

Amended

Exhibit 8

Exhibit 8

Claim 11 of U.S. Patent No. 10,831,111

US Patent No. 10,833,908: Claim 11(a)

"11. A method performed by a mobile station, the method comprising:"

11. A method performed by a mobile station, the method comprising:

Ford's Accused Products include vehicles equipped with components and/or connectivity to 4G/LTE networks and services, including services sold and p

To the extent the preamble is considered a limitation, Ford's Accused Products are not limited by the '908 patent. *E.g.*,

The LTE specification (Series 36, Release 8) supports user equipment (UE) random access (RACH) procedure.

For clarity, release 8 of the 36 series 3GPP specifications was frozen in December 2009 and was used as the basis for the first wave of LTE equipment. The LTE market includes releases from Release 8 through Release 17. Though for ease of review releases 9 through 17 are cited below, the same or functionally identical content exists in each corresponding release.

An LTE communication system provides access to multiple users (user equipment) through cells associated with multiple eNodeBs.

4 Overall architecture

The E-UTRAN consists of eNBs providing the E-UTRA user plane (PDCP/RLC/MAC/PHY) protocol terminations towards the UE. The eNBs are interconnected with each other by means of the X2 interface. eNBs are also connected by means of the S1 interface to the EPC (Evolved Packet Core), more specifically to the MME (Mobility Management Entity) by means of the S1-MME and to the Serving Gateway (S-GW) by means of the S1-U. The S1 interface supports a many-to-many relation between MMEs / Serving Gateways and eNBs.

The E-UTRAN architecture is illustrated in Figure 4 below.

US Patent No. 10,833,908: Claim 11(a)

"11. A method performed by a mobile station, the method comprising:"

Figure 4-1: Overall Architecture

See e.g., 3GPP TS 36.300 V8.12.0 at pg. 15.

US Patent No. 10,833,908: Claim 11(b)

“transmitting, to the base station, an random access signal followed by a guard period in only a portion of the frequency band, wherein the random access signal includes a sequence associated with the base station,”

<p>transmitting, to a base station, a first uplink signal within a frequency band, wherein the first uplink signal is an orthogonal frequency division multiplexing (OFDM) signal and utilizes a frame format comprising a plurality of timeslots, each timeslot comprising a plurality of OFDM symbols;</p>	<p>Ford's Accused Products transmit, to a base station, a first uplink signal with the first uplink signal is an OFDM signal and utilizes a frame format comprising each timeslot comprising a plurality of OFDM symbols. <i>E.g.</i>,</p> <p>A frequency band used for LTE communication has an associated channel bandwidth. Downlink communication is transmitted between the UEs and the eNodeBs.</p>

Explore Litigation Insights

Docket Alarm provides insights to develop a more informed litigation strategy and the peace of mind of knowing you're on top of things.

Real-Time Litigation Alerts

Keep your litigation team up-to-date with **real-time alerts** and advanced team management tools built for the enterprise, all while greatly reducing PACER spend.

Our comprehensive service means we can handle Federal, State, and Administrative courts across the country.

Advanced Docket Research

With over 230 million records, Docket Alarm's cloud-native docket research platform finds what other services can't. Coverage includes Federal, State, plus PTAB, TTAB, ITC and NLRB decisions, all in one place.

Identify arguments that have been successful in the past with full text, pinpoint searching. Link to case law cited within any court document via Fastcase.

Analytics At Your Fingertips

Learn what happened the last time a particular judge, opposing counsel or company faced cases similar to yours.

Advanced out-of-the-box PTAB and TTAB analytics are always at your fingertips.

API

Docket Alarm offers a powerful API (application programming interface) to developers that want to integrate case filings into their apps.

LAW FIRMS

Build custom dashboards for your attorneys and clients with live data direct from the court.

Automate many repetitive legal tasks like conflict checks, document management, and marketing.

FINANCIAL INSTITUTIONS

Litigation and bankruptcy checks for companies and debtors.

E-DISCOVERY AND LEGAL VENDORS

Sync your system to PACER to automate legal marketing.
