SSIC in Silicon Valley

Silicon Valley is synonymous with innovation, and Samsung has had a campus here since 1987, making good use of the local culture, atmosphere, and talent. Our newly built San Jose campus is home to SSIC's automotive, digital health, data center, and IoT innovation projects.

About the Office

Opened in 2015, the Samsung Device Solutions America campus is known locally as "Samsung@First" because of its North 1st Street address. The building is LEED Platinum Certified, and features a large solar farm, unique design, and lots of open and green spaces.

Onsite facilities include a full-service café, a fitness center, basketball and tennis courts, and a recreation and relaxation area known as "The Chill Zone."
