12 UNITED STATES DISTRICT COURT
13 NORTHERN DISTRICT OF CALIFORNIA
14 SAN JOSE DIVISION

15 IN RE PERSONALWEB TECHNOLOGIES,
16 LLC, ET AL., PATENT LITIGATION

CASE NO.: 5:18-md-02834-BLF

SECOND AMENDED COMPLAINT

DEMAND FOR JURY TRIAL

18
19 PERSONALWEB TECHNOLOGIES, LLC,
20 ET AL.,

Case No.: 5:18-cv-03459-BLF

21 Plaintiffs,

22 v.

23 KARMA MOBILITY INC., a Delaware
24 corporation,

25 Defendant.
26
27
28

1 Plaintiff PersonalWeb Technologies, LLC (“Plaintiff” or “PersonalWeb”) files this Second
2 Amended Complaint (“Complaint”) for patent infringement against Defendant Karma Mobility Inc.
3 (“Defendant”). Plaintiff PersonalWeb Technologies, LLC alleges:

4
5 **PRELIMINARY STATEMENT**

6 1. PersonalWeb and Level 3 Communications, LLC (“Level 3”) are parties to an
7 agreement between Kinetech, Inc. and Digital Island, Inc. dated September 1, 2000 (the “Agreement”).
8 Pursuant to the Agreement, PersonalWeb and Level 3 each own a fifty percent (50%) undivided
9 interest in and to the patents at issue in this action: U.S. Patent Nos. 6,928,442, 7,802,310, 7,945,544,
10 and 8,099,420 (“Patents-in-Suit”). Level 3 has joined in this Complaint pursuant to its contractual
11 obligations under the Agreement, at the request of PersonalWeb.

12 2. Pursuant to the Agreement, Level 3 has, among other rights, certain defined rights to
13 use, practice, license, sublicense and enforce and/or litigate the Patents-in-Suit in connection with a
14 particular field of use (“Level 3 Exclusive Field”). Pursuant to the Agreement PersonalWeb has,
15 among other rights, certain defined rights to use, practice, license, sublicense, enforce and/or litigate
16 the Patents-in-Suit in fields other than the Level 3 Exclusive Field (the “PersonalWeb Patent Field”).

17 3. All infringement allegations, statements describing PersonalWeb, statements
18 describing any Defendant (or any Defendant’s products) and any statements made regarding
19 jurisdiction and venue are made by PersonalWeb alone, and not by Level 3. PersonalWeb alleges that
20 the infringements at issue in this case all occur within, and are limited to, the PersonalWeb Patent
21 Field. Accordingly, PersonalWeb has not provided notice to Level 3—under Section 6.4.1 of the
22 Agreement or otherwise—that PersonalWeb desires to bring suit in the Level 3 Exclusive Field in its
23 own name on its own behalf or that PersonalWeb knows or suspects that Defendant is infringing or
24 has infringed any of Level 3’s rights in the patents.

25
26
27
28

THE PARTIES

1
2 4. Plaintiff PersonalWeb Technologies, LLC is a limited liability company duly organized
3 and existing under the laws of Texas with its principal place of business at 112 E. Line Street, Suite
4 204, Tyler, TX 75702.

5 5. Plaintiff Level 3 Communications, LLC is a limited liability company organized under
6 the laws of Delaware with its principal place of business at 100 CenturyLink Drive, Monroe,
7 Louisiana, 71203.

8 6. PersonalWeb’s infringement claims asserted in this case are asserted by PersonalWeb
9 and all fall outside the Level 3 Exclusive Field. Level 3 is currently not asserting patent infringement
10 in this case in the Level 3 Exclusive Field against any Defendant.

11 7. Defendant Karma Mobility, Inc. is, upon information and belief, a Delaware
12 corporation having a principal place of business or regular and established place of business at 2300
13 Valley View Lane, Suite 200, Irving, TX 75062.

14
15 **JURISDICTION AND VENUE**

16 8. The court has subject matter jurisdiction pursuant to 28 U.S.C. §§ 1331 and 1338(a)
17 because this action arises under the patent laws of the United States, 35 U.S.C. §§ 1 *et seq.*

18 9. Venue is proper in this federal district pursuant to 28 U.S.C. §§ 1391(b)–(c) and
19 1400(b) because, on information and belief, Defendant is incorporated in the State of Delaware and
20 thus is a resident of the District of Delaware.

21 10. Venue is also proper in this Court because this action has been transferred to this
22 District by the Judicial Panel on Multidistrict Litigation for consolidated pretrial proceedings pursuant
23 to 28 U.S.C. § 1407.

24 11. This court has personal jurisdiction over Defendant because, in addition to the
25 allegations in above paragraphs, on information and belief, Defendant, being incorporated in the State
26 of Delaware, is domiciled in the District of Delaware.

27
28

1 sequence of bits.” Applied system-wide, this invention would permit any data item to be stored,
2 located, managed, synchronized, and accessed using its content-based identifier.

3 17. To create a substantially unique, content-based identifier, Lachman and Farber turned
4 to cryptography. Cryptographic hash functions, including MD4, MD5, and SHA, had been used in
5 computer systems to verify the integrity of retrieved data—a so-called “checksum.” Lachman and
6 Farber recognized that these same hash functions could be devoted to a vital new purpose: if a
7 cryptographic hash function was applied to a sequence of bits (a “data item”), it would produce a
8 substantially unique result value, one that: (1) virtually guarantees a different result value if the data
9 item is changed; (2) is computationally difficult to reproduce with a different sequence of bits; and
10 (3) cannot be used to recreate the original sequence of bits.

11 18. These cryptographic hash functions would thus assign any sequence of bits, based on
12 content alone, with a substantially unique identifier. Lachman and Farber estimated that the odds of
13 these hash functions producing the same identifier for two different sequences of bits (i.e., the
14 “probability of collision”) would be about 1 in 2 to the 29th power. Lachman and Farber dubbed their
15 content-based identifier a “True Name.”

16 19. Using a True Name, Lachman and Farber conceived various data structures and
17 methods for managing data (each data item correlated with a single True Name) within a network—
18 no matter the complexity of the data or the network. These data structures provide a key-map
19 organization, allowing for a rapid identification of any particular data item anywhere in a network by
20 comparing a True Name for the data item against other True Names for data items already in the
21 network. In operation, managing data using True Names allows a user to determine the location of
22 any data in a network, determine whether access is authorized, and to selectively provide access to
23 specific content not possible using the conventional naming arts.

24 20. On April 11, 1995, Lachman and Farber filed their patent application, describing these
25 and other ways in which content-based “True Names” elevated data-processing systems over
26 conventional file-naming systems. The first True Name patent issued on November 2, 1999. The last
27 of the Patents-in-Suit has expired, and the allegations herein are directed to the time period before
28 expiration of the last of the Patents-in-Suit.

Explore Litigation Insights

Docket Alarm provides insights to develop a more informed litigation strategy and the peace of mind of knowing you're on top of things.

Real-Time Litigation Alerts

Keep your litigation team up-to-date with **real-time alerts** and advanced team management tools built for the enterprise, all while greatly reducing PACER spend.

Our comprehensive service means we can handle Federal, State, and Administrative courts across the country.

Advanced Docket Research

With over 230 million records, Docket Alarm's cloud-native docket research platform finds what other services can't. Coverage includes Federal, State, plus PTAB, TTAB, ITC and NLRB decisions, all in one place.

Identify arguments that have been successful in the past with full text, pinpoint searching. Link to case law cited within any court document via Fastcase.

Analytics At Your Fingertips

Learn what happened the last time a particular judge, opposing counsel or company faced cases similar to yours.

Advanced out-of-the-box PTAB and TTAB analytics are always at your fingertips.

API

Docket Alarm offers a powerful API (application programming interface) to developers that want to integrate case filings into their apps.

LAW FIRMS

Build custom dashboards for your attorneys and clients with live data direct from the court.

Automate many repetitive legal tasks like conflict checks, document management, and marketing.

FINANCIAL INSTITUTIONS

Litigation and bankruptcy checks for companies and debtors.

E-DISCOVERY AND LEGAL VENDORS

Sync your system to PACER to automate legal marketing.
