B

IN THE CLAIMS:

B<sup>1</sup>

1. (Twice amended) A method comprising [the steps of]:  
 receiving by an inspector a Downloadable;  
 generating by the inspector a first Downloadable security profile that identifies suspicious code in the received Downloadable; and  
 linking by the inspector the first Downloadable security profile to the Downloadable before a web server makes the Downloadable available to web clients.

B<sup>2</sup>

11. (Once amended) The method of claim 1, wherein the first Downloadable security profile includes a list of operations deemed suspicious by [an] the inspector.

B<sup>3</sup>

15. (Twice amended) An inspector system comprising:  
 memory storing a first rule set; and  
 a first content inspection engine for using the first rule set to generate a first Downloadable security profile that identifies suspicious code in a Downloadable, and for linking the first Downloadable security profile to the Downloadable before a web server makes the Downloadable available to web clients.

sub  
C<sup>1</sup>

B<sup>4</sup>

22. (Twice amended) A method performed by a network gateway comprising [the steps of]:  
 receiving a Downloadable with a linked Downloadable security profile that identifies suspicious code in the Downloadable; and  
 comparing the Downloadable security profile against a security policy.

23. (Twice amended) A method performed by a network gateway comprising [the steps of]:  
 receiving a Downloadable with a linked first Downloadable security profile that identifies suspicious code in the Downloadable;  
 determining whether to trust the first Downloadable security profile; and  
 comparing the first Downloadable security profile against the security policy if the first Downloadable security profile is trustworthy.

2 B<sup>3</sup>

Sub  
C2  
B

32. (Twice amended) A network gateway system comprising:  
a Downloadable interceptor for receiving a Downloadable;  
a file reader coupled to the interceptor for determining whether the Downloadable includes a Downloadable security profile that identifies suspicious code in the Downloadable;  
an engine coupled to the file reader for determining whether to trust the Downloadable security profile; and  
a security policy analysis engine coupled to the verification engine for comparing the Downloadable security profile against a security policy if the engine determines that the Downloadable security profile is trustworthy.

41. (Twice amended) A computer-readable storage medium storing program code for causing a data processing system on an inspector to perform the steps of:  
receiving a Downloadable;  
generating a first Downloadable security profile that identifies suspicious code in the received Downloadable; and  
linking the first Downloadable security profile to the Downloadable before a web server makes the Downloadable available to web clients.

34

43. (Twice amended) An inspector system comprising:  
means for receiving a Downloadable;  
means for generating a first Downloadable security profile that identifies  
suspicious code in the received Downloadable; and  
means for linking the first Downloadable security profile to the Downloadable  
before a web server makes the Downloadable available to web clients.

*B<sup>b</sup>*  
*Sub C<sup>4</sup>*  
44. (Twice amended) A network gateway system comprising:  
means for receiving a Downloadable with a linked first Downloadable security  
profile that identifies suspicious code in the Downloadable;  
means for determining whether to trust the first Downloadable security profile;  
and  
means for comparing the first Downloadable security profile against the security  
policy if the first Downloadable security profile is trustworthy.

# Explore Litigation Insights

Docket Alarm provides insights to develop a more informed litigation strategy and the peace of mind of knowing you're on top of things.

## Real-Time Litigation Alerts

Keep your litigation team up-to-date with **real-time alerts** and advanced team management tools built for the enterprise, all while greatly reducing PACER spend.

Our comprehensive service means we can handle Federal, State, and Administrative courts across the country.

## Advanced Docket Research

With over 230 million records, Docket Alarm's cloud-native docket research platform finds what other services can't. Coverage includes Federal, State, plus PTAB, TTAB, ITC and NLRB decisions, all in one place.

Identify arguments that have been successful in the past with full text, pinpoint searching. Link to case law cited within any court document via Fastcase.

## Analytics At Your Fingertips

Learn what happened the last time a particular judge, opposing counsel or company faced cases similar to yours.

Advanced out-of-the-box PTAB and TTAB analytics are always at your fingertips.

## API

Docket Alarm offers a powerful API (application programming interface) to developers that want to integrate case filings into their apps.

## LAW FIRMS

Build custom dashboards for your attorneys and clients with live data direct from the court.

Automate many repetitive legal tasks like conflict checks, document management, and marketing.

## FINANCIAL INSTITUTIONS

Litigation and bankruptcy checks for companies and debtors.

## E-DISCOVERY AND LEGAL VENDORS

Sync your system to PACER to automate legal marketing.
