#### I. The Court Should Exclude Use of Unelected Art.

#### A. Defendants Confirm Koo and 802.16e Are Used to Modify 802.16a.

Defendants do not dispute that 802.16a discloses a *fixed* wireless system with *stationary* subscriber units, as described by their experts. ECF No. 269 at 4. Defendants do not dispute that Koo and 802.16e are <u>not prior art</u>. *Id*. at 6–7. Defendants' response confirms that Defendants and their experts employ Koo and 802.16e to modify the *fixed* system of 802.16a into a *mobile* system for their invalidity theories. *Id*. at 3–5. This is not simply "background" information, but rather an explicit combination to modify the *fixed*-system teachings of 802.16a. *See* ECF No. 251, PageID.15081–82. As such, these modifications are improper obviousness combinations because they use unelected and non-prior-art references.<sup>1</sup>

Furthermore, Defendants' case citations regarding unelected, non-prior-art references are inapposite given that these references are not used for background. ECF No. 269 at 5–7. Defendants do not cite authority that allows an unelected, non-prior-art reference to modify a reference against its own teachings.

#### B. Koo and 802.16e Are Not Used to Provide the State of the Art.

Even if Defendants' unelected references could be used for background or state of the art, an earnest reading of Koo shows that the state of the art for 802.16a

1

<sup>&</sup>lt;sup>1</sup> Defendants even call 802.16a a "primary reference" relative to Koo and 802.16e. ECF No. 269 at 4. Defendants also provide no substantive explanation for why Dr. Bims's report structure includes Koo and 802.16e in the invalidity section, and not a background section. *Id.* at 7; *see also* ECF No. 251, PageID.15081–82.

# Explore Litigation Insights

Docket Alarm provides insights to develop a more informed litigation strategy and the peace of mind of knowing you're on top of things.

# **Real-Time Litigation Alerts**

Keep your litigation team up-to-date with **real-time alerts** and advanced team management tools built for the enterprise, all while greatly reducing PACER spend.

Our comprehensive service means we can handle Federal, State, and Administrative courts across the country.

## **Advanced Docket Research**

With over 230 million records, Docket Alarm's cloud-native docket research platform finds what other services can't. Coverage includes Federal, State, plus PTAB, TTAB, ITC and NLRB decisions, all in one place.

Identify arguments that have been successful in the past with full text, pinpoint searching. Link to case law cited within any court document via Fastcase.

# **Analytics At Your Fingertips**

Learn what happened the last time a particular judge, opposing counsel or company faced cases similar to yours.

Advanced out-of-the-box PTAB and TTAB analytics are always at your fingertips.

#### API

Docket Alarm offers a powerful API (application programming interface) to developers that want to integrate case filings into their apps.

#### LAW FIRMS

Build custom dashboards for your attorneys and clients with live data direct from the court.

Automate many repetitive legal tasks like conflict checks, document management, and marketing.

#### FINANCIAL INSTITUTIONS

Litigation and bankruptcy checks for companies and debtors.

#### E-DISCOVERY AND LEGAL VENDORS

Sync your system to PACER to automate legal marketing.
