17	D. D. D. D. D. D. D. D. D. L.	16 Levin.
	-and-	17 THE COURT: Good morning, gentlemen.
18		18 Mr. Blumenfeld?
19	WINSTON & STRAWN LLP BY: MICHAEL A. TOMASULO, ESQ.	19 MR. BLUMENFELD: Good morning, Your Honor. Jack
20	(Los Angeles, California)	3,
21	-and-	20 Blumenfeld from Morris Nichols for the defendants along with
1	-anu-	21 Tom Dunham and Mike Tomasulo from Winston & Strawn, and
22		22 Linda Zabriskie from Take-Two is a few rows back.

1 MR. HANNAH: Your Honor, we have some channel within a network. 2 2 housekeeping issues that we can kind of take care of, THE COURT: Yes. 3 take some terms off the table based on the recent 3 MR. HANNAH: We would agree that defendant's 4 4 submission. proposed construction, which is a computer-readable medium 5 THE COURT: All right. Tell me about this happy 5 containing instructions that control communications of a 6 6 news. participant of a broadcast channel within a network that 7 7 does not use routing tables, we would agree with that MR. HANNAH: It's indeed happy, Your Honor. 8 8 So, again, we reiterated our position that, you construction for claim, for term 24, which is claim 19 of 9 9 know, these terms and all of the terms in the subsequent the '634 patent. 10 10 briefing, the plain and ordinary meaning should apply and THE COURT: I'm sorry. Did the defendant's 11 that would resolve the parties' dispute. However, to the 11 proposal change somewhere in the middle of the briefing? 12 12 extent the Court wishes to construe these terms, we've MR. HANNAH: Your Honor asked for supplemental 13 agreed to the construction of term -- for term 10. 13 briefing, I mean supplemental positions from the defendants, 14 14 THE COURT: Ten, yes. and to the extent that the term is not found. 15 15 MR. HANNAH: 13 of the '344 patent and claim 13 THE COURT: Okay. 16 16 MR. HANNAH: And that was a submission on of the '966 patent. 17 17 And --Friday. We haven't had a chance to respond to that and so 18 THE COURT: Wait a second. These are not terms 18 we analyzed it over the weekend. 19 19 THE COURT: All right. Yes. I'm not apparently that are for today. Right? 20 20 MR. HANNAH: Term 10. sure I even saw that. 21 21 THE COURT: Term 10 is, yes. All right. In any event, whatever is in 22 22 MR. HANNAH: Network. So network within the defendant's letter, you agree with that? 23 23 construct of claim 13 of the '344 patent we would agree MR. HANNAH: Yes, which I just stated. 24 24 would be each of the broadcast channels. THE COURT: Yes. 25 25 THE COURT: Wait. Is term 13 on today's list? MR. HANNAH: I mean, I say I agree to the 7 9 1 MR. HANNAH: I'm sorry if I misspoke. Term 10, construction. I'm not agreeing to the positions that 2 2 and that only relates to claim 13 of the '344 patent. they're taking. 3 THE COURT: Oh, claim 13. Sorry. I'm getting 3 THE COURT: All right. In any event, 24 is 4 claims and terms mixed up here. Okay. 4 resolved in your view? 5 5 MR. HANNAH: I apologize Your Honor. MR. HANNAH: Correct. And then term 25. Now 6 THE COURT: All right. Term 10. I got that. I'm messing up claims and terms. Term 25, which is Claim 1 7 Network. of the '069 patent. Again, defendants propose a 8 MR. HANNAH: Yes. So network within claim 13 of 8 construction for the term, a computer-based, non-routing 9 9 the '344 patent and claim 13 of the '966 patent. We would table based, non-switched based method for adding a 10 agree that network, the plain and ordinary meaning is each 10 participant to a network of participants. They proposed a 11 11 of the broadcast channels that comports with Acceleration construction this last Friday, a computer-based method for 12 Based's understanding. 12 adding a participant to a network of participants that does 13 13 And then for term 24, that relates to claim 19 not use routing tables or switches. And we would agree to 14 of the '634 patent. 14 that construction for Claim 1 of the '069 patent. 15 THE COURT: Yes. 15 THE COURT: Okay.

MR. HANNAH: But we met and conferred with the

defendants and they were fine with taking these off the

they preserve their indefiniteness arguments and would

submit that on the briefing unless the Court had any

questions regarding those terms this morning.

THE COURT: All right.

table. However, they did wish me to inform the Court that

MR. HANNAH: We would agree that the preamble,

MR. HANNAH: Term 25. I'm sorry. Let me go to

which is a computer based non-routing table based

non-switched based method for adding a participant to a

THE COURT: All right. That's term 25.

```
1
               THE COURT: All right. Let me just check before
                                                                         have to be at least two computers.
 2
     you go. Mr. Dunham or Mr. Tomasulo, you are in agreement
                                                                     2
                                                                                    I will first address the physical versus process
 3
     with what has been stated?
                                                                     3
                                                                         issue. I think the two computer issues are entirely
 4
                                                                     4
               MR. DUNHAM: We are, Your Honor. This is Tom
                                                                         hypothetical. I don't believe that's relevant to the
 5
     Dunham for defendants. And we agree to the constructions
                                                                     5
                                                                         infringement or validity issues in the case, but it's
 6
                                                                     6
     that we submitted Friday for the three terms will apply, and
                                                                         unnecessary, confusing, and incorrect.
                                                                     7
 7
     then today, if the Court would like, I would be prepared to
                                                                                    THE COURT: All right. Go ahead.
 8
                                                                     8
     address the other issues we raised with respect to those
                                                                                    MR. FRANKEL: The specification makes clear that
 9
     terms, the 112 issues, the Beauregard issues, the printed
                                                                     9
                                                                         the network includes computer processes. It says that the
10
                                                                    10
     matter issues.
                                                                         network is made up of participants. The parties agreed to
11
                                                                    11
               If the Court would like to hear that today, I
                                                                         the construction for participants, that it includes computer
12
     would be happy to. If you'd like to defer to those
                                                                    12
                                                                         processes.
13
     validity-related issues --
                                                                    13
                                                                                    So term 13 was participant, and everyone has
14
                                                                    14
               THE COURT: The only thing I think I might be
                                                                         agreed that a participant is a computer and/or computer
15
                                                                    15
    interested in hearing -- hold on. Let me go back.
                                                                         process that participates in a network. So if we go back to
16
                                                                    16
               Yes. The only out of those three I might be
                                                                         claim 12, which depends from claim 1, the computer network
17
                                                                    17
     interested in hearing about would be for term 24, the
                                                                         is connected participants, and the parties have already
18
     indefiniteness issue. Okav?
                                                                    18
                                                                         agreed that the participants can be computers and/or
19
                                                                    19
                MR. DUNHAM: Absolutely. I will be prepared to
                                                                         computer processes.
20
                                                                    20
     address that then.
                                                                                    If you look at our construction, it's just
21
                                                                    21
               THE COURT: All right. So otherwise
                                                                         taking the definition of participants, which is already
22
                                                                    22
     we have a game plan here.
                                                                         agreed.
23
                                                                    23
                                                                                    THE COURT: Do I take it that claim 1 is not
               So we're starting with computer network. Is
```

24

25

asserted?

11

MR. HANNAH: I'm sorry, Your Honor. Mr. Frankel

1 will be taking that one. 2 THE COURT: All right. Good enough. 3 MR. FRANKEL: Good morning, your Honor. 4 THE COURT: Good morning, Mr. Frankel. 5 MR. FRANKEL: Here we have the parties' proposed 6 constructions -- oh. Your Honor, may I approach to hand up 7 some copies of the presentation? 8 THE COURT: Sure, yes. 9 (Mr. Frankel handed slides to the Court.) 10 THE COURT: Mr. Frankel, can you just hold on a 11 second? Go ahead. 12 MR. FRANKEL: This is another term, Your Honor, 13 that we think does not require construction. Computer 14 network is a term that everyone would understand. 15 There's nothing in the patents or the file 16 history that gives --17 THE COURT: But nevertheless, even though you 18 say that, you have a proposed construction. 19 MR. FRANKEL: As ordered by the Court to provide 20 a construction, we complied with that order, and our 21 construction we think is consistent with the plain and

ordinary meaning, that a computer network is computers or

12 is asserted, so it incorporates the limitations of claim 2 3 THE COURT: Right. Okay. I assumed that, but I 4 just wanted to check. 5 MR. FRANKEL: So we have an agreed upon definition that really should resolve this issue already. 7 But turning to the specification, as we highlighted in our 8 briefing and we pulled some excerpts out on the slides, it 9 repeatedly refers to the network as connecting computer 10 processes. For example, it says, each computer is connected 11 to four other computers, and then parenthetically it says, 12 actually, it's process executing on a computer that's 13 connected to four other processes. 14 If four people are driving around in cars and

MR. FRANKEL: That's correct, your Honor. Claim

13

19 processes inside of the computers that are communicating 20 with each other, as is made clear in the spec. 21 THE COURT: So what is a -- I mean, I understand

talking on their cellphones, in a sense you could say that

the cars are communicating with each other, but in reality

it's the people in the cars talking on the phones. Here, if

we have four or more computers in a network, it's really the

22 maybe you've stipulated to this and the construction is

24

25

that right, Mr. Hannah?

15

16

17

18
