DETAILED ACTION

Specification

The abstract of the disclosure is objected to because the abstract should be generally limited to a single paragraph on a separate sheet within the range of **50 to 150 words**.

Correction is required. See MPEP § 608.01(b).

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims **1-12** are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over **claims 3-6, and 33-43** of U.S. Patent No. **6,602,191**.

Although the conflicting claims are not identical, they are not patentably distinct from each other because it would have been obvious to one of ordinary skill in the art at the time of the invention to implement the method of the patent in the manner set forth in the instant application since the claims of the instant application are merely different renditions of the patented method and computer readable medium.

The Applicant is invited to explain, to make the record clear, reasons that the double patenting rejection does not apply.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-12 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The examiner cannot discern based on the specification the distinction between physiological data and exercise data. In fact, often times the two overlap. For example, heart rate could be "physiological data" and "exercise data". The broadest reasonable limitation of both terms cannot be discerned and as such the terms are indefinite.

The Applicant is invited to explain, to make the record clear, reasons that the rejection under 35 U.S.C. 112, second paragraph does not apply.
