intranet

Any [network](#) which provides similar [services](#) within [an](#) organisation [to](#) those provided [by](#) the [Internet](#) outside [it](#) but which [is not](#) necessarily connected to the Internet. The commonest example is the [use](#) by a company of [one or more web servers](#) on an internal [TCP/IP](#) network [for distribution](#) of [information](#) within the company.

Since about 1995, [intranets](#) have become a major growth area [in](#) corporate [computing](#) due to the [availability](#) of cheap or [free](#) commercial [browser and web server software](#) which allows them to provide a [simple, uniform hypertext interface](#) to many kinds of information and [application programs](#).

Some companies give limited [access](#) to their intranets to other companies or the general public. This is known [as](#) an "[extranet](#)".
