API

Docket Alarm offers a powerful API (application programming interface) to developers that want to integrate case filings into their apps.

LAW FIRMS

Build custom dashboards for your attorneys and clients with live data direct from the court.

Automate many repetitive legal tasks like conflict checks, document management, and marketing.

FINANCIAL INSTITUTIONS

Litigation and bankruptcy checks for companies and debtors.

E-DISCOVERY AND LEGAL VENDORS

Sync your system to PACER to automate legal marketing.
