Trade swap futures and the invoice spread. [Learn more](#)

## Highlights

### Superior speed and reliability

Speed matters. But so does reliability. X\_TRADER delivers both. [Learn more](#)

### Industry-leading features and proprietary technologies

From point-and-click to automation, X\_TRADER has the best tools to view, analyze and execute. [Learn more](#)

### Multiple products, asset classes and markets from a single screen

One X\_TRADER screen can put thousands of contracts across multiple asset classes from dozens of markets at your fingertips. [Learn more](#)

### Server-side engines, synthetic order types, autotrading tools and APIs

X\_TRADER incorporates all of these sophisticated technologies to execute complex trading strategies with speed and precision. [Learn more](#)

## New Features in Version 7.12

### Regulatory control

Set order-entry price limits. Restrict Time-In-Force use.

### Automated trading

Output ADL values to X\_TRADER. Identify working orders by color. Manage parent orders in Floating Order Book.

## Autospreeder®

Create and submit reload orders from Market Window.
