

**Covered Business Method Review
CBM2012-00005**

**U.S. Patent No. 6,675,151
*System and Method for Performing
Substitute Fulfillment Information
Compilation And Notification***

Oral Hearing: August 13, 2013, 10 a.m.

Patent Owner Did Not Invent Automated Substitute Fulfillment

- “Substitute fulfillment is a routine practice in the education system” CX1001, 2:62-63.
- “At present computer systems for support of substitute fulfillment are known in the education field.” CX1001, 3:36-37.

Patent Describes No Advance In Computing

- Specification only discloses a generic communications and process server 30 (CX 1001, 7:3-4), a generic organization computer 54 (CX 1001, 7:47-48), the worker's generic home based computer 20 (CX 1001, 10:33), and the substitute generic home based computer 24 (CX1001, Fig. 10)
- Specification only generally discloses the general concepts of a "website," a "communication link," and a "communication device."

No Special Hardware Or Programming Is Required

- By “specially” programmed, Frontline’s expert admitted he merely meant “specifically or deliberately or consciously.” CX1013 at 8:21-22; *see also* CX1013 at 9:12-16, 14:18-21, and 37:11-21.
- Frontline’s expert conceded that the claims did not require using any particular programming approach and that they were not limited to any particular type of computers. CX1013 at 12:19 – 13:7, 34-17-19.

No Special Hardware Or Programming Is Required

- Frontline's expert conceded that he did not know the details of any special programming and configuration required for the computers to interface with the communication links from the language of the claim CX1013 at 40:3-11.
- Frontline's expert conceded that the claims were not limited to a particular kind of communication link. CX1013 at 41:14-22.
- Frontline's expert conceded that there were different ways in which computers could be programmed to communicate with a communication link. *Id.*

Explore Litigation Insights

Docket Alarm provides insights to develop a more informed litigation strategy and the peace of mind of knowing you're on top of things.

Real-Time Litigation Alerts

Keep your litigation team up-to-date with **real-time alerts** and advanced team management tools built for the enterprise, all while greatly reducing PACER spend.

Our comprehensive service means we can handle Federal, State, and Administrative courts across the country.

Advanced Docket Research

With over 230 million records, Docket Alarm's cloud-native docket research platform finds what other services can't. Coverage includes Federal, State, plus PTAB, TTAB, ITC and NLRB decisions, all in one place.

Identify arguments that have been successful in the past with full text, pinpoint searching. Link to case law cited within any court document via Fastcase.

Analytics At Your Fingertips

Learn what happened the last time a particular judge, opposing counsel or company faced cases similar to yours.

Advanced out-of-the-box PTAB and TTAB analytics are always at your fingertips.

API

Docket Alarm offers a powerful API (application programming interface) to developers that want to integrate case filings into their apps.

LAW FIRMS

Build custom dashboards for your attorneys and clients with live data direct from the court.

Automate many repetitive legal tasks like conflict checks, document management, and marketing.

FINANCIAL INSTITUTIONS

Litigation and bankruptcy checks for companies and debtors.

E-DISCOVERY AND LEGAL VENDORS

Sync your system to PACER to automate legal marketing.
