Phillips North America LLC v. Fitbit, Inc., No. 1:19-cv-11586-IT (D. Mass)
First Supplemental Exhibit 36 - Infringement Claim Chart: U.S. Patent No. 8,277,377

a. downloading an application to a web-enabled wireless phone directly from a remote server over the internet;

The method provided by the Accused Product involves downloading an application (the application) to a web-enabled wireless phone directly from a remote server over the internet:

Setting up your Fitbit Alta HR

For the best experience we recommend using the Fitbit app for iOS, Android, or Windows 10. If you don't have a mobile device, you can also use a Bluetooth-enabled Windows 10 PC or Mac. For non-Bluetooth options visit help.fitbit.com.

Your Fitbit account asks for information such as height, weight, and gender to perform various calculations such as stride lengths to estimate distance and basal metabolic rate to estimate calorie burn. Your name and average daily step count are visible to your Fitbit friends by default. You have the option to share your age, height, or weight with Fitbit friends but the information you provide is private by default.

Setting up your tracker on your mobile device

The free Fitbit app is compatible with more than 200 mobile devices that support iOS, Android, and Windows 10 operating systems.

To get started:

1. Make sure the Fitbit app is compatible with your mobile device by checking <http://www.fitbit.com/devices>.
2. Find the Fitbit app in one of these locations, depending on your device:
 - The Apple® App Store® for iOS devices such as an iPhone® or iPad®
 - The Google Play™ Store for Android devices such as the Samsung Galaxy® S6 and Motorola Droid Turbo 2.
 - The Microsoft® Windows Store for Windows 10 mobile devices such as the Lumia™ phone or Surface™ tablet.
3. Install the app. Note that if you don't have an account with the store, an account is required to create one before you can download the app.

First Supplemental Exhibit 36 - Infringement Claim Chart: U.S. Patent No. 8,277,377

b. coupling the a web-enabled wireless phone to a device which provides exercise-related information;

The method provided by the Accused Product involves coupling the web-enabled wire (the Fitbit Alta HR) via “syncing,” which provides exercise-related information:

4. When the app is installed, open it and tap **Join Fitbit** to be guided series of questions that help you create your Fitbit account, or log existing account.
5. Continue following the onscreen instructions to connect, or *pair*, to your mobile device. Pairing makes sure the tracker and mobile communicate with one another (sync data back and forth).

PNA-FB0000299

Syncing your tracker data to your Fitbit account

When you start using your Alta HR you'll need to regularly sync it with your Fitbit dashboard. The dashboard is where you'll track progress, see your exercise history, track your sleep patterns, participate in challenges, and much more. We recommend syncing at least once a day.

The Fitbit apps and Fitbit Connect use Bluetooth Low Energy (BLE) technology to sync with your Fitbit tracker.

Each time you open the Fitbit app it syncs automatically if the paired tracker is nearby. You can also use the Sync Now option in the app at any time.

Fitbit Connect on your Mac syncs every 15 minutes if the tracker is within 30 feet of the computer. To force a sync, click the Fitbit Connect icon located near the date and time on your computer and choose Sync Now.

Phillips North America LLC v. Fitbit, Inc., No. 1:19-cv-11586-IT (D. Mass)
First Supplemental Exhibit 36 - Infringement Claim Chart: U.S. Patent No. 8,277,377

	<p>WHAT IS SYNCING?</p> <p>Syncing is the process that transfers the data your device collects to your Fitbit dashboard where you can track your progress, see how you slept, set goals, log food and water, and much more. Fitbit trackers, watches, and Fitbit Aria Air use Bluetooth Low Energy (BLE) to sync with phones, tablets, and certain computers. Fitbit Aria and Fitbit Aria 2 use Wi-Fi to sync with your router. The instructions in How do I set up my Fitbit device? explain how to make your device sync to your Fitbit dashboard.</p> <p>PNA-FB0000048</p>

Explore Litigation Insights

Docket Alarm provides insights to develop a more informed litigation strategy and the peace of mind of knowing you're on top of things.

Real-Time Litigation Alerts

Keep your litigation team up-to-date with **real-time alerts** and advanced team management tools built for the enterprise, all while greatly reducing PACER spend.

Our comprehensive service means we can handle Federal, State, and Administrative courts across the country.

Advanced Docket Research

With over 230 million records, Docket Alarm's cloud-native docket research platform finds what other services can't. Coverage includes Federal, State, plus PTAB, TTAB, ITC and NLRB decisions, all in one place.

Identify arguments that have been successful in the past with full text, pinpoint searching. Link to case law cited within any court document via Fastcase.

Analytics At Your Fingertips

Learn what happened the last time a particular judge, opposing counsel or company faced cases similar to yours.

Advanced out-of-the-box PTAB and TTAB analytics are always at your fingertips.

API

Docket Alarm offers a powerful API (application programming interface) to developers that want to integrate case filings into their apps.

LAW FIRMS

Build custom dashboards for your attorneys and clients with live data direct from the court.

Automate many repetitive legal tasks like conflict checks, document management, and marketing.

FINANCIAL INSTITUTIONS

Litigation and bankruptcy checks for companies and debtors.

E-DISCOVERY AND LEGAL VENDORS

Sync your system to PACER to automate legal marketing.
