18 Plaintiffs,

**PERSONALWEB TECHNOLOGIES,  
 LLC'S NON-OPPOSITION TO  
 AMAZON.COM, INC. AND AMAZON  
 WEB SERVICES, INC.'S MOTION FOR  
 SUMMARY JUDGMENT OF  
 NONINFRINGEMENT AND  
 OPPOSITION TO MOTION  
 REGARDING STANDING**

19 v.

20 PERSONALWEB TECHNOLOGIES, LLC,  
 21 and LEVEL 3 COMMUNICATIONS, LLC,

22 Defendants.

23 PERSONALWEB TECHNOLOGIES, LLC  
 24 and LEVEL 3 COMMUNICATIONS, LLC,

25 Counterclaimants,

26 v.

27 AMAZON.COM, INC. and AMAZON WEB  
 28 SERVICES, INC.,

Counterdefendants.

Date: November 15, 2019  
 Time: 9:00 a.m.  
 Dept.: Courtroom 3, 5<sup>th</sup> Floor  
 Judge: Hon. Beth Labson Freeman

Trial Date: March 16, 2020

1 PersonalWeb does *not* oppose entry of judgment of noninfringement on all of its counterclaims  
2 as set forth in Amazon's Proposed Order (Dkt. 541-1). PersonalWeb *does oppose* the entry of the  
3 portion of Amazon's Proposed Order, in square brackets, regarding standing. PersonalWeb also  
4 *opposes* any opinion, finding or conclusion by the Court that includes that summary judgment is  
5 entered based on anything other than as a direct result of the Court's Claim Construction Order (Dkt.  
6 485).

#### 7 **I. INTRODUCTION**

8 Other than the square bracketed portion of Amazon's Proposed Order, the order Amazon seeks  
9 is not substantively different than the order proposed in PersonalWeb's Motion for Judgment (Dkt.  
10 538) (as modified in PersonalWeb's Reply (Dkt. 548)). Accordingly, PersonalWeb requests that its  
11 Motion for Judgment be considered ahead of Amazon's Motion for Summary Judgment of  
12 Noninfringement. The granting of PersonalWeb's Motion for Judgment would then moot Amazon's  
13 Motion for Summary Judgment of Noninfringement.

14 Following entry of the Court's Claim Construction Order, PersonalWeb agreed to Amazon's  
15 request that PersonalWeb immediately dismiss all claims against Amazon with prejudice.  
16 PersonalWeb's motion to clarify did not apply to PersonalWeb's claims against Amazon because  
17 while Amazon controls whether content is provided or accessed, it does so based on parameters set or  
18 controlled by its customers, not based on whether there are valid rights to any specific content. Thus,  
19 prior to the date expert reports were due, Amazon and PersonalWeb were in agreement that all of  
20 PersonalWeb's claims against Amazon should be dismissed with prejudice. Amazon has since reneged  
21 on its agreement for dismissals with prejudice and instead moved for summary judgment of  
22 noninfringement on new grounds unrelated to the issues addressed in the Claim Construction Order.

23 Nonetheless, PersonalWeb does not oppose the entry of Amazon's Proposed Order as  
24 submitted to the Court (without the portion in square brackets regarding standing), as it does not  
25 reference Amazon's new grounds for noninfringement. However, PersonalWeb *does oppose*  
26 Amazon's new noninfringement grounds: (1) permitting content to be provided or accessed, (2)  
27 determining whether a copy of a data file is present, or (3) comparison to a plurality of identifiers. All  
28 three of these new arguments are the subject of disputed, material facts. Moreover, none of these new

1 grounds relate to the “unauthorized or unlicensed” issue. Nor do any of these new grounds relate to  
2 any of the other claim terms construed in the Claim Construction Order. PersonalWeb also opposes  
3 granting summary judgment based on the lack of an expert report or on the lack of standing.

4 As to the substance of the new non-licensing noninfringement arguments, Amazon is now  
5 doing what it chastised PersonalWeb for purportedly doing in its motion to clarify—namely, seeking  
6 a redo of claim construction. In all three of its new noninfringement arguments, Amazon asks the court  
7 to read claim language to be substantively narrower than the plain meaning of the claim language (e.g.,  
8 “not permitting the content to be provided to or accessed” as “not permitting the content to be provided  
9 to or accessed *forever*,” “determining, using at least the name, whether a copy of the data file is present  
10 on at least one of said computers” as “determining, using *only* the name, whether a copy of the data  
11 file is present on at least one of said computers”; “whether a ... name ... corresponds to one of the  
12 plurality of identifiers” as a name is “*compared* to a plurality of identifiers or values”). Throughout its  
13 motion, Amazon only argues that it does not meet the limitation as it wished it was written, not as it  
14 was actually written. As the claims are actually written, Amazon meets each of the claim limitations  
15 it raises.

16 Should Amazon’s substantive noninfringement arguments fail, it contends that the absence of  
17 an expert witness report alone supports granting summary judgment motion on these new issues,  
18 despite making the same new noninfringement arguments that are made in the Twitch summary  
19 judgment motion and citing extensively to Mr. de la Iglesia’s Twitch expert report.

20 On the absence of an expert report, Amazon seeks to have it both ways. First, Amazon took  
21 the position that submitting any expert report of infringement once the Court had ruled against  
22 PersonalWeb on claim construction, would violate Rule 11. Now, Amazon says that PersonalWeb’s  
23 “failure” to submit an expert report on infringement entitles it to summary judgment of  
24 noninfringement based on grounds that have nothing to do with the Court’s claim construction.

25 After the Court’s Claim Construction Order, Amazon threatened PersonalWeb with Rule 11  
26 sanctions if it did not immediately halt its litigation against Amazon and dismiss its case with  
27 prejudice. PersonalWeb agreed the next business day and outlined proposed terms for a stipulation for  
28 entry of judgment (Amazon knew that it would have to stipulate to the dismissal it demanded as it had

1 answered PersonalWeb’s claims). Amazon said it would consider PersonalWeb’s proposal and both  
2 sides ceased all Amazon/CloudFront-focused discovery and discovery proceedings (*i.e.*, motions to  
3 compel). So too, in reliance on Amazon’s indicated desire for immediate dismissal and the expectation  
4 that dismissal would be cooperatively worked-out and imminent, PersonalWeb did not serve expert  
5 reports in the Amazon case that were due on August 23, 2019.

6 Over a month later, Amazon first conveyed that it had reversed course and would not agree  
7 to a dismissal. (Dkt. 538-1 (Sherman Decl. to Motion for Entry of Judgment) and Dkt. 538-2 – 538-  
8 4 (Ex. 1-3 to Sherman Decl.) Apparently, Amazon saw an opening to take advantage of  
9 PersonalWeb’s acceptance of Amazon’s dismissal demand and not producing expert reports (saving  
10 Amazon from having to rebut them). Now, based on the Amazon-induced absence of PersonalWeb  
11 expert reports, Amazon is attempting to receive an essentially “default” summary judgment on issues  
12 unrelated to the Claim Construction Order. This type of gamesmanship should not be rewarded by  
13 this Court. That is why PersonalWeb hereby requests under FRCP 56(d) that the Court consider the  
14 unsigned declaration of Erik de la Iglesia, that is attached to the Sherman declaration, and further  
15 consider the facts relayed in the Sherman declaration as sufficient grounds thereunder, to either (1)  
16 accept for service and filing the unsigned de la Iglesia declaration (to be executed before filing) in  
17 opposition to the new grounds of non-infringement, or (2) deny the new grounds of non-  
18 infringement urged by Amazon. Under all the circumstances, PersonalWeb chooses to not now  
19 submit an executed version of the de la Iglesia declaration, without Court permission.

20 Amazon projects confidence it will win any appeal on claim construction. Yet, its stated reason  
21 for seeking summary judgment instead of dismissal is saving the Court from a possible remand and  
22 further appeal, which would only happen if Amazon *loses* a claim construction appeal. If Amazon  
23 *wins* the appeal, the only difference in having the Court rule on Amazon’s new grounds of  
24 noninfringement is that Amazon will be able to try to use the summary judgment for issue preclusion  
25 in other cases—under artificial circumstances created by Amazon that put PersonalWeb at a  
26 disadvantage in opposing it. This is a further reason that Amazon’s gamesmanship should not be  
27 rewarded by this Court.

1 **II. ARGUMENT**

2 Amazon servers send HTTP 304 messages which indicates to browsers operating under HTTP  
3 1.1. protocol that they are permitted to continue to access expired Amazon webpage content in their  
4 caches when Amazon wants the browsers to keep using the cached content in rendering Amazon  
5 webpages. Amazon servers send HTTP 200 messages that make new content available that browsers  
6 access instead of the previously cached content when Amazon no longer wishes the browsers to use  
7 the previously cached file content in rendering Amazon webpages. Amazon uses MD5 ETags (i.e.,  
8 ETag values generated by applying the MD5 hash algorithm to the file content and only the file  
9 content) in making the decision whether or not to continue to permit the browsers' access to the  
10 previously cached file content or to provide new file content for the browser to access and use instead  
11 of the previously cached file content. The MD5 ETags inform Amazon whether a copy of the current  
12 version of the webpage file is already cached (present) at the browser or needs to be provided. If a  
13 copy of the current version is already present at the browser, Amazon sends the HTTP 304 message  
14 permitting the browser to continue accessing the cached copy. If the file at the browser is not a copy  
15 of the current file version, Amazon sends the HTTP 200 message for the browser to access instead of  
16 the previously cached version.

17 Despite these undisputed facts, Amazon asserts that it “neither permits nor denies access to  
18 any data item stored by web browsers” because “web browsers can access any locally-stored Amazon  
19 data item, whether current or expired, licensed or unlicensed.” Amazon supports this argument by  
20 citing to situations wherein a browser uses expired content in its cache anyway based upon a manual  
21 user input (e.g. pressing the “back” button). But these situations do not involve communications or  
22 interactions with the Amazon server and do not address the actual infringement scenario in which the  
23 Amazon server determines whether to permit continued access to previously cached content or to  
24 provide new content for access. Amazon also argues that it does not infringe because it does not  
25 compare the MD5 ETag received from a browser in a conditional GET request to a plurality of MD5  
26 ETag values. But this argument is also unavailing because none of the asserted claims require such a  
27 one-to-many comparison.

# Explore Litigation Insights

Docket Alarm provides insights to develop a more informed litigation strategy and the peace of mind of knowing you're on top of things.

## Real-Time Litigation Alerts

Keep your litigation team up-to-date with **real-time alerts** and advanced team management tools built for the enterprise, all while greatly reducing PACER spend.

Our comprehensive service means we can handle Federal, State, and Administrative courts across the country.

## Advanced Docket Research

With over 230 million records, Docket Alarm's cloud-native docket research platform finds what other services can't. Coverage includes Federal, State, plus PTAB, TTAB, ITC and NLRB decisions, all in one place.

Identify arguments that have been successful in the past with full text, pinpoint searching. Link to case law cited within any court document via Fastcase.

## Analytics At Your Fingertips

Learn what happened the last time a particular judge, opposing counsel or company faced cases similar to yours.

Advanced out-of-the-box PTAB and TTAB analytics are always at your fingertips.

## API

Docket Alarm offers a powerful API (application programming interface) to developers that want to integrate case filings into their apps.

## LAW FIRMS

Build custom dashboards for your attorneys and clients with live data direct from the court.

Automate many repetitive legal tasks like conflict checks, document management, and marketing.

## FINANCIAL INSTITUTIONS

Litigation and bankruptcy checks for companies and debtors.

## E-DISCOVERY AND LEGAL VENDORS

Sync your system to PACER to automate legal marketing.
