BEFORE THE PATENT TRIAL AND APPEAL BOARD

AGILYSYS, INC. ET AL.
Petitioner

v.

AMERANTH, INC.
Patent Owner

Case CBM2014-00016
Patent No. 6,871,325 B1

Before JAMESON LEE, MEREDITH C. PETRAVICK, and
STACEY G. WHITE, *Administrative Patent Judges*.

PETRAVICK, *Administrative Patent Judge*.

DECISION
Institution of Covered Business Method Patent Review
37 C.F.R. § 42.208

I. INTRODUCTION

A. *Background*

On October 15, 2013, Agilysys, Inc. and 34 other entities¹, (collectively, “Petitioner”) filed a Petition² requesting a review under the transitional program for covered business method patents of U.S. Patent No. 6,871,325 B1 (Ex. 1032, “the ’325 patent”). Paper 1. Ameranth, Inc. (“Patent Owner”) filed a Preliminary Response (“Prelim. Resp.”) on January 13, 2014. Paper 10. We have jurisdiction under 35 U.S.C. § 324.

The standard for instituting a covered business method patent review is set forth in 35 U.S.C. § 324(a), which provides as follows:

THRESHOLD – The Director may not authorize a post-grant review to be instituted unless the Director determines that the information presented in the petition filed under section 321, if such information is not rebutted, would demonstrate that it is more likely than not that at least 1 of the claims challenged in the petition is unpatentable.

Petitioner challenges the patentability of claims 1-15 of the ’325 patent under 35 U.S.C. § 112, first paragraph; § 112, second paragraph;³ and

¹ Expedia, Inc., Fandango, LLC, Hotel Tonight, Inc., Hotwire, Inc., Hotels.com, L.P., Kayak Software Crop., Live Nation Entertainment, Inc., Micros Systems, Inc., Orbitz, LLC, Opentable, Inc., Papa John’s USA, Inc., Stubhub, Inc., Ticketmaster, LLC., Travelocity.com LP, Wanderspot LLC, Pizza Hut, Inc., Pizza Hut of America, Inc., Domino’s Pizza, Inc., Domino’s Pizza, LLC, Grubhub, Inc., Seamless North America, LLC, Order.in, Inc., Mobo Systems, Inc., Starbucks Corporaton, Eventbrite, Inc., Best Western International, Inc., Hilton Resorts Corp., Hilton Worldwide, Inc., Hilton International Co., Hyatt Corporation, Marriott International, Inc., Starwood Hotels & Resorts Worldwide, Inc., Usablenet, Inc., and Apple, Inc.

² Petitioner filed an Amended Petition on November 8, 2013. Paper 8. We will refer to the Amended Petition (“Pet.”) in our decision.

³ Section 4(c) of the Leahy-Smith America Invents Act, Pub. L. No. 112-29,

§ 101. Taking into account Patent Owner's Preliminary Response, we determine that the Petition demonstrates that it is more likely than not that challenged claims 1-10 are unpatentable, but fails to demonstrate that it is more likely than not that challenged claims 11-15 are unpatentable.

Pursuant to 35 U.S.C. § 324, we institute a covered business method patent review of claims 1-10 of the '325 patent.

B. Related Matters

Petitioner identifies numerous related ongoing district court proceedings in the Petition. Pet. 12-16. In addition, Petitioner has requested covered business method patent review of the following related patents: U.S. Patent No. 6,384,850 (CBM2014-00015); U.S. Patent No. 6,982,733 (CBM2014-00013); and U.S. Patent No. 8,146,077 (CBM2014-00014).

C. The '325 Patent (Ex. 1032)

The '325 patent, titled "Information Management and Synchronous Communications System with Menu Generation," issued on March 22, 2005, based on Application No. 10/015,729, filed on November 1, 2001. There are two aspects to the claimed system: menu generation and synchronous communication. *See, e.g.*, Ex. 1032, 3:21-28.

125 Stat. 284, 329 (2011) ("AIA") re-designated 35 U.S.C. § 112, first paragraph, as 35 U.S.C. § 112 (a) and 35 U.S.C. § 112, second paragraph, as 35 U.S.C. § 112 (b). Because the '325 patent has an effective filing date before September 16, 2012, we refer to the pre-AIA version of 35 U.S.C. § 112.

The first aspect is a “desktop software application that enables the rapid creation and building of a menu.” *Id.* at 3:21-23. Figure 1 of the '325 patent is reproduced below.

Figure 1 depicts a graphical user interface (GUI) that is used to generate a menu. *Id.* at 6:22-25. GUI 1 includes menu tree window 7, modifiers window 8, and sub-modifiers window 9. *Id.* at 6:38-44. Menu tree window 7 displays hierarchical tree structure 2 that shows the relationships between menu categories, such as salads or deserts; menu items, such as caesar salad or green salad; menu modifiers, such as dressing; and menu sub-modifiers, such as ranch or bleu cheese. *Id.* at 6:20-32. A user generates a menu by using the GUI to add or delete menu categories, menu items, modifiers, and sub-modifiers, and link modifiers and sub-modifiers to menu items in hierarchical tree structure 2. *Id.* at 6:47-8:43.

The second aspect is synchronous communication. *See id.* at 2:61-67; 3:6-10; 11:3-8. The system includes a computer workstation, a central

database, multiple handheld devices, a web server, and a web page. *Id.* at 3:64-4:1; 6:24. After the new menu is generated and previewed at the computer workstation, the new menu is downloaded to the wireless handheld devices, web servers, and web pages, so that the menu is synchronized on all of these devices. *See id.* at 3:64-4:1; 6:33-36; 7:26; 8:59-65; 10:13-15. Data entered on hospitality applications (e.g., restaurant ordering, wait-list, or reservation applications (Ex. 1032, 1:26-27, 4:10-13)) on the wireless handheld device, web servers, and web pages is synchronized on all of these devices. *See id.* at 2:64-67; 11:13-36. Further, third parties can integrate fully with the hospitality applications through a synchronous communications control module. *Id.* at 11:25-43.

Claims 1 and 11 of the '325 patent are illustrative of the claims at issue and read as follows:

1. An information management and synchronous communications system for generating and transmitting menus comprising:
 - a. a central processing unit,
 - b. a data storage device connected to said central processing unit,
 - c. an operating system including a graphical user interface,
 - d. a first menu consisting of menu categories, said menu categories consisting of menu items, said first menu stored on said data storage device and displayable in a window of said graphical user interface in a hierarchical tree format,
 - e. a modifier menu stored on said data storage device and displayable in a window of said graphical user interface,

Explore Litigation Insights

Docket Alarm provides insights to develop a more informed litigation strategy and the peace of mind of knowing you're on top of things.

Real-Time Litigation Alerts

Keep your litigation team up-to-date with **real-time alerts** and advanced team management tools built for the enterprise, all while greatly reducing PACER spend.

Our comprehensive service means we can handle Federal, State, and Administrative courts across the country.

Advanced Docket Research

With over 230 million records, Docket Alarm's cloud-native docket research platform finds what other services can't. Coverage includes Federal, State, plus PTAB, TTAB, ITC and NLRB decisions, all in one place.

Identify arguments that have been successful in the past with full text, pinpoint searching. Link to case law cited within any court document via Fastcase.

Analytics At Your Fingertips

Learn what happened the last time a particular judge, opposing counsel or company faced cases similar to yours.

Advanced out-of-the-box PTAB and TTAB analytics are always at your fingertips.

API

Docket Alarm offers a powerful API (application programming interface) to developers that want to integrate case filings into their apps.

LAW FIRMS

Build custom dashboards for your attorneys and clients with live data direct from the court.

Automate many repetitive legal tasks like conflict checks, document management, and marketing.

FINANCIAL INSTITUTIONS

Litigation and bankruptcy checks for companies and debtors.

E-DISCOVERY AND LEGAL VENDORS

Sync your system to PACER to automate legal marketing.
