**Re: Neo Wireless Patent Portfolio
Our File No. FMCL0301SEP**

Dear Mr. Marino:

I am writing in response to your November 29, 2021 letter regarding Neo Wireless' patent portfolio. You assert that the portfolio covers specific technology areas associated with the LTE, LTE-5G and 5G cellular standards. As you may know, Ford Motor Company purchases communication modules from its Tier 1 suppliers, who in turn purchase standard-compliant baseband modem chipsets from Qualcomm located at 5775 Morehouse Drive in San Diego, CA 92121.

Ford respects the valid intellectual property rights of others. But Ford, as the automotive OEM, neither designs nor manufactures the standard-compliant modem technology addressed in your letter. Ford is thus not in a position to determine the technical relevance or value of Neo Wireless' patent portfolio. I encourage you to direct your licensing offer to Qualcomm, the entity who designed and manufactures the cellular modems included as supplied components on Ford vehicles.

If you have any questions, please do not hesitate to contact me.

Very truly yours,

BROOKS KUSHMAN P.C.
