

The typical labelled individual information groups $\text{LL}_{n1} \dots \text{LL}_{nz}$ (86), the typical optional links $\text{LD}_{nm1} \dots \text{LD}_{nmr}$ (82), and/or the typical optional descriptions $\text{DD}_{nm1} \dots \text{DD}_{nmr}$ (83), and/or the typical optional prices/values $\text{PD}_{nm1} \dots \text{PD}_{nmr}$ (84),
5 and/or the typical optional images $\text{ID}_{nm1} \dots \text{ID}_{nmr}$ (85), and/or advertisements and/or advertisement links, and/or URL's, and/or locations, and/or other items and/or objects shown in FIGS. 5A, 5B, and 6-10, 11-26, and FIGS. 27-52 and other examples used herein are typical examples for illustrative purposes only and are not intended to limit the scope of the client-server multitasking system 10 of the present invention. A
10 substantially infinite variety of the labelled individual information groups $\text{LL}_{n1} \dots \text{LL}_{nz}$ (86), the optional links $\text{LD}_{nm1} \dots \text{LD}_{nmr}$ (82), and/or the optional descriptions $\text{DD}_{nm1} \dots \text{DD}_{nmr}$ (83), and/or the optional prices/values $\text{PD}_{nm1} \dots \text{PD}_{nmr}$ (84), and/or the optional images $\text{ID}_{nm1} \dots \text{ID}_{nmr}$ (85), and/or advertisements and/or advertisement links, and/or URL's, and/or locations, and/or other items and/or objects
15 may result from the substantially infinite varieties and combinations thereof of the queries $\text{QQ}_{n1} \dots \text{QQ}_{nm}$ (53) and the substantially infinite varieties and combinations thereof of the server addresses $\text{AQ}_{n1} \dots \text{AQ}_{nm}$ (54) of the client-server multitasking system 10 of the present invention, the client-server multitasking process 99, and the multitasking process 104, which in itself is a process.

20

Likewise, the typical grouping/sorting criteria shown herein in the examples is for illustrative purposes only and is not intended to limit the scope of the client-server multitasking system 10 of the present invention. It is possible to sort the responses

within the service and/or information response, such as, for example, by category, query, group, page, order of importance, ascending and/or descending order, alphabetically and/or numerically, or other characteristics, as determined by the requestor, and/or the user, and/or the client-server multitasking system, or to combine 5 the responses within the service and/or information response, such as, for example, interleaving the responses one with the other, such as, for example, by order of relevance or other parameters. The responses then are capable of being grouped by search criteria, server, order of importance, or by numerical factors such as value, price, or other numerical quantifier. For example, the responses may be presentable, for 10 example, in ascending or descending order in interleaved format, such as top ones, twos, threes, and so on, or presentable separately to the requestor and/or the user. The order may be order of importance or relevance related, or, for example, numerically valued, such as price or stock market value. A substantially infinite variety of results may be generated from the substantially infinite variety of grouping/sorting criteria 15 possible with the client-server multitasking system **10** of the present invention.

A substantially infinite variety of URL's, links, locations, sites, servers, and/or clients, other items and/or objects may be used with the client-server multitasking system **10** of the present invention, the client-server multitasking process **99**, and the multitasking 20 process **104**, which in itself is a process. Examples of URL's, links, locations, sites, servers, and/or clients, other items and/or objects shown in FIGS. 5A, 5B, and 6-52 are typical examples of URL's, links, locations, sites, servers, and/or clients, other items and/or objects that may be used therewith the client-server multitasking system **10** of

the present invention, the client-server multitasking process **99**, and the multitasking process **104**, and are used herein for illustrative purposes only, and are not intended to limit the scope of the client-server multitasking system **10** of the present invention, the client-server multitasking process **99**, and/or the multitasking process **104**.

5

A substantially infinite variety of advertisements and/or links may be used with the client-server multitasking system **10** of the present invention. The advertisements and/or links to such sites as Netscape and/or ABC News, Disney Discovery, Warner, ABC, Universal, CBS, NBC, TV Guide, NYtimes, ESPN, WSjournal, CNN, and/or 10 other sites used in the examples shown in FIGS. 5A, 5B, and 6-10, 11-26, and FIGS.

27-52 and other examples used herein are for illustrative purposes only and are not intended to limit the scope of the client-server multitasking system **10** of the present invention.

15 It should also be obvious that advertisements and/or links to such sites as Netscape and/or ABC News, and/or other sites that may be used herein are for illustrative purposes only and are not intended to limit the scope of the client-server multitasking system **10** of the present invention.

20 Although the present invention has been described in considerable detail with reference to certain preferred versions thereof, other versions are possible. Therefore, the spirit and scope of the appended claims should not be limited to the description of the preferred versions contained herein.

CLAIMS

What is claimed is:

- 5 1. A multitasking process comprising:
- a) parsing, processing, and/or formatting a service and/or information request
 thereinto a current request group;
- b) opening connections therewith and making at least one request thereof at
 least one server;
- 10 c) parsing, processing, formatting, grouping, and/or organizing at least one
 response therefrom said at least one server thereinto at least one addressable
 response information group;
- d) formulating information therefrom said current request group thereinto a
 request pointer/address group having at least one pointer/address;
- 15 e) formulating at least one addressable query pointer/address group having at
 least one other pointer/address;
- f) incorporating information and/or services therefrom said at least one
 addressable response information group thereinto at least one addressable
 query information group; and
- 20 g) incorporating said at least one addressable query information group thereinto
 a service and/or information response.

PCT/US2013/042226

2. The multitasking process of claim 1, further comprising parsing, processing, and/or formatting said service and/or information request thereinto at least one other request group.
5. The multitasking process of claim 1, further comprising parsing, processing, and/or formatting said service and/or information request thereinto at least one optional instruction.
10. The multitasking process of claim 1, further comprising directing said pointers/addresses therefrom said request pointer/address group to point/address said addressable query pointer/address groups.
15. The multitasking process of claim 4, further comprising directing said other pointers/addresses therefrom said addressable query pointer/address groups to point/address information and/or services therein said addressable response information groups.
20. The multitasking process of claim 5, further comprising directing said other pointers/addresses therefrom said addressable query pointer/address groups to point/address information and/or services therein said addressable response information groups based upon grouping and/or sorting criteria.

7. The multitasking process of claim 1, wherein said requests of said servers are
the same and/or different one from the other.
8. The multitasking process of claim 1, wherein said servers are the same and/or
different one from the other.
9. The multitasking process of claim 1, wherein said requests are the same and/or
different one from the other of the same and/or different ones of said servers.
10. The multitasking process of claim 1, wherein said requests have the same and/or
different ones of queries.
11. The multitasking process of claim 11, wherein said requests have the same
and/or different ones of queries.
12. The multitasking process of claim 1, wherein said multitasking process is
performed substantially on-the-fly.
13. The multitasking process of claim 1, wherein said connections are opened
substantially simultaneously and said requests are made substantially
simultaneously.

14. The multitasking process of claim 1, wherein further duplicate information
and/or services therein said addressable response information groups is
discarded.

5 15. The multitasking process of claim 1, wherein information and/or services
therefrom said addressable response information groups is incorporated
thereinto at least one individual information group therein at least one said
addressable query information group.

10 16. The multitasking process of claim 15, wherein said individual information
groups are labelled and/or identified.

15 17. The multitasking process of claim 16, wherein said labelled and/or identified
individual information groups are alternately interleaved one with the other
and labelled and/or identified and associated correspondingly therewith said
responses therefrom said servers.

18. A multitasking process comprising:
a) parsing, processing, and/or formatting a service and/or information request
20 thereinto a current request group;
b) opening connections therewith and making at least one request thereof at
least one server;

c) parsing, processing, formatting, grouping, and/or organizing at least one response therefrom said at least one server thereinto at least one addressable response information group;

d) formulating information therefrom said current request group thereinto a

5 request pointer/address group having at least one pointer/address;

e) incorporating information and/or services therefrom said at least one addressable response information group thereinto at least one addressable query information group; and

10 f) incorporating said at least one addressable query information group thereinto a service and/or information response.

19. The multitasking process of claim 18, further comprising directing said pointers/addresses therefrom said request pointer/address group to point/address information and/or services therein said addressable response information

15 groups.

20. A client-server multitasking system comprising:

a) means for parsing, processing, and/or formatting a service and/or information request thereinto a current request group;

20 b) means for opening connections therewith and making at least one request thereof at least one server;

- c) means for parsing, processing, formatting, grouping, and/or organizing at least one response therefrom said at least one server thereinto at least one addressable response information group;
- d) means for formulating information therefrom said current request group
5 thereinto a request pointer/address group having at least one pointer/address;
- e) means for formulating at least one addressable query pointer/address group having at least one other pointer/address;
- f) means for incorporating information and/or services therefrom said at least one addressable response information group thereinto at least one addressable query information group; and
10
- g) means for incorporating said at least one addressable query information group thereinto a service and/or information response.

21. A multitasking process comprising:

- a) means for parsing, processing, and/or formatting a service and/or information request thereinto a current request group;
- b) means for opening connections therewith and making at least one request thereof at least one server;
- c) means for parsing, processing, formatting, grouping, and/or organizing at least one response therefrom said at least one server thereinto at least one addressable response information group;
20
- d) means for formulating information therefrom said current request group thereinto a request pointer/address group having at least one pointer/address;

- e) means for incorporating information and/or services therefrom said at least one addressable response information group thereinto at least one addressable query information group; and
- f) means for incorporating said at least one addressable query information group thereinto a service and/or information response.

5

A
B
C
ADD D

ABSTRACT

A client-server multitasking system and process capable of information and/or service retrieval from the same and/or different ones of servers substantially simultaneously and on-the-fly, using the same and/or different ones of queries of the same and/or different ones of the servers, and sorting, grouping, and/or organizing responses therefrom substantially on-the-fly, and communicating service and/or information responses to the requestors and/or users substantially simultaneously and on-the-fly. The client-server multitasking system and process are capable of use on a variety of networks, such as global area networks, and in particular the internet, metropolitan area networks, wide area networks, and local area networks, and are capable of searching search engines and/or other sites substantially simultaneously and on-the-fly. The client-server multitasking system and process are capable of sorting, grouping, and/or organizing results therefrom the servers, search engines, and/or sites, in accordance with instructions from the requestors, and/or users, and/or instructions resident within the client-server multitasking system and/or process. The client-server multitasking system and process are capable of use in a variety of applications, and capable of information comparison and/or trend analysis of information from the same and/or different sources substantially simultaneously. The client-server multitasking system and process are capable of building a client-server multitasking system search engine and/or database therefrom responses returned from the servers, search engines, and/or sites being queried and/or searched, and/or having requests made thereof, is capable of being searched and/or queried, querying sites referenced therein the client-server multitasking

system search engine and/or database, and updating information and/or services stored therein.

DECLARATION FOR PATENT APPLICATION

As a below named inventor, I hereby declare that my residence, post office address and citizenship are as stated below next to my name; I believe that I am the original, first and sole inventor of the subject matter which is claimed and for which a patent is sought on the invention entitled Client-Server Multitasking, the specification of which is attached hereto and was amended on _____. I hereby state that I have reviewed and understand the contents of the above-identified specification, including the claims, as amended by any amendment(s) referred to above. I acknowledge the duty to disclose information which is material to the examination of this application in accordance with Title 37, Code of Federal Regulations, Sec. 1.56(a). I hereby claim foreign priority benefits under Title 35, United States Code, Sec. 119 of any foreign application(s) for patent or inventor's certificate listed below and have also identified below any foreign application for patent or inventor's certificate having a filing date before that of the application on which priority is claimed.

Prior Foreign Application(s)
(Number) (Country) (Day/Month/Year Filed)

Priority Claimed
(Yes) (No)

None

I hereby claim the benefit under Title 35, United States Code, Sec.120 of any United States application(s) listed below and, insofar as the subject matter of each of the claims of this application is not disclosed in the prior United States application in the manner provided by the first paragraph of Title 35, United States Code Sec.112. I acknowledge the duty to disclose material information as defined in Title 37, Code of Federal Regulations, Sec.1.56(a) which occurred between the filing date of the prior application and the national or PCT international filing date of this application.

(Application Serial No.) (Filing Date) (Status-Patented, Pend, Aban)

None

I hereby declare that all statements made herein of my own knowledge are true and that all statements made on information and belief are believed to be true; and further that these statements were made with the knowledge that willful false statements and the like so made are punishable by fine or imprisonment, or both, under Section 1001 of Title 18 of the United States Code and that such willful false statements may jeopardize the validity of the application or any patent issued thereon.

POWER OF ATTORNEY/AUTHORIZATION OF AGENT: I hereby appoint as my agent, with full powers of substitution and revocation, to prosecute this application and transact all business in the Patent and Trademark Office connected therewith:

HARVEY LUNENFELD

Reg. No. 26,000

Send correspondence to:

HARVEY LUNENFELD

APPLICANT/PATENTEE: Harvey Lunenfeld
SERIAL NO./PATENT NO.: To Be Assigned
FILED OR ISSUED: To Be Assigned
FOR: Client-Server Multitasking

VERIFIED STATEMENT (DECLARATION) CLAIMING SMALL ENTITY STATUS (37 CFR 1.9(f) AND 1.27(b)) INDEPENDENT INVENTOR

As a below named inventor, I hereby declare that I qualify as an independent inventor as defined in 37 CFR 1.9 for purposes of paying reduced fees under Section 41(a) and (b) of Title 35, United States Code, to the Patent and Trademark Office with regard to the invention entitled

Client-Server Multitasking

described in: the specification filed herewith.

I have not assigned, granted, conveyed or licensed and am under no obligation under contract or law to assign, grant, convey or license, any rights in the invention to any person who could not be classified as an independent inventor under 37 CFR 1.9 if that person had made the invention, or to any concern which would not qualify as a small business concern under 37 CFR 1.9(d) or a nonprofit organization under 37 CFR 1.9(e).

Each person, concern or organization to which I have assigned, granted, conveyed, or licensed or am under an obligation under contract or law to assign, grant, convey, or license any rights in the invention is listed below:

FULL NAME:
ADDRESS:
(INDIVIDUAL) (SMALL BUSINESS CONCERN) (NON-PROFIT ORGANIZ.)

NONE

I acknowledge the duty to file, in this application or patent, notification of any change in status resulting in the loss of entitlement to small entity status prior to paying, or at

the time of paying, the earliest of the issue fee or any maintenance fee due after the date on which status as a small entity is no longer appropriate. (37 CFR 1.28(b)).

I hereby declare that all statements made herein on my own knowledge are true and that all statements made on information and belief are believed to be true; and further that these statements were made with the knowledge that willful false statements and the like so made are punishable by fine or imprisonment, or both, under Section 1001 of Title 18 of the United States Code, and that such willful false statements may jeopardize the validity of the application, any patent issuing thereon, or any patent to which this verified statement is directed.

FIG. 31

The screenshot shows the Look4itHere search interface. On the left, there's a sidebar with links to various websites like Discovery, HotWired, TV Guide, Buy/Sellers, CIA Kids, Weather, CitySearch, ESPN, CNN, StockMaster, CNet, and Monster Board. The main area has a search form with fields for Search 1 through Search 7, dropdown menus for search engines (WebCrawler, Altavista, Lycos, Infoseek, Excite, Yahoo!, LookSmart, HotBot, and Delaneys), and checkboxes for 'Search All' and 'URLs Only'. Below the search form, there are sections for 'Search Engine Report' and 'Query: Mouse' with a list of five items. To the right, there's a sidebar with a 'Flowers for your Valentine' ad, a 'netMarket Auction VCR Spectacular' ad with a 'Bids start at \$1 Click Now!', and a news feed from ABC News Headlines.

FIG. 35

The screenshot shows a web-based search interface titled "BuyerSellers". At the top, there is a banner with the text "BuyerSellers" and a small globe icon. Below the banner is a search bar with the placeholder "Search on All... Search your favorite sellers at the same time". To the right of the search bar is a dropdown menu showing "Amazon.com" selected, with other options like "Borders.com", "BooksandNoble.com", "Google.com", "WebCrawler", "Altavista", "Lycos", "Infoseek", and "Yahoo!". Below the search bar are seven input fields labeled "Search 1" through "Search 7", each with a dropdown menu showing the same list of search engines. Underneath these fields is a "Search Engine Report" section with the query "Catcher". The report lists ten items, each preceded by a Roman numeral and a link:

- II) 1) catcher in the rye: salinger**
None Available ...
<http://kildevillhill.com/salingerchat/messages2/2099.html> (webcrawler 1)
- II) 2) Untitled Document**

FIG. 39

The screenshot shows the BuyerSellers search interface. At the top, there's a banner with the text "BuyerSellers". Below it is a search bar with the placeholder "Search 'em All... search your favorite sellers, all at the same time". There are nine search input fields labeled Search 1 through Search 9, each with a dropdown menu showing options like "Amazon.com", "Borders.com", "BarnesAndNoble.com", etc. Below these fields are buttons for "Search", "Search All", and "Search Engine". A "Search Details" section includes dropdowns for "Summary", "Timeout (seconds) per Search Engine", and "Page: 1 Searches per Group: 3 Group: 1 only 1 page required". To the right of the search area is a sidebar with various advertisements:

- A "Flowers for your Valentine" ad for [ta.com](#).
- An "netMarket Auction VCR Spectacular" ad with a "Bids start at" button.
- A "Click Now!" button.
- News headlines: "February 6, 1998 ABC NEWS Headlines" and "U.S. Presence Growing In Iraq".

FIG. 41

FIG. 41

The screenshot shows a web search interface with the title "Look4itHere" at the top. On the left, there is a sidebar with various links categorized under headings like "Discoveries", "Hot Wired", "TV Guide", "Buy/Sell/Trade", "Family", "Weather", "CNN", "StockMaster", "CNet", "Monster Board", and "II) 25) MMS Pacific - Marine Mammals & Seabirds". The main area displays a search results page for the query "large+mammals". The results are listed in a table with columns for "Search Engine", "Title", "Description", and "URL". The search engines used include Excite, Infoseek, Lycos, LookSmart, and HotBot. The results include entries such as "II) 19) The Pleistocene", "II) 20) Animal Info - Rare, Threatened and Endangered Mammals", "II) 21) Polar Bear @Biology - Uofs", "II) 22) MOONLIGHT PRODUCTIONS/LEE TEPLY-WHALES, DOLPHINS, OTHER MARINE MAM...", "II) 23) center for coastal studies - a non-profit organization for research, c...", "II) 24) welcome.htm", "II) 25) MMS Pacific - Marine Mammals & Seabirds", "II) 26) Home Page for The Mastiff", "II) 27) K9netuk - Your window on the UK Dog Scene", and "II) 28) Dolphin Synergy". To the right of the search results, there is a sidebar with advertisements for "Flowers for your Valentine", "Netscape Netcenter", "Market Auction VCR Spectacular", and "February 6, 1998 ABC NEWS Headlines".

FIG. 42

FIG. 42

The screenshot shows a web-based search interface titled "Look4itHere". At the top, there is a banner for "Flowers for your Valentine" and a link to "Netcenter Click Here...". Below the banner, there is a "netMarket Auction VCR Spectacular" advertisement with a "Click Now!" button.

The main interface features a "Search Form All" section where users can enter up to 10 search terms simultaneously across various search engines. The search engines listed are WebCrawler, Altavista, Lycos, Infoseek, Excite, Yahoo!, LookSmart, and HotBot. There are dropdown menus for "Searches per Group" (set to 1) and "Timeout (Seconds) per Search Engine" (set to 9).

Below the search form is a "Search Engine Report" section titled "Query: cat". It lists 10 search results, each preceded by a numbered icon (I) and a title:

FIG. 43

The screenshot shows a web browser window with a search results page titled "Search Engine Report" for the query "cat". The results are numbered 1 through 10. Each result includes a title, a brief description, and a URL. The browser interface includes a toolbar at the top with icons for Back, Forward, Stop, Refresh, Home, and Favorites. Below the toolbar is a menu bar with "File", "Edit", "View", "Search", "Favorites", "Help", and "Look4itHere". The main content area contains the search results and a sidebar with various advertisements.

The screenshot shows a web browser window titled "Look4ItHere". On the left, there's a sidebar with various links such as Discovery, HotWired, TV Guide, eBay, CIA Kids, Family, Weather, CitySearch, ESPN, CNN, CNet, Monster Board, and WAN Sports. The main content area has a title "Search Engine Report" and a query "Query: sports". Below this, there's a numbered list of 10 items, each with a link and a brief description. To the right of the list are several small thumbnail images of news articles or advertisements.

FIG. 62

FIG. 63

Figure 63: Block diagram of the system architecture.

FIG. 64

The diagram illustrates the User Service and/or Information Request iQ_n and Response ir_n process flow. It shows the internal structure of the request and response messages, the flow of data between them, and various optional instructions.

User Service and/or Information Request iQ_n :

- Contains fields: 30, 53, 54, 29, 58, 16, 50, 27.
- Contains sub-blocks:
 - Request Group QA_{n1} : $QQ_{n1}...QQ_{nm}$, $AQ_{n1}...AQ_{nm}$.
 - Request Group QA_{nh} : $QQ_{nh}...QQ_{nz}$, $AQ_{nh}...AQ_{nz}$.
 - Optional Instructions: $VJ_1...VJ_m$.

User Service and/or Information Response ir_n :

- Contains fields: 36, 57, 63, 69, 59.
- Contains sub-blocks:
 - Query Information Group GI_{n1} ...
 - Query Information Group GI_{n2} ...
 - Query Information Group GI_{nh} ...

Data Flow and Addressing:

- The request iQ_n contains pointers to QA_{n1} and QA_{nh} groups.
- The response ir_n contains pointers to GI_{n1} and GI_{nh} groups.
- Intermediate blocks include QP_{nm} , Q_{nm} , S_{nm} , R_{nm} , RC_{nm} , RF_{nm} , and OF_n .
- Addressing groups include Q_{n1} , S_{n1} , R_{n1} , RG_{n1} , Q_{n2} , S_{n2} , R_{n2} , RG_{n2} , Q_{n3} , S_{n3} , R_{n3} , RG_{n3} , ..., Q_{nm} , S_{nm} , R_{nm} , RG_{nm} .
- Request Pointers/Address Groups include $RG_{n1}...RG_{nm}$, RC_{nm} .
- Other components include C_n and G_n .

FIG. 64

FIG. 65

FIG. 66A

FIG. 66B

FIG. 66C

Figure 66C illustrates the structure of the Response Information Group (RG_{nm}). The main group is enclosed in a dashed rectangular boundary. Inside this boundary are five sub-groups, each represented by a rectangle with a dashed border. Each sub-group contains the text "Individual Information Group" followed by a label LG_{nm1} through LG_{nm5} . An arrow labeled "57" points to the left edge of the main dashed box. Two diagonal lines, one labeled "64" and another labeled "81", connect the bottom-left and top-right corners of the main dashed box to a point on the left and right edges of a smaller dashed box labeled "IN_{nm}" respectively. A vertical line labeled "80" connects the top edge of the main dashed box to the top edge of the "IN_{nm}" box.

FIG. 67

FIG. 68

FIG. 69

Fig. 69 shows the structure of a Query Information Group (GI_{nz}) as defined in the UML model.

FIG. 70-2

FIG. 71

FIG. 72

FIG. 73

The diagram illustrates the structure of the Completed Service and/or Information Request Form IF_n . It consists of several nested and associated elements:

- Completed Service and/or Information Request Form IF_n** (230) contains:
 - User Client Request Elements $QM_{n1} \dots QM_{nu}$ Accessible to User U_n** (246) and **Alternate Request Element QL_{na}** (248).
 - Optional Instruction Element VE_{nv}** (203) contains **Instruction Field Name VN_{nv}** and **Instruction Value WV_{nv}** .
 - Server Request Elements** (260) contain:
 - Query Element QE_{nu}** (258) contains **Server Element AE_{nu}** , **Query Field Name QN_{nu}** , and **Query Value QV_{nu}** .
 - Server Field Name AN_{nu}** and **Server Name Value AV_{nu}** .
 - Additional Request Element SL_{rw}** (71) contains **Server Request Element UL_{ns}** .
- Hidden Client Request Elements $HP_{n1} \dots HP_{nh}$ Hidden from User U_n** (252) contain:
 - Optional Information Element HE_n** (254) contains **Information Field Name JN_n** and **Information Value JV_n** .
 - Optional Instruction Element VI_{ni}** (240) contains **Instruction Field Name VN_{ni}** and **Instruction Value WV_{ni}** .
- Optional Server Request Elements** (238) contain:
 - Query Element QH_{nh}** (236) contains **Server Element AH_{nh}** , **Query Field Name QH_{nh}** , and **Query Value QV_{nh}** .
 - Server Field Name AH_{nh}** and **Server Name Value AV_{nh}** .
