Re: Neo Wireless Patent Portfolio

Dear Mr. Tanaka,

I write to you to gauge Nissan's interest in commercial discussions with Neo-Wireless, LLC ("Neo") regarding Neo's portfolio of standard essential patents. Neo's portfolio has been licensed by multiple handset manufacturers, for approximately $65 M USD, which we believe provides significant commercial validation. It also provides very good evidence of Neo's ability to consummate reasonable and mutually acceptable commercial transactions.

Portfolio History and Details

Neo purchased the portfolio from Neocific in Nov. 2019. Drs. Alex Li and Titus Lo founded Neocific to design, develop, and implement a new wireless communication system. The founders had extensive experience in prior wireless communications systems, including participation in the development of the Wi-Max standard, and became aware of serious flaws in the existing systems.

The founders saw an opportunity to create a new wireless communication system that addressed the existing flaws through cutting-edge Orthogonal Frequency-Division Multiple Access (OFDMA) based technologies and filed patents on the work starting in the 2004-2005 timeframe. The portfolio is comprised of fourteen US patent families, sixty-six US patents and seventeen pending applications. In Europe, Neo has two patent families, six issued patents and two pending applications. In Asia, Neo owns four South Korean patents and thirteen Chinese patents. A full patent listing is attached as Appendix A.

Technology

The patents cover the following 3GPP wireless standards:

- LTE (Series 36, Releases 8-14)

- LTE-5G Non-Standalone (Series 36, Release 15)

- 5G (NR) Standalone (Series 38, Release 15+)

| Sounding Reference Signals (SRS) | Vehicle-to-everything (V2X) Sidelink |

Standards Involvement

Though the patents cover certain standard essential features, the founders did not participate in the LTE/NR 3GPP standard setting process.

We look forward to hearing from you regarding Nissan's interest in beginning commercial discussions. If you have any questions, please contact me at bmarino@neo-wireless.com/202.486.4631, or David Loo at dloo@neo-wireless.com/603.674.2754.

Best regards,

Bill Marino

DOCKET ALARM

Explore Litigation Insights

Docket Alarm provides insights to develop a more informed litigation strategy and the peace of mind of knowing you're on top of things.

Real-Time Litigation Alerts

Keep your litigation team up-to-date with **real-time alerts** and advanced team management tools built for the enterprise, all while greatly reducing PACER spend.

Our comprehensive service means we can handle Federal, State, and Administrative courts across the country.

Advanced Docket Research

With over 230 million records, Docket Alarm's cloud-native docket research platform finds what other services can't. Coverage includes Federal, State, plus PTAB, TTAB, ITC and NLRB decisions, all in one place.

Identify arguments that have been successful in the past with full text, pinpoint searching. Link to case law cited within any court document via Fastcase.

Analytics At Your Fingertips

Learn what happened the last time a particular judge, opposing counsel or company faced cases similar to yours.

Advanced out-of-the-box PTAB and TTAB analytics are always at your fingertips.

API

Docket Alarm offers a powerful API (application programming interface) to developers that want to integrate case filings into their apps.

LAW FIRMS
Build custom dashboards for your attorneys and clients with live data direct from the court.

Automate many repetitive legal tasks like conflict checks, document management, and marketing.

FINANCIAL INSTITUTIONS
Litigation and bankruptcy checks for companies and debtors.

E-DISCOVERY AND LEGAL VENDORS
Sync your system to PACER to automate legal marketing.

fastcase®
Smarter legal research.
