Professional Investor 5.0 upgraded to **Internet Trader Pro 7.0**! Here is What's New...The World's Best-Selling Investment Software has been completely redesigned and reworked to be the most indispensable tool for Online Traders and Active Investors. Through an even easier-to-use interface, you get …

Streaming Market Data

- **Free access to Basic data means that Market Data streams into your PC throughout the trading day – absolutely Free!**
- **Real Time Data support is now built right into the product. Choose the level and type of data that is right for you, and it automatically streams right into your PC. There is no longer a need to download**
- **Split adjustments are now updated for you automatically.** Even though you may have price history on your hard drive and CD-ROM, the prices are split for you and loaded the next time you access them.

Internet Integration

- SmartBrowse harnesses the vast resources of the Internet for you. With just a click, **you can launch a search for news and content on the symbol you are tracking.** Save time as you cruise through your favorite websites.
- **SmartUpdate(tm) delivers directly to you all future version 7.0 enhancements absolutely free –** plus it works automatically over the Internet! This feature downloads only the files you need to get the latest performance enhancements easier and more quickly.
- **Online Help is now available a click away** in your help menu for the most recent Frequently Asked Questions (FAQs), technical support

Powerful Charting

click here to order
Internet Trader Pro 7

- **Live Intraday Bar Charts tap into streaming market data to give you new insights into market activity by showing you market movements throughout the day!**
- **End-of-Day Charts automatically retrieve updated data instantly to** keep you on top of the market. All you have to do is open a chart … no need to download!
- **Data is stored automatically for you** when you open a chart. This means that opening a chart is equivalent to downloading all that data. It's seamless to you and means the chart displays even faster the next time you access it.

Alert Manager

- **The Alert Manager watches the market for you while you're away! It monitors the activities you select and then alerts you to important events by playing a sound, flashing a message, or even sending you an email or pager message!**
- **Customize alerts for price breakouts, technicals, trading systems …** even selected news stories.
- **Use or create a custom sound for special alerts,** like an .AVI file with your own voice saying "High volume, INTEL" or "S&P crossover alert!"

News Search & Monitoring

- **Filter or search news items based on symbols and keywords to find the stories that matter to you**. News and headlines are "pushed" to your PC automatically though out the day!

Portfolio Manager

- Constantly monitor and compute the value of all your positions … even intraday!
- Track Futures, Equities, Options, and Short Sales!

- **View your news in a new, three-pane viewer to see your search criteria, the headlines, and full-text story all at once!**
- **Use new ActiveQuote™ ToolTips as you read your stories** to get instant quotes on other companies mentioned in your retrieved stories. See what impact a story on Microsoft has had on Netscape, IBM, and Oracle today, from within the story on Microsoft!

- **Manage all your accounts, Cash, Margin, Futures, and Retirement,** across multiple brokerage firms in one place, using one software package.
- **Track both Realized and Unrealized Gains** to help you with your Schedule D at tax time!
- **Track hypothetical portfolios to more easily paper trade your strategies before you commit real money.** Track the recommendations of your broker, a newsletter, or magazine to see how they perform over time.

Live Quote List

- **The Live Quote List shows you the market in a familiar spreadsheet format so that you can watch the markets tick-by-tick and monitoring your watch lists is much easier.**
- **Easily perform Market Rankings** to view the most actives or biggest gainers on the NYSE, AMEX, or NASDAQ **– it's fully customizable!**
- **View your own personal Watch List** or Portfolio and rank or sort them for your criteria (volume, % changed, etc).
- **Call up entire Options Chains for futures or equities!** Just enter the root symbol and up come all the calls, puts, and leaps.

Live Ticker

- **Watch the market tick by on your own completely customizable Ticker! Using our streaming data from the Internet, you can access both price quotes and news headlines!**
- **Bring up the Full Text of a News Story** by merely clicking on the headline in the ticker!

Usability Enhancements

- **Easily setup and manage different screen layouts using Workspaces. It'll remember the content and location of charts, quotes lists, news windows and more.**
- **Toolbars are now movable and sizable –** so you can customize the interface however you see fit!
- **ToolTips pops up a message showing the function of any button for you,** simply by pointing at with the mouse!
- **Now draw and move trend-lines in your charts.**

Marketing Scanning & Filtering

- **Prepare and execute scans on entire market sectors or your custom groups without having to worry if you have updated the data. Charts are automatically "opened", updated, and scanned behind the scenes with the latest market data.**
- **Scanning the market is now the equivalent of automatically downloading it!** If you scan your favorite market sectors, your watch lists, and your portfolio … you have automatically loaded the data onto your hard drive.
