US Patent No. 6,965,968 Policy-Based Caching

Claim 6

6. The policy-based cache manager of claim 1 further comprising a transmitter for transmitting allowable content from the cache to a client computer.

6. Contention 1 – The Accused Products include a transmitter resident on Qualys Cloud

Each of the Accused Products discussed above includes a transmitter resident on the Qualys Cloud which transmits content, if determined to be allowable, to the client computer associated with the user.

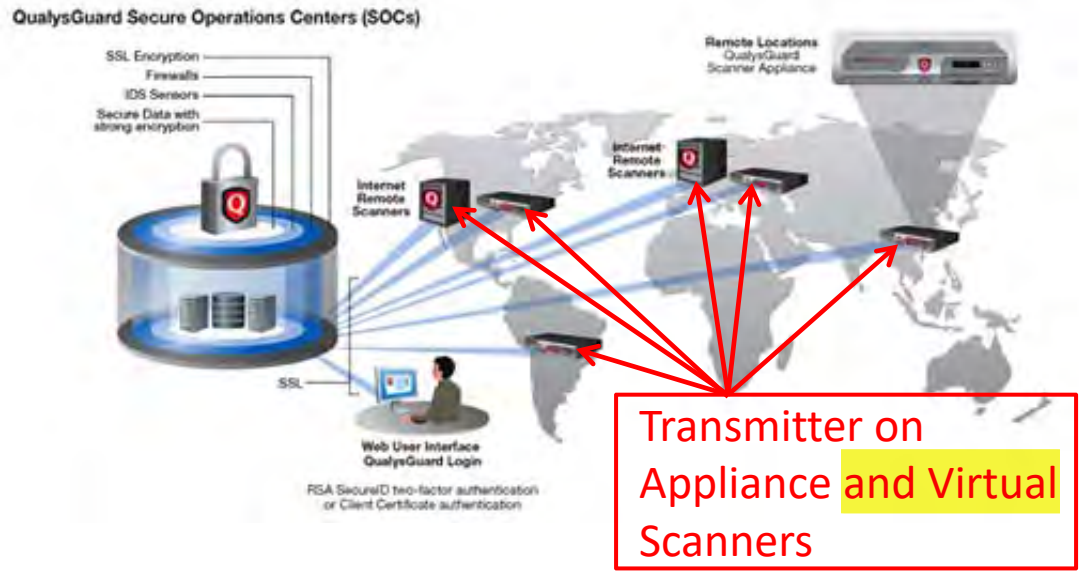

US Patent No. 6,965,968 Policy-Based Caching

Claim 6

6. The policy-based cache manager of claim 1 further comprising a transmitter for transmitting allowable content from the cache to a client computer.

6. Contention 2 – The Accused Products include a transmitter resident on Appliance / Virtual Scanners

Each of the Accused Products discussed above includes a transmitter resident on the Appliance / Virtual Scanners which transmits content, if determined to be allowable, to the client computer associated with the user.

US Patent No. 6,965,968 Policy-Based Caching

Claim 7

7. The policy-based cache manager of claim 1 further comprising a receiver for receiving digital content from a web server.

7. Contention 1 – The Accused Products, each resident on the Qualys Cloud, receive digital content using a receiver

Each of the Accused Products, executed on a node that is part of the Qualys Cloud computing environment, includes a receiver component on a separate node that receives content based on a client device requesting the content from a source computer, such as the Internet. As shown below, the content is received by each Accused Product, (via the receiver) when a particular client device requests content provided by a source computer.
