STRIKE PACK

For the latest software and updates go to STRIKEPACK.com

DESCRIPTION

PLAY LIKE A PRO

The Strike Pack is a breakthrough patent pending product designed for BOTH the Casual and Tournament Gamer. A dedicated wired USB connection enables lag free performance of the Strike Pack requiring no permanent modification to your controller meaning no warranty is ever voided. By simply snapping into the battery compartment and connecting the included 10FT USB cable to your existing controller go beyond Elite level control. Welcome to the Next Generation in Paddle Technology.

PADDLES

Choose between raised or flat paddles to fit your playing style. Easy to replace with the provided tools, the paddles can be mapped not only to the face buttons, but the shoulder buttons, even the L3 and R3 stick buttons. Mapping control to the paddles removes the need to move off the thumbsticks and triggers to access face buttons. You maintain control and gain precious reaction time... You simply become a better gamer.

On the Fly Button Re-Mapping

On the fly hardware based paddle mapping is key to next generation paddle tech. With no App required you are never taken out of your game to access anything. Assign any button to the paddles, any time, including face, shoulder, even the left and right analog stick buttons.

Fully Mod Your Controller

Custom Game Packs provide literally millions of MOD combinations. Rapid Fire, Burst Fire, Drop Shot, Fast Reload, Quick Scope, Auto Run, even Finishing Move macros in fighters & so much more. With 8 available storage locations, any mod is available at your fingertips at any time. Change Game Packs, Mods & Classes all on the fly. No App required.

XBOX ONE TRIGGER GRIPS

DESCRIPTION

ADJUSTABLE HAIR TRIGGER AND STOP KIT

- **FIRE FASTER** | Adjustable throw mechanism engages the trigger instantly.
- **ELITE CONTROL** | Perfectly engineered to eliminate trigger pull latency.
- **COMFORT** | Rubber finish provides Silky smooth feel without increasing the size of the controller.

The trigger stop handles replace the original Xbox One™ controller handles and have a built in trigger stop mechanism reducing trigger range to the optimal stopping point for most shooters. This enables the gamer to fire much faster and more frequently. The pull length of the trigger is also fully adjustable by the user even while the trigger stop handles are on the controller using the supplied tool. This allows the gamer to adjust the amount of throw necessary before firing in their favorite shooter for the maximum fire rate!!!

TRIGGER GRIP INSTALLATION AND HAIR TRIGGER ADJUSTMENT
