UNITED STATES DISTRICT COURT SOUTHERN DISTRICT OF CALIFORNIA

APPLE INC.,

Plaintiff,

WI-LAN INC., et al.,

Defendants.

Case No.: 14cv2235-DMS (BLM)

ORDER REGARDING APPLE'S MOTION TO COMPEL RESPONSES TO INTERROGATORY NOS. 14-16

[ECF Nos. 262, 263]

On January 16, 2018 the parties called the court regarding a discovery dispute in connection with Wi-LAN's responses to Apple's Interrogatory Nos. 14, 15, and 16. The court issued a briefing schedule for the parties to file letter briefs regarding their respective positions. The parties timely filed their respective letter briefs. ECF Nos. 262, 263.

Apple argues that Wi-LAN's responses to Apple's Interrogatory Nos. 14, 15 and 16 are deficient. ECF No. 263 at 1. Apple contends that the three interrogatories at issue "seek Wi-LAN's contentions related to the alleged commercial success of its patents, alleged validity under Section 102 and 103, and alleged validity under 112, respectively." Id. Apple requests that the Court order Wi-LAN to provide comprehensive responses to these interrogatories, or order that Wi-LAN is prohibited from relying on its undisclosed contentions in expert reports, summary judgment, or at trial. Id. Wi-LAN responds that its responses to these interrogatories are

sufficiently detailed, and Apple's request should be denied. ECF No. 262 at 1. The Court has carefully reviewed Wi-LAN's responses and supplemental responses to Interrogatory Nos. 14-16 and considered all of the briefing. See Apple's Letter Brief, Exhibit 1 to the Declaration of Sean Cunningham (Wi-LAN's Objections and Responses to Apple's Third Set of Interrogatories) and Exhibit 2 to the Declaration of Sean Cunningham (Wi-LAN's Supplemental Responses to Apple's Interrogatory Nos. 2, 3, 4, 5, 8, 10, 12, 14, 17). The Court will address each interrogatory below.

1. Interrogatory No. 14

Apple's Interrogatory No. 14 asks Wi-LAN to identify all products made by Wi-LAN or Ensemble Communications that allegedly practice the Asserted Patent claims. Ex. 1 at 8. The interrogatory also seeks the legal and factual basis for Wi-LAN's contention that the identified products practice the claims. <u>Id.</u> Finally, the interrogatory asks Wi-LAN to provide its response in a chart "identifying the structures or functionalities in each prototype or product that purportedly meet each limitation of each such asserted claim. . . ." <u>Id.</u> Wi-LAN responded by identifying two products and specific patents and claims. <u>Id.</u> at 9. Wi-LAN also listed a large number of documents as providing responsive information. <u>Id.</u> at 10, 22-45. Finally, Wi-LAN directed Apple to its Local Patent Rule 3.2 disclosures, future expert testimony, and the deposition testimony of Kenneth Stanwood. <u>Id.</u> at 10; <u>see also</u> Ex. 2 at 90.

Apple contends that Wi-LAN's response is insufficient because it fails to explain why Wi-LAN contends its products practice its patents. ECF No. 263 at 1. Apple asserts that the requested information is "relevant to Wi-LAN's validity contention that its allegedly patent-practicing products were commercially successful, and targets the threshold issue of whether Wi-LAN's products were actually patent-practicing products." <u>Id.</u> Apple further objects to Wi-LAN's decision to refer Apple to "nearly 1000 documents that purportedly provide a response" instead of properly answering the interrogatory. <u>Id.</u>

Wi-LAN disagrees and states that its response is sufficient as it identified two products, the specific claims, and "24 pages of the documents underlying Wi-LAN's belief that these products may have practiced one or more claims of the Patents-in-Suit." ECF No. 262 at 1. Wi-

LAN asserts that its response complies with FRCP 33(b) because it provides "such information as is available to [it]." Id. Wi-LAN also objects to providing element-by-element claim charts because it has never conducted any such analysis, and to do so would be unduly burdensome. Id. (citing Sonix Tech. Co. Ltd. V. Yoshida, No. 12 CV 380, 2014 WL 11878354, at *3 (S.D. Cal. Dec. 5, 2014)). Wi-LAN argues that its response to Interrogatory No. 14 is consistent with Patent Local Rule 3.1(g), which Wi-LAN claims only requires it to "identify" for each asserted claim the allegedly practicing products, not require a detailed explanation of how the products meet each claim element. Finally, Wi-LAN claims that its response is consistent with the Court's prior rulings in this matter, noting that the Court previously denied Wi-LAN's request to compel Apple to provide a more detailed response to Wi-LAN's Interrogatory No. 3. ECF No. 262, at 2. Notably, Wi-LAN does not argue that the information sought in this interrogatory is not relevant. ECF No. 262.

The Court agrees with Apple that Wi-LAN's response to Interrogatory No. 14 does not satisfy Wi-LAN's discovery obligation. While FRCP 33(d) authorizes a party in limited circumstances to respond to an interrogatory by identifying specific documents, Wi-LAN has not established the requisite circumstances. Rule 33(d) provides:

If an answer to an interrogatory may be determined by examining, auditing, compiling, abstracting, or summarizing a party's business records (including electronically stored information), and if the burden of deriving or ascertaining the answer will be substantially the same for either party, the responding party may answer by:

- (1) specifying the records that must be reviewed, in sufficient detail to enable the interrogating party to locate and identify them as readily as the responding party could; and
- (2) giving the interrogating party a reasonable opportunity to examine and audit the records and to make copies, compilations, abstracts or summaries.

Fed. R. Civ. P. 33(d).

Here, Wi-LAN has not established that the burden of ascertaining the answer to the interrogatory from the identified documents is substantially the same for Apple and Wi-LAN.

Interrogatory No. 14 seeks the basis for Wi-LAN's "contention that the prototype or product practices or would have practiced one or more claims of the Asserted Patents." Ex. 1, at 8. Because the interrogatory seeks Wi-LAN's contentions, the burden of ascertaining that answer from the documents is not the same for Apple and Wi-LAN. See, Mancini v. Insurance Corp. of New York, No. 07cv1750-L (NLS), 2009 WL 1765295, at *3 (S.D. Cal. June 18, 2009) (granting plaintiff's motion to compel supplemental contention interrogatory responses "because Plaintiffs are more familiar with their contentions than [defendant] could be, [so] the burden is not equal and the use of Rule 33(d) is inappropriate."); see also Blast Motion, Inc. v. Zepp Labs, Inc., No. 15-cv-00700-JLS (NLS), 2016 WL 5107677, at *1, 3-4 (S.D. Cal. Mar. 2, 2016) (granting the accused infringer's motion to compel a more complete answer and rejecting the patentee's reliance on Rule 33(d) because the patentee was in a better position than the accused infringer to know how its products worked and what they were made up of). Accordingly, the Court grants Apple's motion and requires Wi-LAN to provide a supplemental response setting forth the legal and factual basis for its contention that the identified products practice the Asserted Patent claims. Wi-LAN argues that it should not have to provide its response in element-by-element claim charts because it has not created such charts and to do so would be unduly burdensome. ECF No. 262 at 1 (citing Sonix Tech. Co. Ltd. V. Yoshida, No. 12 CV 380, 2014 WL 1187354, at *3 (S.D. Ca. Dec. 5, 2014)). The Court agrees with Wi-LAN that its response does not have to be in the chart format requested by Apple but, as set forth above, Wi-LAN must supplement its answer to Interrogatory No. 14.

The Court also disagrees with Wi-LAN's argument that it does not have to supplement its response to Interrogatory No. 14 because the response is consistent with Patent Local Rule 3.1(g). Wi-LAN argues broadly, without citing relevant legal authority¹, that Rule 3.1(g) "only requires Wi-LAN to identify for each asserted claim the allegedly practicing products and is intended to replace interrogatories such as No. 14 – this rule does not require a detailed

¹ Wi-LAN's relies on <u>Presidio Components, Inc. v. Am. Tech. Ceramics Corp.</u>, No. 14CV2016-1, 2015 WL 12843185, at *1 (S.D. Cal. Aug. 26, 2015), only for the dicta about the purpose of the local patent rules.

explanation of how the products meet each claim element." ECF No. 262, at 2. Wi-LAN fails to cite any authority to support its interpretation that compliance with Patent Local Rule 3.1(g) prohibits the contention interrogatory propounded by Apple, and fails to address the contrary authority cited by Apple. A district court in the Northern District of California rejected this precise argument. See PersonalWeb Techs., LLC v. Google Inc., No. 13-cv-01317-EJD (HRL), 2014 WL 4088201, at *5 (N.D. Cal. Aug. 19, 2014). In doing so, the court reasoned:

[T]he text of Patent L.R. 3-1 is not as limiting as PersonalWeb suggests. Rule 3-1(g) provides that a party claiming patent infringement must produce a claim chart if the party wishes 'to rely, *for any purpose*, on the assertion that its own. . . instrumentality practices the claimed invention.' Moreover, the fact that discovery is not explicitly required by the local rules does not mean that a party is excused from responding to a discovery request.

<u>Id.</u> (emphasis in original). The Court agrees with the <u>PersonalWeb Techs.</u> court and finds that Rule 3.1(g) does not prohibit additional discovery such as Interrogatory No. 14.

Finally, Wi-LAN's argument that its response is consistent with the Court's prior rulings with regard to Apple's responses to Wi-LAN's contention interrogatories is unpersuasive. As Apple points out in its letter brief [ECF No. 263 at 3], Apple provided more information to Wi-LAN in response to Interrogatory No. 3 including specific reasons why certain claim limitations in the Asserted Patents were not met. See ECF No. 138-1, at 16-19. The Court has reviewed Wi-LAN's response and supplemental response to Interrogatory No. 14 and finds they are not as detailed as Apple's response and, as set forth above, are insufficient.

Accordingly, the Court **GRANTS** Apple's Motion to Compel a supplemental response to Interrogatory No. 14. Wi-LAN is **ORDERED** to provide "the legal and factual basis for Wi-LAN's contention that the prototype or product practiced or would have practiced one or more claims of the Asserted Patents" and "identifying the structures or functionalities in each prototype or product that purportedly meet each limitation of each such asserted claim" on or before **February 16, 2018**.²

² The Court notes that Apple did not challenge the adequacy of Wi-LAN's identification of the prototypes/products or specific patent claims.

Explore Litigation Insights

Docket Alarm provides insights to develop a more informed litigation strategy and the peace of mind of knowing you're on top of things.

Real-Time Litigation Alerts

Keep your litigation team up-to-date with **real-time** alerts and advanced team management tools built for the enterprise, all while greatly reducing PACER spend.

Our comprehensive service means we can handle Federal, State, and Administrative courts across the country.

Advanced Docket Research

With over 230 million records, Docket Alarm's cloud-native docket research platform finds what other services can't. Coverage includes Federal, State, plus PTAB, TTAB, ITC and NLRB decisions, all in one place.

Identify arguments that have been successful in the past with full text, pinpoint searching. Link to case law cited within any court document via Fastcase.

Analytics At Your Fingertips

Learn what happened the last time a particular judge, opposing counsel or company faced cases similar to yours.

Advanced out-of-the-box PTAB and TTAB analytics are always at your fingertips.

API

Docket Alarm offers a powerful API (application programming interface) to developers that want to integrate case filings into their apps.

LAW FIRMS

Build custom dashboards for your attorneys and clients with live data direct from the court.

Automate many repetitive legal tasks like conflict checks, document management, and marketing.

FINANCIAL INSTITUTIONS

Litigation and bankruptcy checks for companies and debtors.

E-DISCOVERY AND LEGAL VENDORS

Sync your system to PACER to automate legal marketing.
