⚠ WARNING Before playing this game, read the Xbox 360® console, Xbox 360 Kinect® Sensor, and accessory manuals for important safety and health information. www.xbox.com/support.

Important Health Warning: Photosensitive Seizures

A very small percentage of people may experience a seizure when exposed to certain visual images, including flashing lights or patterns that may appear in video games. Even people with no history of seizures or epilepsy may have an undiagnosed condition that can cause "photosensitive epileptic seizures" while watching video games. Symptoms can include light-headedness, altered vision, eye or face twitching, jerking or shaking of arms or legs, disorientation, confusion, momentary loss of awareness, and loss of consciousness or convulsions that can lead to injury from falling down or striking nearby objects. **Immediately stop playing and consult a doctor if you experience any of these symptoms.** Parents, watch for or ask children about these symptoms—children and teenagers are more likely to experience these seizures. The risk may be reduced by being farther from the screen; using a smaller screen; playing in a well-lit room, and not playing when drowsy or fatigued. If you or any relatives have a history of seizures or epilepsy, consult a doctor before playing.

Practice swing	

ON THE COURSE**SWING**

You have complete control over shaping all your shots with the swing system in *Tiger Woods PGA TOUR® 14*. Move to determine your backswing, and then move to follow through and complete your swing. Follow the swing arc to know when to start your follow through. The speed of your movement, your aim, and the length of backswing determines the outcome of your shot. You can also designate swing controls to under Gameplay Settings if that's more comfortable; this automatically sets the Strike Meter to .

At higher difficulty levels, you must execute draws and fades by swinging your club diagonally (, or ,). The results are more sensitive to mishits.

Before you swing, notice the Swing Plane is displayed in the lower left hand corner. This Swing Plane is the path you should follow with the swing stick for your backswing and follow through. If it displays at an angle, then you should swing diagonally. If you are off plane, the club head arc will not align with the swing arc and the controller will vibrate. When you are off plane, you will mishit the ball and result in an undesirable shot.

SWING SPEED

Play close attention to the pace of your swing. Adjust the speed of both the backswing and follow through to perfect the timing of your swing. You can extend your backswing and speed up the forward swing to give an extra power boost. Look to the Swing Feedback Heads Up Display (HUD) in the lower-left corner of the screen after your swing for an analysis of your backswing and follow through.

PRE-SWING STANCE

Adjust your stance to create unique and dynamic shots. Move / to open your stance and add fade right or draw left for right-handed golfers and fade left or draw right for left-handed golfers. Move / to move the ball forward or backward in your stance, which alters the height of the ball's trajectory.

STRIKE METER

Utilize the Strike Meter to dig the ball out of bunkers or to pick the ball cleanly when it's in rough. Fat or thin hits are not favorable and affect the shot power and ball trajectory. You can modify where the clubface strikes the ball with the to gain greater control over the height of your shot or to move your club left/right on the ball. New this year, you also need to adjust left or right on the Strike Meter to account for sidehill lies. Alter your contact to suit the current circumstances. Hit under the ball to pop it up high, or hit near the top of the ball for a low shot.

PUTTING

After you have lined up the putt with , move to draw back the putter and move to follow through. Follow the swing meter along the ground to know when to start your follow through. The speed of your movement, your aim, and the length of backswing determine the outcome of your putt.

For extra help, press to enable the putt preview feature. It displays the path of the ball based on your current setup.

IMPROVED CHIPPING

When your golfer is within chipping range, an arc meter displays along the ground, just as it does when putting.

GAME SCREEN

KINECT®

Tiger Woods PGA TOUR 14 includes Kinect support throughout the entire gameplay experience. To use Kinect controls, choose the Xbox 360 Kinect Sensor option at the control select screen, which appears before you enter an event. When using Kinect, follow the on-screen guides to navigate menus, zoom to a target, address the ball, and swing. You can also use certain voice commands for in-game actions, such as setting up your shot.

NAVIGATE MENUS

Raise and lower your right hand to move through menu options. To select a highlighted option, swipe your right hand. To cancel or return to a previous menu, swipe your left hand.

ZOOM TO TARGET

To zoom in on your target, hold your left hand above your eyes. While zoomed in, hold your right hand in a fist out in front of you to begin the aiming process, and move your fist to address your target. Open your right hand when you are finished positioning your target. Hold your left hand above your eyes again to return to your pre-swing stance.

ADDRESS THE BALL

Face the Xbox 360 Kinect Sensor and put your hands together like you're holding a golf club. You can also crouch to view your lie.

SWING

While facing the Xbox 360 Kinect Sensor, take a normal backswing and follow-through like you're swinging a golf club. While the ball is in the air, hold out your right hand to add spin.

VOICE COMMANDS

Any time you see the microphone icon in the game, speak the words next to it to perform that action.

Explore Litigation Insights

Docket Alarm provides insights to develop a more informed litigation strategy and the peace of mind of knowing you're on top of things.

Real-Time Litigation Alerts

Keep your litigation team up-to-date with **real-time alerts** and advanced team management tools built for the enterprise, all while greatly reducing PACER spend.

Our comprehensive service means we can handle Federal, State, and Administrative courts across the country.

Advanced Docket Research

With over 230 million records, Docket Alarm's cloud-native docket research platform finds what other services can't. Coverage includes Federal, State, plus PTAB, TTAB, ITC and NLRB decisions, all in one place.

Identify arguments that have been successful in the past with full text, pinpoint searching. Link to case law cited within any court document via Fastcase.

Analytics At Your Fingertips

Learn what happened the last time a particular judge, opposing counsel or company faced cases similar to yours.

Advanced out-of-the-box PTAB and TTAB analytics are always at your fingertips.

API

Docket Alarm offers a powerful API (application programming interface) to developers that want to integrate case filings into their apps.

LAW FIRMS

Build custom dashboards for your attorneys and clients with live data direct from the court.

Automate many repetitive legal tasks like conflict checks, document management, and marketing.

FINANCIAL INSTITUTIONS

Litigation and bankruptcy checks for companies and debtors.

E-DISCOVERY AND LEGAL VENDORS

Sync your system to PACER to automate legal marketing.
