Subject: Interview Summaries and Reasons for Allowance

Hi Richard:

I await to hear from you regarding the Interview Summaries and language for Reasons for Allowance. I think the deal you proposed during the Interviews was prompt Interview Summaries in exchange for our submissions of Amendments. Please let me know where this stands. Thanks.

Ankur

The cases have been submitted for allowance. The interview summary records should have been faxed. I'll have each faxed again. As for the reasons for allowance, as discussed, the contents thereof are not of record until the case has been reviewed. Reasons for allowance are generally not subject to negotiation, but you will be granted an opportunity to respond. Your comments should follow the receipt of the notice of allowance and should be submitted no later than the payment of the issue fee. I do not anticipate any problems but should we disagree, you should not expect any further comment on my part. See 37 CFR 1.104(e).

Richard -

**Subject:** RE: Interview Summaries and Reasons for Allowance

Richard:

I just received the fax of the Interview Summaries. Thank you.

The reason I mentioned Reasons for Allowance was not to negotiate, but rather to follow-up on our discussion Friday regarding the withdrawal of the double patenting rejection and the terminal disclaimer in the 09/589,751 case. I believe we had discussed that you would include language either in the Interview Summary or in the Reasons for Allowance to the effect that the double patenting rejection was withdrawn in view of the agreement reached regarding the claim amendments, and that the Terminal Disclaimer was no longer necessary. This will support our filing of a petition to revoke the Term. Discl. and the PTO granting the same.

Also, please let me know what you find out from your supervisors regarding the Terminal Disclaimer and whether we should go ahead and file the petition to revoke it. We don't want to delay matters by making any unnecessary filings.

Thanks.

Best regards.

22. A method of placing a trade order for a commodity on an electronic exchange, using a graphical user interface and a user input device, said method comprising:

setting a preset parameter for the trade order;

displaying the market depth of a commodity traded in a market, through a dynamic display of a plurality of bids and a plurality of asks in the market for the commodity, including the bid and ask quantities of the commodity, aligned with a static display of prices corresponding thereto; and

setting a plurality of additional parameters for the trade order and sending the trade order to the electronic exchange through a single action of the user input device with a pointer of the user input device positioned over an area in said dynamic displays of bids and asks;

**Subject:** another claim

41. (New) A method for displaying market information relating to [and facilitating trading of] a commodity being traded in an electronic exchange market having an inside market with a highest bid price and a lowest ask price on a graphical user interface, the method comprising:

dynamically displaying a first indicator in one of a plurality of locations in a bid display region in association with price levels along a common static price axis, the first indicator representing quantity associated with at least one order to buy the commodity at the highest bid price currently available in the market;

dynamically displaying a second indicator in one of a plurality of locations in an ask display region in association with the price levels along the common static price axis, the second indicator representing quantity associated with at least one order to sell the commodity at the lowest ask price currently available in the market; ~~and~~

displaying the bid and ask display regions in relation to fixed price levels positioned along the common static price axis such that the first and second indicators can move in the bid and ask display regions relative to the common static price axis when the inside market changes;

displaying an order entry region comprising a plurality of locations for receiving commands to send trade orders, each location corresponding to a price level along the common static price axis; and

setting a plurality of parameters for a trade order relating to the commodity and sending the trade order to the electronic exchange through a single action of a user input device which selects a particular location in the order entry region;-

# Explore Litigation Insights

Docket Alarm provides insights to develop a more informed litigation strategy and the peace of mind of knowing you're on top of things.

## Real-Time Litigation Alerts

Keep your litigation team up-to-date with **real-time alerts** and advanced team management tools built for the enterprise, all while greatly reducing PACER spend.

Our comprehensive service means we can handle Federal, State, and Administrative courts across the country.

## Advanced Docket Research

With over 230 million records, Docket Alarm's cloud-native docket research platform finds what other services can't. Coverage includes Federal, State, plus PTAB, TTAB, ITC and NLRB decisions, all in one place.

Identify arguments that have been successful in the past with full text, pinpoint searching. Link to case law cited within any court document via Fastcase.

## Analytics At Your Fingertips

Learn what happened the last time a particular judge, opposing counsel or company faced cases similar to yours.

Advanced out-of-the-box PTAB and TTAB analytics are always at your fingertips.

## API

Docket Alarm offers a powerful API (application programming interface) to developers that want to integrate case filings into their apps.

## LAW FIRMS

Build custom dashboards for your attorneys and clients with live data direct from the court.

Automate many repetitive legal tasks like conflict checks, document management, and marketing.

## FINANCIAL INSTITUTIONS

Litigation and bankruptcy checks for companies and debtors.

## E-DISCOVERY AND LEGAL VENDORS

Sync your system to PACER to automate legal marketing.
