

iTunes looks and sounds better than ever.

iTunes Radio. Hear where your music takes you.

iTunes Radio has streaming radio stations you'll love from day one, from the best selection of songs online. It lets you easily create stations that evolve based on the music you play or download. And you can hear them all on your iPhone, iPad, iPod touch, Mac, PC, and Apple TV. For free.

Create and Customize

With iTunes Radio, you can instantly build a new station by choosing an artist or song. Or choose from one of more than 250 DJ-curated and genre-focused stations. Listening to a song you like from your music library? You can have a station built around it, too. Then you can fine-tune the mix by adding artists and songs, skipping music you don't like, or adjusting the amount of hits or new music you'd like to hear.

Personalized Stations

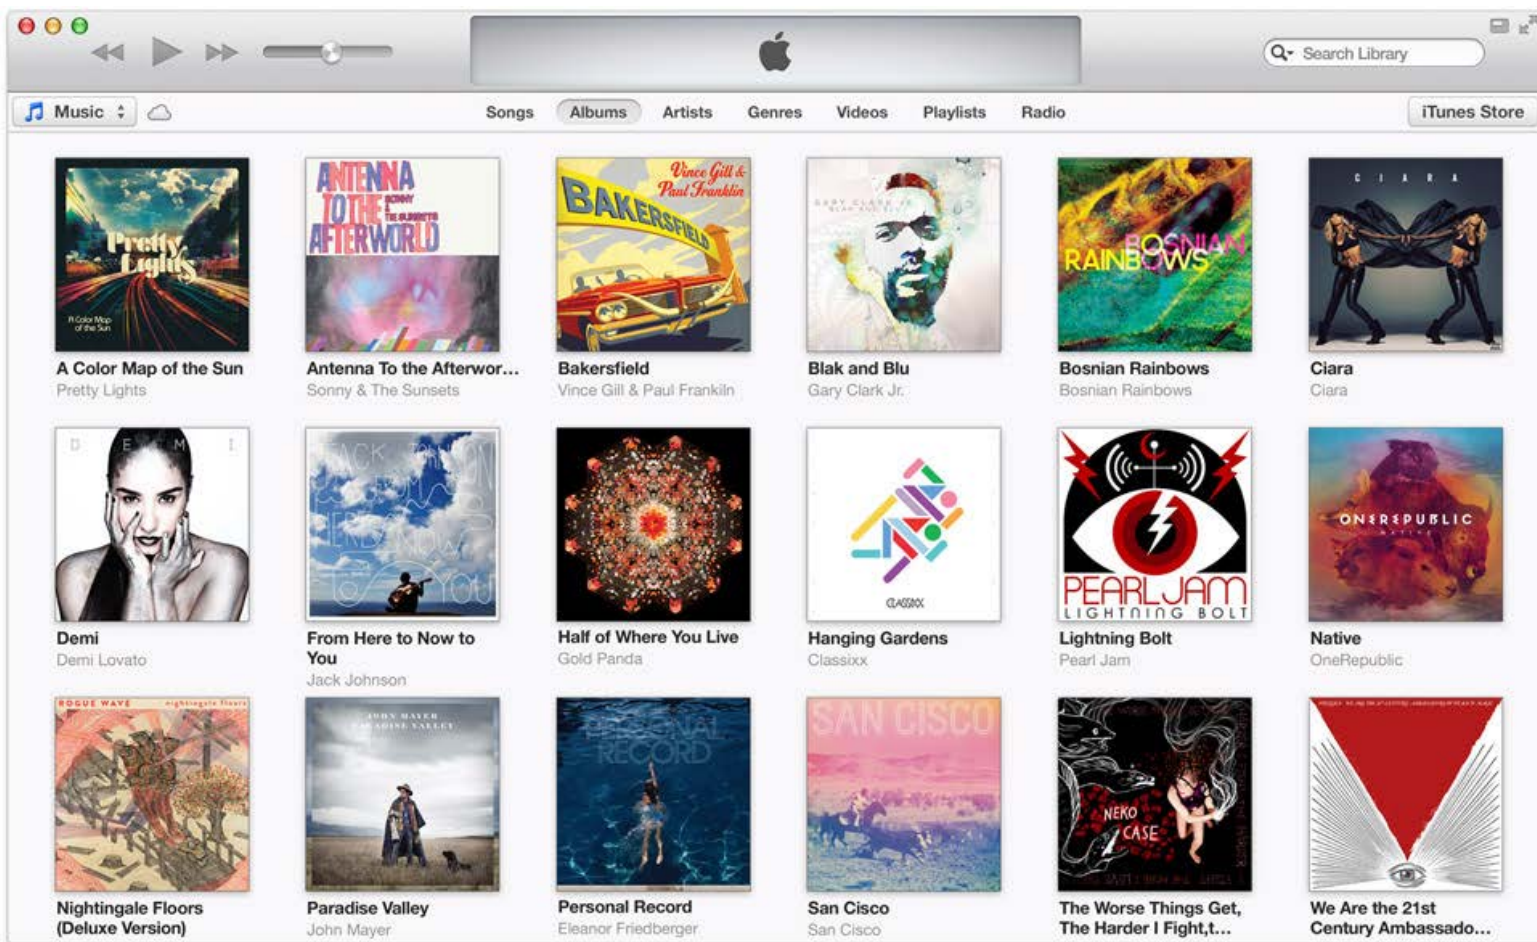

Your stations adapt to the music you play and download. The more you use iTunes Radio and iTunes, the more iTunes Radio knows what you like to listen to — and the more personalized your experience becomes. You can listen to iTunes Radio on your iPhone, iPad, iPod touch, Mac, PC, and Apple TV. All your stations are stored in iCloud,

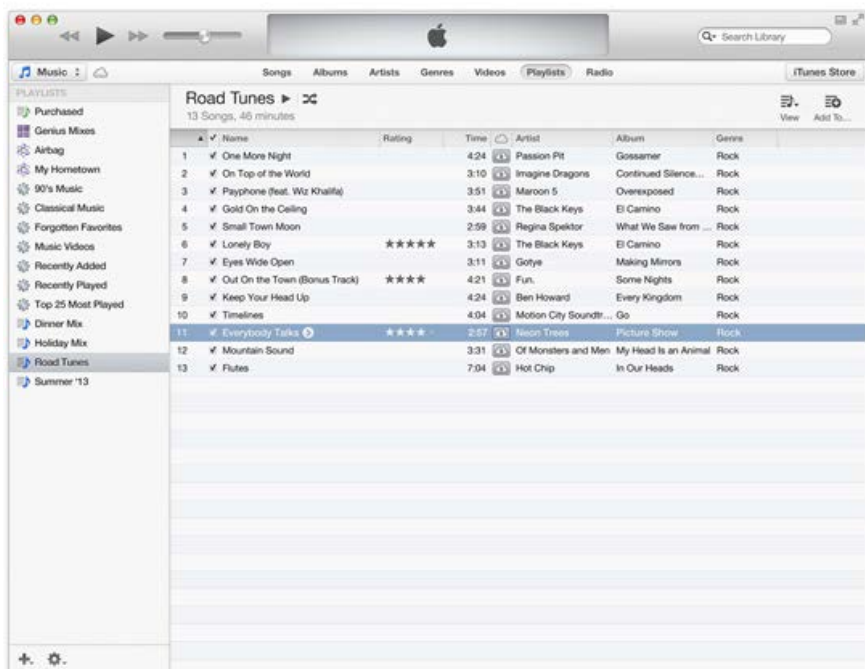

pick it up on another without syncing. And no matter what device you listen on, your stations adjust with every song you play.

iTunes Player. Where all your favorite stuff is just a click away.

The iTunes player keeps all your music, movies, and TV shows all in one place. Instead of going through stacks and stacks of CDs, you can import them into iTunes and quickly browse your whole collection. Organize it any way you want. Move it onto any of your devices. Play it whenever — and wherever — the mood strikes. Even have Genius make mixes of songs that go great together.

Browse by albums to see your collection neatly organized, and your album art beautifully displayed, at a glance.

Organize

With iTunes, it's easy to get all your music organized. Any song or album you purchase from iTunes goes straight into your music library. And when you import your CDs, iTunes automatically adds the album, artist, and song names, along with the album art. Then, with your whole collection to choose from, you can create the ultimate playlists for rocking out, working out, or chilling out. You can also rate your songs with one to five stars, so it's easy to find your favorites later.

Play

Just click to listen to your music, watch a movie or TV show, play an audiobook, or take in a lecture from iTunes U. And now, thanks to Podcast stations, you can organize and play your favorite podcasts while keeping them in sync across all your Apple devices. With iTunes LP, you can dive into lyrics and liner notes, watch videos, and more. And select movies include iTunes Extras like behind-the-scenes footage, cast and crew interviews, and deleted scenes.

Not sure what you want to hear? Let shuffle decide. And when you need to make room on your screen for more than music, switch to the MiniPlayer. It's big enough to let you see the songs that are coming up, search your entire collection, and change the track order using Up Next. And small enough that it's never in the way.

Remote. Tap, swipe, play.

The Remote app turns your iPhone, iPad, or iPod touch into a remote control for your iTunes library or Apple TV.

Genius

Genius can search your library to find songs that go great together, then organize them into genre-based mixes you'll love. It can also put together Genius playlists. Choose a song you like and select Start Genius. And just like that, Genius finds songs with the same vibe and assembles a new playlist for you. If you can't decide what to listen to, click Genius Shuffle to have a song — and more great songs like it — chosen automatically. When you're ready for a change of pace, simply click Genius Shuffle

Explore Litigation Insights

Docket Alarm provides insights to develop a more informed litigation strategy and the peace of mind of knowing you're on top of things.

Real-Time Litigation Alerts

Keep your litigation team up-to-date with **real-time alerts** and advanced team management tools built for the enterprise, all while greatly reducing PACER spend.

Our comprehensive service means we can handle Federal, State, and Administrative courts across the country.

Advanced Docket Research

With over 230 million records, Docket Alarm's cloud-native docket research platform finds what other services can't. Coverage includes Federal, State, plus PTAB, TTAB, ITC and NLRB decisions, all in one place.

Identify arguments that have been successful in the past with full text, pinpoint searching. Link to case law cited within any court document via Fastcase.

Analytics At Your Fingertips

Learn what happened the last time a particular judge, opposing counsel or company faced cases similar to yours.

Advanced out-of-the-box PTAB and TTAB analytics are always at your fingertips.

API

Docket Alarm offers a powerful API (application programming interface) to developers that want to integrate case filings into their apps.

LAW FIRMS

Build custom dashboards for your attorneys and clients with live data direct from the court.

Automate many repetitive legal tasks like conflict checks, document management, and marketing.

FINANCIAL INSTITUTIONS

Litigation and bankruptcy checks for companies and debtors.

E-DISCOVERY AND LEGAL VENDORS

Sync your system to PACER to automate legal marketing.
