Introduction

Overview

This section provides an overview of the options you have for changing objects (such as bills of material and routings) in the SAP R/3 System.   It contains general information on changes with history, which are carried out using the Engineering Change Management System.

Changes in the SAP R/3 System

Changes With History

Using the Engineering Change Management Menu

Changes in the SAP R/3 System

For technical and commercial reasons, it is necessary to change industrial products from time to time.
Technical reasons for changes include, for example, technical faults which have to be put right and the introduction of new environmental or safety regulations.   For commercial reasons, it may be necessary to start using cheaper materials or to change a product to suit customer requirements.

Changes with and without history can be made in the SAP R/3 System.

Changes Without History

Changes which occur during the development phase of a product and which are not to be documented.   The state of the object
(for example, bill of material or routing) before the change is **not** saved.

Changes With History

Changes which may affect further activities within the organization and which are to be documented (for example, change to bill of material -> change to routing -> change to inspection plan).
The state of the object (for example, bill of material or routing) before the change is saved.
Engineering Change Management in the SAP R/3 System offers you a comprehensive solution for documenting changes.

Note

This guide describes how to make changes with history using the R/3 Engineering Change Management System.
For information on how to make changes without history to objects (such as bills of material or routings), please refer to the appropriate application guide.

DOCKET ALARM

Explore Litigation Insights

Docket Alarm provides insights to develop a more informed litigation strategy and the peace of mind of knowing you're on top of things.

Real-Time Litigation Alerts

Keep your litigation team up-to-date with **real-time alerts** and advanced team management tools built for the enterprise, all while greatly reducing PACER spend.

Our comprehensive service means we can handle Federal, State, and Administrative courts across the country.

Advanced Docket Research

With over 230 million records, Docket Alarm's cloud-native docket research platform finds what other services can't. Coverage includes Federal, State, plus PTAB, TTAB, ITC and NLRB decisions, all in one place.

Identify arguments that have been successful in the past with full text, pinpoint searching. Link to case law cited within any court document via Fastcase.

Analytics At Your Fingertips

Learn what happened the last time a particular judge, opposing counsel or company faced cases similar to yours.

Advanced out-of-the-box PTAB and TTAB analytics are always at your fingertips.

API

Docket Alarm offers a powerful API (application programming interface) to developers that want to integrate case filings into their apps.

LAW FIRMS
Build custom dashboards for your attorneys and clients with live data direct from the court.

Automate many repetitive legal tasks like conflict checks, document management, and marketing.

FINANCIAL INSTITUTIONS
Litigation and bankruptcy checks for companies and debtors.

E-DISCOVERY AND LEGAL VENDORS
Sync your system to PACER to automate legal marketing.

fastcase®
Smarter legal research.
