Top Skills

Cloud Computing

Microsoft SQL Server

.NET

Certifications

AWS Certified Solutions Architect – Associate Level

Publications

Deploy Windows Azure VMs with RightScale for Rapid Testing and Validation

DNS Load Balancing and Using Multiple Load Balancers in the Cloud

RightScale Credentials Best Practices

Don't Sweat IT - Move Your Applications to the Public Cloud the Right Way

Using Chef, Test-Kitchen and Packer to Build Immutable Images

Patents

System and method for integration, testing, deployment, orchestration, and management of applications

System and method for real-time asynchronous multitenant gateway security

System and method for management of deployed services and applications

System and method for rapid and asynchronous multitenant telemetry collection and storage

Summary

I've written code, designed ridiculously scalable application infrastructure and served soft-serve ice cream to the best of them (no, really... my first job ever was at Dairy Queen). While I'm not necessarily interested in a return to the food service industry, I've learned that a wide range of experience, brought to bear in the right ratios nets a phenomenal result.

Much like putting a minty chewy dragée in a bottle of brand-name diet cola (brand names removed to protect the innocent, namely me), the genesis of the most interesting reactions are often difficult to see and quite unexpected. Managing that reaction and the energy created by it (people, process) becomes the art behind the science of how the technology actually works.

I find that I'm at my best at the intersection of technology and business when I am able to bring seemingly innocuous and unrelated people, concepts and capabilities to bear to make massive impacts in teams, organizations, companies and the greater community at large.

―――――

Experience

IntrospectData
Founder & CEO
March 2018 - Present
Carlsbad, CA

TechVision Research
Principal Analyst (DevOps, Scalability, Application Development and Cloud)
April 2018 - Present
Carlsbad, CA

2 years 7 months

SVP Platform Engineering
January 2016 - March 2018 (2 years 3 months)
Greater San Diego Area

At Datapipe, I'm responsible for designing and building the next generation of tools, capabilities and platforms for our managed services customers. Our aim is to make it easy to leverage the power of cloud native and cloud-oriented architectures in a consistent and highly available manner through the use of tools from Docker and Kubernetes to base cloud provider services.

Director, Automation and DevOps
September 2015 - January 2016 (5 months)

DualSpark
COO&CTO
July 2014 - September 2015 (1 year 3 months)
Santa Monica, California

DualSpark is an expert Amazon Web Services consulting partner helping clients capitalize on the benefits of cloud architecture and design with modern and innovative software, infrastructure and automation strategies leveraging solutions from AWS. Let us know if you'd like to talk and we can set up some time to talk about how we can help you can accelerate your onramp to the cloud.

Amazon Web Services
Sr. Consultant
May 2013 - June 2014 (1 year 2 months)
Irvine, CA

Leading engagements, design and technical strategy for Fortune 500 and Global 1000 clients.

RightScale
Solutions Architect
June 2012 - May 2013 (1 year)

At RightScale, I was involved with launching new products and helping new clients to utilize a variety of cloud computing providers to the fullest extent possible. Focused mainly on cross-platform and Microsoft Windows-based deployments, I helped to produce production-level assets utilizing both RightScale and Microsoft-specific solutions. I also lead a number of cross-

I also had the chance to lead another internal cross-functional team to build out Microsoft .net components to interact with the RightScale API which has enabled PowerShell, Windows Workflow Foundation and general .net projects to take advantage of the 1.5 version of RightScale's API.

Blackbaud
Solutions Architect
August 2010 - September 2012 (2 years 2 months)
Charleston, SC

Responsible for technical project execution, leadership and mentoring of junior resources within the Professional Services technical organization. Successfully launched several implementations while remediating and guiding other projects throughout the project lifecycle from kickoff through go-live. Designed customizations for clients at a productized level for federated deployments with separate and distinct business processes within the same codebase.   Developed processes in conjunction with other internal departments to allow for new and novel access to features within the bbAppFx/Infinity platform including reporting-level access to the Blackbaud Data Warehouse. Collaborated with and lead inter-departmental teams to address systemic issues related to product functionality as well as performance in a hosted and non-hosted environment for the company's flagship enterprise CRM solution.

SelfHelpWorks, Inc.
Director of Technology
July 2009 - August 2010 (1 year 2 months)

Responsible for stabilizing a legacy Classic ASP system while developing new code, processes and systems from the ground up using C#.net 3.5/4.0, CSS, XHTML, AJAX/JQuery as well as a number of UI framework packages. Architected and wrote payment and billing engine capable of runtime configuration for n-number of payment gateways with time to live of 2 hrs or less (using System.Reflection). Implemented a full SDLC process to ensure quality control and proper delivery of systems and TFS 2008/2010 for source control management and project management visibility. Took systems from requirements gathering with stakeholders through the platform architecture process as and completed the implementations with a hands-on approach and a team of 4 direct reports. Built new data center to replace leased servers and outsourced resources to improve reliability and stability of system at large

PatrickMcClory.com
Owner/Freelance Designer and Developer
January 2005 - July 2010 (5 years 7 months)

End-to-end development of small business sites including design and
Business Intelligence.

Working to reduce time-to-live for new models for automotive web site through
reverse engineering existing systems
and producing a suite of tools to process data faster and more efficiently.
Participating in code redesign of several major sites.
Leading site maintenance team as tech lead on the project, often including
remote coordination of developers.
Technical Environment: ASP.net 1.1/2.0-vb.net/C#, SQL 2000/2005, Classic
ASP/VBScript, CSS/DHTML, AJAX,
COM+ interop

Sharepoint360
Sr .net/SQL Architect
July 2008 - July 2009 (1 year 1 month)

Responsible for designing and architecting a multi-tier, multi-tennant SaaS
system and launching it as a new product for the company
Deployed, trained and implemented TFS 2008 for the development team
Developed Change Management procedures for production level changes on
new products being developed

The Active Network
Development Lead/Manager
October 2007 - July 2008 (10 months)

Responsible for maintainting legacy Coldfusion Systems while providing
stability and organization to the code and
infrastructure of the deployment.
Responsible for hiring and managing for team of 7 direct reports
Created and implemented programs to improve developer education and
retention.

Threshold Interactive
Web Application Developer (Sr.)
May 2007 - June 2008 (1 year 2 months)

DOCKET ALARM

Explore Litigation Insights

Docket Alarm provides insights to develop a more informed litigation strategy and the peace of mind of knowing you're on top of things.

Real-Time Litigation Alerts

Keep your litigation team up-to-date with **real-time alerts** and advanced team management tools built for the enterprise, all while greatly reducing PACER spend.

Our comprehensive service means we can handle Federal, State, and Administrative courts across the country.

Advanced Docket Research

With over 230 million records, Docket Alarm's cloud-native docket research platform finds what other services can't. Coverage includes Federal, State, plus PTAB, TTAB, ITC and NLRB decisions, all in one place.

Identify arguments that have been successful in the past with full text, pinpoint searching. Link to case law cited within any court document via Fastcase.

Analytics At Your Fingertips

Learn what happened the last time a particular judge, opposing counsel or company faced cases similar to yours.

Advanced out-of-the-box PTAB and TTAB analytics are always at your fingertips.

API

Docket Alarm offers a powerful API (application programming interface) to developers that want to integrate case filings into their apps.

LAW FIRMS

Build custom dashboards for your attorneys and clients with live data direct from the court.

Automate many repetitive legal tasks like conflict checks, document management, and marketing.

FINANCIAL INSTITUTIONS

Litigation and bankruptcy checks for companies and debtors.

E-DISCOVERY AND LEGAL VENDORS

Sync your system to PACER to automate legal marketing.

fastcase®
Smarter legal research.
