

Anticipation: 35 U.S.C. §102 (R3 Documentation)

# APPENDIX C

TO THE EXPERT DECLARATION OF

DR. MICHAEL SIEGEL

In the Transitional Program for Covered Business Methods Proceeding before the

USPTO Patent Trial and Appeal Board Involving U.S. Patent No. 6,553,350

Claim Chart

R/3 2.2 Online Documentation

(“R3 Documentation”)

and

U.S. Patent No. 6,553,350

**Anticipation: 35 U.S.C. §102 (R3 Documentation)**

**26. A computer readable storage media comprising: computer instructions to implement the method of claim 17.**

*The R3 documentation discloses a computer-based pricing system that is part of an overall enterprise information system. As a result, the R3 documentation inherently discloses a software system (computer instructions) operating within the memory of a computer system, which thus satisfies claim 26 because, in my opinion, the memory of a computer system is a computer readable storage media. I note that, between invocations, this system would reside on secondary storage, such as a hard disk, which would also constitute a computer readable storage media.*

*The R3 documentation's description of the enterprise information system is comprehensive, including a detailed description of the pricing component of the system. In addition to pricing, the R3 documentation describes accounting, human resources, business process technology, basis technology and logistics. The logistics description includes sales and distribution, and it is this part of the documentation that describes the pricing functionality. The R3 documentation's description of the pricing functionality is comprehensive, containing very clear disclosure for determining the price of a product offered to a purchasing organization. This very clear, comprehensive description, as shown from the documentation quotes below, demonstrates that the R3 documentation satisfies the enablement requirement. I have opined on this elsewhere in my declaration.*

*The excerpt below shows the many business-related functions described by the R3 documentation:*

Figure 1 R2.2 Online Documentation SAP00014846-57; SAP00000578-89. (The convention I use in this chart is that the first bates number is for the 2.2B CD, and this number corresponds to the screen shot above. The second bates number is for the same teachings in the 2.2A CD) As shown above, the R3 documentation describes the functions performed by an operating enterprise information system. And, as shown below, the R3 documentation provides documentation for “getting started.”

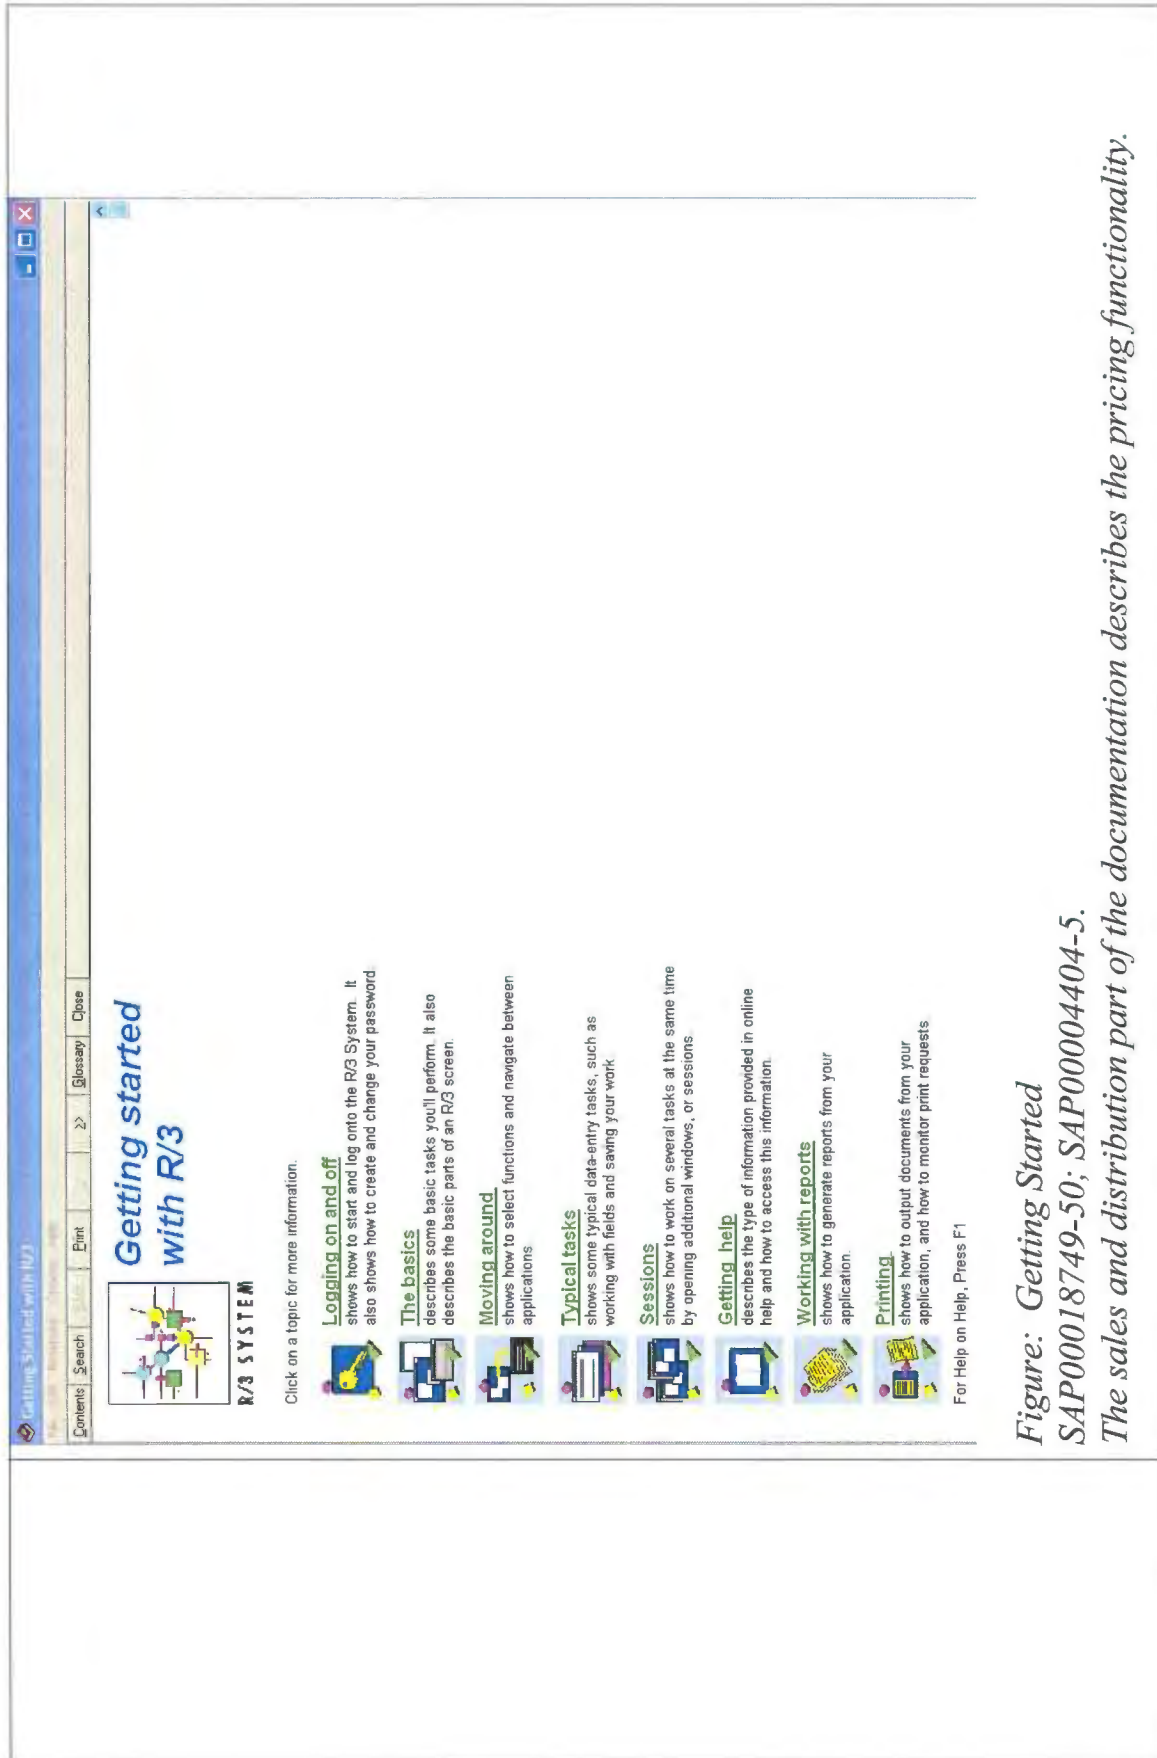

Figure: Getting Started  
SAP00018749-50; SAP00004404-5.  
The sales and distribution part of the documentation describes the pricing functionality.

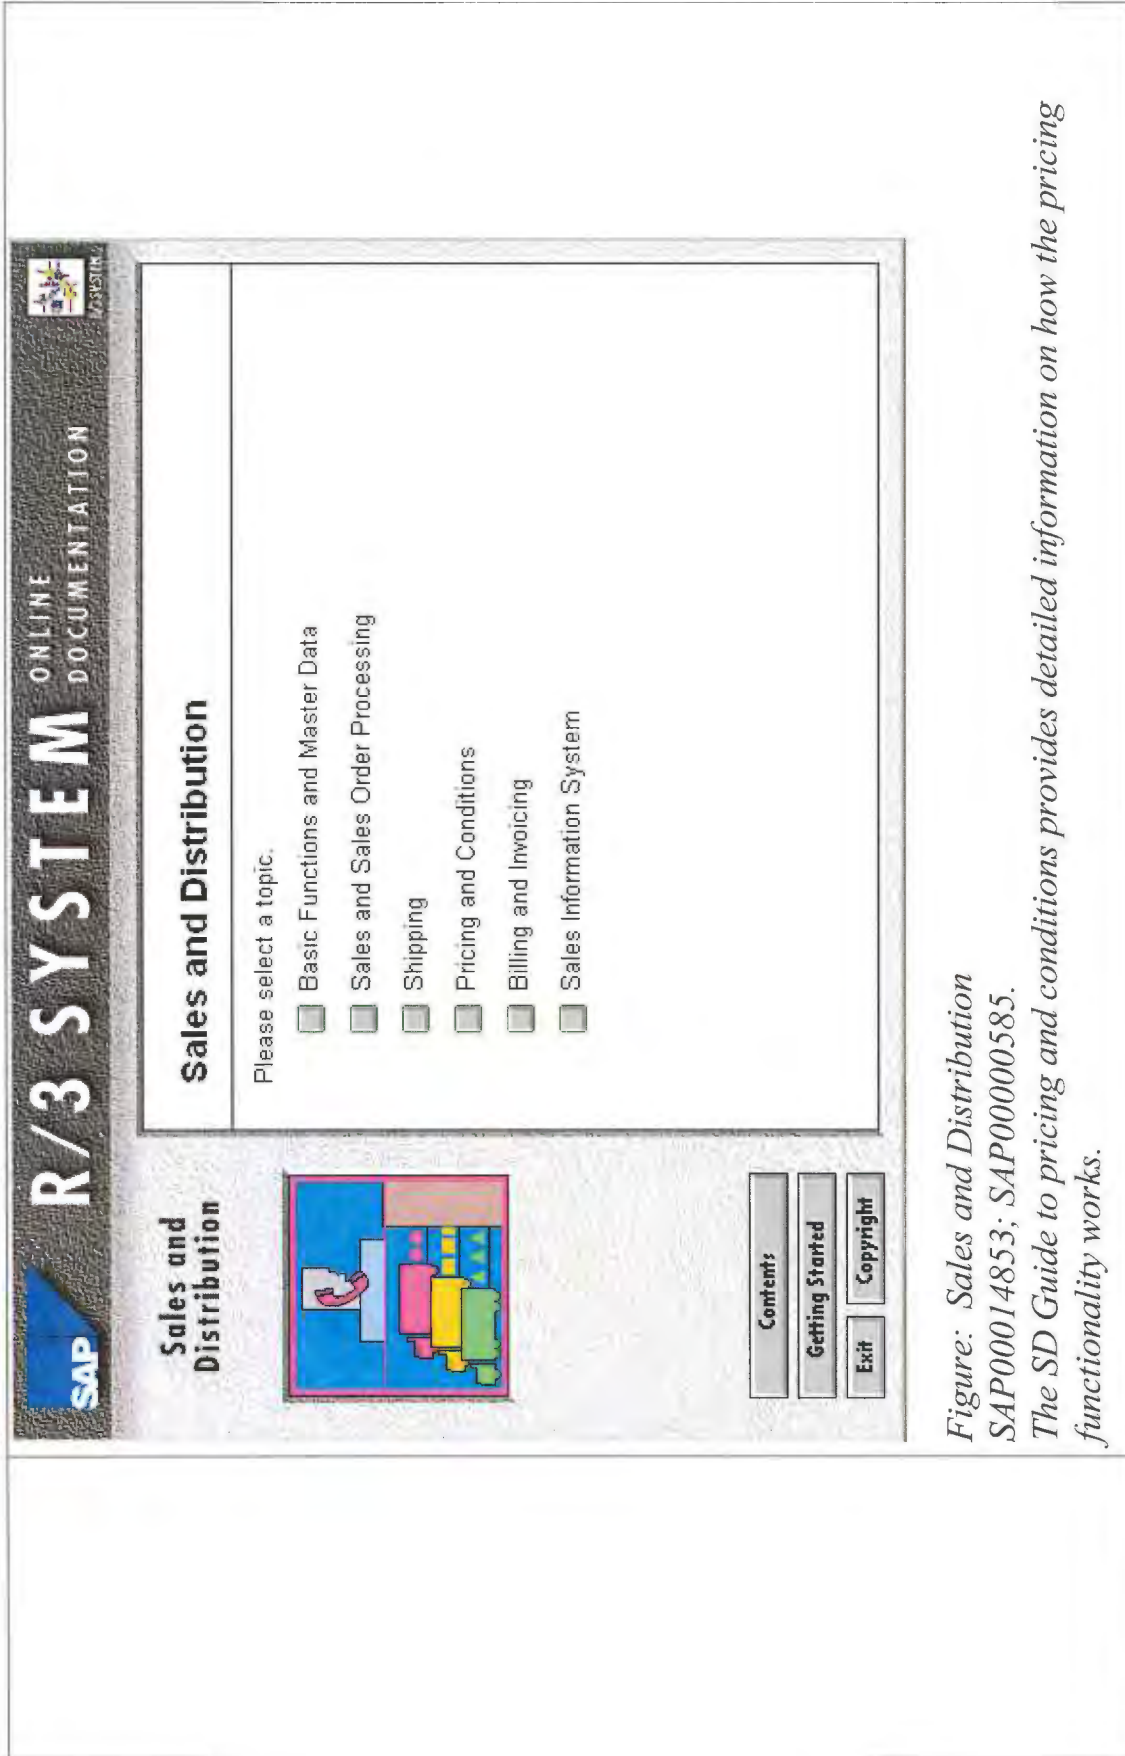

Figure: Sales and Distribution  
SAP00014853; SAP00000585.  
The SD Guide to pricing and conditions provides detailed information on how the pricing functionality works.

# Explore Litigation Insights

Docket Alarm provides insights to develop a more informed litigation strategy and the peace of mind of knowing you're on top of things.

## Real-Time Litigation Alerts

Keep your litigation team up-to-date with **real-time alerts** and advanced team management tools built for the enterprise, all while greatly reducing PACER spend.

Our comprehensive service means we can handle Federal, State, and Administrative courts across the country.

## Advanced Docket Research

With over 230 million records, Docket Alarm's cloud-native docket research platform finds what other services can't. Coverage includes Federal, State, plus PTAB, TTAB, ITC and NLRB decisions, all in one place.

Identify arguments that have been successful in the past with full text, pinpoint searching. Link to case law cited within any court document via Fastcase.

## Analytics At Your Fingertips

Learn what happened the last time a particular judge, opposing counsel or company faced cases similar to yours.

Advanced out-of-the-box PTAB and TTAB analytics are always at your fingertips.

## API

Docket Alarm offers a powerful API (application programming interface) to developers that want to integrate case filings into their apps.

## LAW FIRMS

Build custom dashboards for your attorneys and clients with live data direct from the court.

Automate many repetitive legal tasks like conflict checks, document management, and marketing.

## FINANCIAL INSTITUTIONS

Litigation and bankruptcy checks for companies and debtors.

## E-DISCOVERY AND LEGAL VENDORS

Sync your system to PACER to automate legal marketing.
