Please [contact us](#) to learn how to generate income from your intellectual property.

LICENSING

Network-1 is engaged in active licensing discussions with vendors of equipment that utilizes technology covered by the [Remote Power Patent](#). These licenses are being offered on reasonable and non-discriminatory terms to manufacturers of IEEE 802.3af-compliant Power Sourcing Equipment (PSEs) and Powered Devices (PDs).

If you are a vendor of PoE products and desire to investigate licensing the Remote Power Patent technologies, please [contact us](#).
