## Case 2:22-md-03034-TGB\_ECF No. 28-10\_PageID\_279\_Filed 07/20/22 Page 3 of U.S. Patent No. 10,075,941: Claim 13(a) "13. A mobile station served by a serving base station in an Orthogonal Frequency Division Multiplexing (OFDM) 13. A mobile station served by a serving Ford's Accused Products include vehicles equipped with components and/or base station in an Orthogonal Frequency to 4G/LTE networks and services, including services sold and provided by F Division Multiplexing (OFDM) communication system, To the extent the preamble is considered a limitation, Ford's Accused Produ patent. E.g., The LTE specification (Series 36, Release 8) specifies user equipments (UEs information. For clarity, release 8 of the 36 series 3GPP specifications was frozen in Dece used as the basis for the first wave of LTE equipment. The LTE marketplace releases from Release 8 through Release 17. Though for ease of review relea cited below, the same or functionally identical content exists in each corresp LTE uses orthogonal frequency division multiplexing (OFDM) for downlink 4.2 General description of Layer 1 4.2.1 Multiple Access The multiple access scheme for the LTE physical layer is based on Orthogonal Frequency Divi (OFDM) with a cyclic prefix (CP) in the downlink, and on Single-Carrier Frequency Division 1 FDMA) with a cyclic prefix in the uplink. To support transmission in paired and unpaired spec are supported: Frequency Division Duplex (FDD), supporting full duplex and half duplex oper Duplex (TDD). The Layer 1 is defined in a bandwidth agnostic way based on resource blocks, allowing the LT various spectrum allocations. A resource block spans either 12 sub-carriers with a sub-carrier b sub-carriers with a sub-carrier bandwidth of 7.5kHz each over a slot duration of 0.5ms. *See e.g.*, 3GPP TS 36.201 V8.3.0 at pgs. 7-8. LTE downlink transmission use OFDM.

# Case 2:22-md-03034-TGB\_\_ECF\_N0. 28-10, PageID 280 Filed 07/20/22 Page 4 of U.S. Patent No. 10,075,941: Claim 13(a) "13. A mobile station served by a serving base station in an Orthogonal Frequency Division Multiplexing (OFDM) 5.1 Downlink Transmission Scheme 5.1.1 Basic transmission scheme based on OFDM The downlink transmission scheme is based on conventional OFDM using a cyclic prefix. The spacing is df = 15 kHz. 12 consecutive sub-carrier during one slot correspond to one downlink frequency domain, the number of resource blocks, NEB, can range from NEB-min = 6 to NEB-min = 6 to NEB-min = 6 to SEB-min = 6 to SEB-min

### Case 2:22-md-03034-TGB\_ECF No. 28-10\_PageID\_281\_Filed 07/20/22 Page 5 of U.S. Patent No. 10,075,941: Claim 13(a)

"13. A mobile station served by a serving base station in an Orthogonal Frequency Division Multiplexing (OFDM)

# Explore Litigation Insights

Docket Alarm provides insights to develop a more informed litigation strategy and the peace of mind of knowing you're on top of things.

# **Real-Time Litigation Alerts**

Keep your litigation team up-to-date with **real-time alerts** and advanced team management tools built for the enterprise, all while greatly reducing PACER spend.

Our comprehensive service means we can handle Federal, State, and Administrative courts across the country.

# **Advanced Docket Research**

With over 230 million records, Docket Alarm's cloud-native docket research platform finds what other services can't. Coverage includes Federal, State, plus PTAB, TTAB, ITC and NLRB decisions, all in one place.

Identify arguments that have been successful in the past with full text, pinpoint searching. Link to case law cited within any court document via Fastcase.

# **Analytics At Your Fingertips**

Learn what happened the last time a particular judge, opposing counsel or company faced cases similar to yours.

Advanced out-of-the-box PTAB and TTAB analytics are always at your fingertips.

# API

Docket Alarm offers a powerful API (application programming interface) to developers that want to integrate case filings into their apps.

### LAW FIRMS

Build custom dashboards for your attorneys and clients with live data direct from the court.

Automate many repetitive legal tasks like conflict checks, document management, and marketing.

### FINANCIAL INSTITUTIONS

Litigation and bankruptcy checks for companies and debtors.

### E-DISCOVERY AND LEGAL VENDORS

Sync your system to PACER to automate legal marketing.
