Sir:

I, Thomas R. Wolzien being duly sworn, depose and state:

1. I am the inventor or claims 18-29 of the above-identified patent application.
2. Prior to January 10, 1996, I conceived the idea of a system linking addresses of online information providers, which may be one or more addresses of web-pages on the Internet, with television broadcasts or pre-recorded video or audio programs to allow viewers to call up additional information by loading the addressed information from an on line service. A description and diagrams of embodiments of the invention was prepared by me, signed by me and notarized, and mailed to the U.S. Patent and Trademark Office ("Patent Office") as a Disclosure Document on September 15, 1995 (copy attached as Exhibit A).

3. The Patent Office acknowledged receipt of my invention disclosure and assigned Disclosure Document no. 382213.
4. On October 9, 1995, I discussed my invention with my attorney, Mr. Michael of the law firm of Amster, Rothstein & Ebenstein, and requested that he initiate a search on my invention (copy attached as Exhibit B).
5. Mr. Berger conducted a novelty search and had the results of the search in early November 1995.
6. I authorized Mr. Berger to prepare a patent application in my letter dated November 17, 1995 (copy attached as Exhibit C).
7. Mr. Berger forwarded a draft of the patent application with his letter of January 1996 (copy of the letter attached as Exhibit D).
8. After receiving my comments on the draft, Mr. Berger forwarded a second draft application with his letter of February 1, 1996 (copy of the letter attached as Exhibit E).
9. I returned the executed application to Mr. Berger for filing by letter of February 1996 (copy of letter attached as Exhibit F).
10. The application was filed on February 8, 1996 in the Patent Office, assigned to 08/597,432, and issued on June 2, 1998 as U.S. Patent No. 5,761,606.
11. The above-identified application, with serial no. 09/054740 assigned by the Patent Office, was filed as a continuation application of U.S. patent application 08/441,413, filed April 3, 1998 and claiming the filing date of now U.S. Patent No. 5,761,606.
