available wireless and internet hospitality offerings were extremely limited in functionality, were not synchronized and did not provide an integrated system-wide solution to the pervasive ordering, reservations, affinity program and information management needs of the hospitality industry. Ameranth uniquely recognized the actual problems that needed to be resolved in order to meet those needs, and thereafter conceived and developed its breakthrough inventions and products to provide systemic and comprehensive solutions directed to optimally meeting these industry needs. Ameranth has expended considerable effort and resources in inventing, developing and marketing its inventions and protecting its rights therein.

- 10. Ameranth's pioneering inventions have been widely adopted and are thus now essential to the modern wireless hospitality enterprise of the 21st Century. Ameranth's solutions have been adopted, licensed and/or deployed by numerous entities across the hospitality industry.
- The adoption of Ameranth's technology by industry leaders and the wide acclaim received by Ameranth for its technological innovations are just some of the many confirmations of the breakthrough aspects of Ameranth's inventions. Ameranth has received twelve different technology awards (three with "end customer" partners) and has been widely recognized as a hospitality wireless/internet technology leader by almost all major national and hospitality print publications, e.g., The Wall Street Journal, New York Times, USA Today and many others. Ameranth was personally nominated by Bill Gates, the Founder of Microsoft, for the prestigious Computerworld Honors Award that Ameranth received in 2001 for its breakthrough synchronized reservations/ticketing system with the Improv Comedy Theatres. In his nomination, Mr. Gates described Ameranth as "one of the leading pioneers of information technology for the betterment of mankind." This prestigious award was based on Ameranth's innovative synchronization of wireless/web/fixed hospitality software technology. Subsequently, the United States Patent and Trademark Office granted Ameranth a number of currently-issued patents, two of which are the basis for this lawsuit. Ameranth has issued press releases announcing these patent grants on business wires, on its web sites and at numerous trade shows since the first of the presently-asserted patents issued in 2002. A number of

companies have licensed patents and technology from Ameranth, recognizing and confirming the value of Ameranth's innovations.
