

# Exhibit 2

# EXHIBIT A

school and was the lead programmer for the first automated Marine Corps Tactical Operations Center Link-11 Navy Interface. After leaving active service, I worked at a number of well-known technology companies, including System Development Corporation (considered the world's first computer software company) and Litton Industries. I then started several businesses which provided technology and engineering solutions supporting defense and military customers.

3. In 1987, I co-founded Advanced Programming Concepts, Inc. ("APC"), a Texas corporation based in Austin, Texas. APC operated primarily out of its main business location in Austin, Texas. APC specialized in designing, building, and supporting systems for enabling integration and sharing time-critical information across dissimilar military and defense applications. At APC, I was the majority shareholder and Chairman until we sold the business to Ultra Electronics in July 1999.

4. On June 30, 2004, I founded Advanced Ground Information Systems, Inc. ("AGIS Inc."), a Florida corporation. AGIS Inc.'s main business location is located at 92 Lighthouse Drive, Jupiter, Florida. AGIS Inc. also maintains business locations in Austin, TX and Kansas City, KS. AGIS Inc. employs approximately 15 people.

5. As the CEO of AGIS and AGIS Inc. and first-named inventor of the Patents-in-Suit, I will be one of AGIS's primary witnesses because I have knowledge of the businesses and the conception and reduction to practice of the Patents-in-Suit. I live and work in Jupiter, Florida.

6. In 2013, AGIS Inc. began a corporate restructuring plan for business growth purposes. By 2017, AGIS Inc.'s board of directors approved the restructuring plan which resulted in the formation of a parent corporation, AGIS Holdings, Inc. ("AGIS Holdings"), a Florida corporation. AGIS Holdings consists of two subsidiaries, AGIS Inc. and AGIS, a limited liability company organized under Texas law. Each is a separate corporate entity. AGIS was

established in Texas because of my previous successful business operations in Texas and because of my longstanding personal connections to Texas, which I describe in more detail below. AGIS has an office and a data center in Marshall, Texas.

7. AGIS holds assignment to each of the Patents-in-Suit and licenses its patent portfolio, including the Patents-in-Suit to AGIS Inc. The two entities, AGIS and AGIS Inc. maintain separate corporate formalities.

**AGIS's Witnesses and Other Sources of Proof are in or Closer  
to This District Than to the Northern District of California**

8. AGIS is a limited liability company organized and existing under the laws of the State of Texas. AGIS maintains an office and its principal place of business at 100 W. Houston Street, Marshall, Texas 75670. The lease on AGIS's Marshall office has run from June 1, 2017 and continues to present. AGIS's documents are maintained at this location, including patents, files histories, assignment records, prosecution records, formation documents, licenses, agreements, and corporate records. AGIS Inc. also conducts business and maintains documents and records at AGIS's Marshall office.

9. AGIS has a data center located at 1005 Stuart Lane, Marshall, Texas 75672. The Marshall data center hosts servers, code, applications, and services necessary to run operations for AGIS Inc.'s LifeRing and ASSIST products and solutions. The Marshall data center is used to store code, documents, and other data related to AGIS Inc.'s LifeRing and ASSIST products and solutions. The Marshall data center is used for research and development projects. AGIS Inc. invoices AGIS on a regularly basis for AGIS Inc.'s provision of personnel and services related to the use, maintenance, and operation of the Marshall data center and for labor, travel expenses, and other expenses related to work performed at the Marshall data center.

# Explore Litigation Insights

Docket Alarm provides insights to develop a more informed litigation strategy and the peace of mind of knowing you're on top of things.

## Real-Time Litigation Alerts

Keep your litigation team up-to-date with **real-time alerts** and advanced team management tools built for the enterprise, all while greatly reducing PACER spend.

Our comprehensive service means we can handle Federal, State, and Administrative courts across the country.

## Advanced Docket Research

With over 230 million records, Docket Alarm's cloud-native docket research platform finds what other services can't. Coverage includes Federal, State, plus PTAB, TTAB, ITC and NLRB decisions, all in one place.

Identify arguments that have been successful in the past with full text, pinpoint searching. Link to case law cited within any court document via Fastcase.

## Analytics At Your Fingertips

Learn what happened the last time a particular judge, opposing counsel or company faced cases similar to yours.

Advanced out-of-the-box PTAB and TTAB analytics are always at your fingertips.

## API

Docket Alarm offers a powerful API (application programming interface) to developers that want to integrate case filings into their apps.

## LAW FIRMS

Build custom dashboards for your attorneys and clients with live data direct from the court.

Automate many repetitive legal tasks like conflict checks, document management, and marketing.

## FINANCIAL INSTITUTIONS

Litigation and bankruptcy checks for companies and debtors.

## E-DISCOVERY AND LEGAL VENDORS

Sync your system to PACER to automate legal marketing.
