## FIRST AMENDED COMPLAINT FOR PATENT INFRINGEMENT

Plaintiff Ameranth, Inc., (herein "Ameranth") for its First Amended Complaint against defendant Apple, Inc. (herein "Apple" or "Defendant"), avers as follows:

### **PARTIES**

- Plaintiff Ameranth is a Delaware corporation having a principal place of business at 5820 Oberlin Drive, Suite 202, San Diego, California 92121. Ameranth develops, manufactures and sells, inter alia, hospitality industry, entertainment, restaurant and food technology solutions under trademarks  $21^{st}$ Century service information the Communications<sup>TM</sup>, and 21st Century Restaurant<sup>TM</sup>, among others, comprising the synchronization and integration of hospitality information and hospitality software applications between fixed, wireless and/or internet applications, including but not limited to computer servers, web servers, databases, affinity/social networking systems, desktop computers, laptops, "smart" phones and other wireless handheld computing devices. Ameranth's "Information Management and Synchronous Communications" patent family has been widely recognized as visionary, and the original patent in this family, U.S. Patent No. 6,384,850, was cited as a prior art reference by the USPTO in two Apple iPhone patents issued to named inventors Bas Ording and Steven P. Jobs (thus having put Apple on notice as to this Ameranth patent at least as early as March 31, 2010). Fourteen companies have licensed patents in this Ameranth patent family.
- 2. Defendant Apple is, on information and belief, a California corporation having a principal place of business and headquarters in Cupertino, California. On information and belief, Apple makes, uses, sells and/or offers for sale, computer technology products, including personal computers, mobile communications devices, portable digital music and video players and related hardware, software, components and/or systems within this Judicial District, including Apple's integrated Passbook System ("PBS"), which includes the "pass styles" that Apple has defined as "boarding pass" and "event ticketing" applications within Passbook, and which permits the management, maintenance, downloading, and/or storage of, *inter alia*,

26 27 with iPhone 5 and other iPhone and iPod Touch devices that are running Apple's iOS 6 software, and linked to/with Apple's iCloud, the "Apple Notification Service", and Apple's Safari browser. Apple has already announced and/or implemented Passbook partnerships integrating Passbook-enabled systems with entities that are defendants in other Ameranth patent enforcement actions, including Ticketmaster, StubHub, Starwood Hotels, Fandango, and others, as well as integrating Apple's Siri speech-recognition and voice control/command application ("Siri") with the system of yet another defendant in an Ameranth patent enforcement action, OpenTable. Industry analysts have called Passbook a "game changer." Apple senior vice president Scott Forstall, in demonstrating Passbook with stored tickets and passes including movie tickets, airline boarding passes, and concert tickets, asserted that "Passbook is the best way to collect all of your passes in one place." As Apple describes it, within the Passbook application itself, "Passbook is the simplest way to get all your passes in one place. Passbook puts your boarding passes, movie tickets, retail coupons, loyalty cards, and more all in one place. They'll also be ready on your lock screen at just the right time and place. You can add passes to Passbook through apps, emails, and websites from participating airlines, theatres, stores and more."

### **JURISDICTION AND VENUE**

- 3. This is an action for patent infringement arising under the Patent Laws of the United States, 35 U.S.C. §§ 271, 281-285.
  - 4. This Court has subject matter jurisdiction under 28 U.S.C. §§ 1331 and 1338(a).
- 5. On information and belief, Apple engages in the offer for sale or license and sale or license of computer technology products, including personal computers, mobile communications devices, portable digital music and video players and related hardware, software, components and/or systems, including within this Judicial District, including the PBS and Siri as defined herein.
- 6. This Court has personal jurisdiction over Apple because Apple commits acts of patent infringement in this Judicial District including, *inter alia*, making, using, offering for

sale or license, and/or selling or licensing infringing services, products, software, components and/or systems in this Judicial District.

7. Venue is proper in this Judicial District under 28 U.S.C. §§ 1391(b) and (c) and 1400(b).

## **BACKGROUND**

- 8. Ameranth was established in 1996 to develop and provide its 21<sup>st</sup> Century Communications<sup>TM</sup> innovative information technology solutions for the hospitality industry (inclusive of, e.g., restaurants, hotels, casinos, nightclubs, cruise ships, and other entertainment and sports venues). Ameranth has been widely recognized as a technology leader in the provision of wireless and internet-based systems and services to, *inter alia*, restaurants, hotels, casinos, cruise ships and other entertainment and sports venues. Ameranth's award winning inventions enable, in relevant part, generation and synchronization of menus, including but not limited to restaurant menus, event tickets, and other products across fixed, wireless and/or internet platforms as well as synchronization of hospitality information and hospitality software applications across fixed, wireless and internet platforms, including but not limited to, computer servers, web servers, databases, affinity/social networking systems, desktop computers, laptops, "smart" phones and other wireless handheld computing devices.
- 9. Ameranth began development of the inventions leading to the patents-in-suit and the other patents in this patent family in the late Summer of 1998, at a time when the then-available wireless and internet hospitality offerings were extremely limited in functionality, were not synchronized, and did not provide an integrated system-wide solution to the pervasive ordering, reservations, affinity program and information management needs of the hospitality industry. Ameranth uniquely recognized the actual problems that needed to be resolved in order to meet those needs, and thereafter conceived and developed its breakthrough inventions and products to provide systemic and comprehensive solutions directed to optimally meeting these industry needs. Ameranth has expended considerable effort and resources in inventing, developing and marketing its inventions and protecting its rights therein.

10. Ameranth's pioneering inventions have been widely adopted and are thus now
essential to the modern wireless hospitality enterprise of the 21st Century. Ameranth's
solutions have been adopted, licensed and/or deployed by numerous entities throughout the
nospitality industry.

- The adoption of Ameranth's technology by industry leaders and the wide acclaim received by Ameranth for its technological innovations are just some of the many confirmations of the breakthrough aspects of Ameranth's inventions. Ameranth has received twelve different technology awards (three with "end customer" partners) and has been widely recognized as a hospitality wireless/internet technology leader by almost all major national and hospitality print publications, e.g., The Wall Street Journal, The New York Times, USA Today Ameranth was personally nominated by Bill Gates, the Founder of and many others. Microsoft, for the prestigious Computerworld Honors Award that Ameranth received in 2001 for its breakthrough synchronized reservations/ticketing system with the Improv Comedy Theatres. In his nomination, Mr. Gates described Ameranth as "one of the leading pioneers of information technology for the betterment of mankind." This prestigious award was based on Ameranth's innovative synchronization of wireless/web/fixed hospitality software technology. Subsequently, the United States Patent and Trademark Office granted Ameranth a number of currently-issued patents, four of which are the basis for this lawsuit. Ameranth has issued press releases announcing these patent grants on business wires, on its web sites and at numerous trade shows since the first of the two presently-asserted patents issued in 2002. Numerous companies have licensed patents and technology from Ameranth, recognizing and confirming the value of Ameranth's innovations.
- 12. The Ameranth patents asserted herein, U.S. Patent No. 6,384,850 (the "'850 patent"), U.S. Patent No. 6,871,325 (the "'325 patent"), U.S. Patent No. 6,982,733 (the "'733 patent"), and U.S. Patent No. 8,146,077 (the "'077 patent"), are all patents in Ameranth's "Information Management and Synchronous Communications" patent family.
  - 13. Apple is well aware of this Ameranth patent family. One of the Ameranth patents-

# DOCKET

# Explore Litigation Insights

Docket Alarm provides insights to develop a more informed litigation strategy and the peace of mind of knowing you're on top of things.

# **Real-Time Litigation Alerts**

Keep your litigation team up-to-date with **real-time** alerts and advanced team management tools built for the enterprise, all while greatly reducing PACER spend.

Our comprehensive service means we can handle Federal, State, and Administrative courts across the country.

# **Advanced Docket Research**

With over 230 million records, Docket Alarm's cloud-native docket research platform finds what other services can't. Coverage includes Federal, State, plus PTAB, TTAB, ITC and NLRB decisions, all in one place.

Identify arguments that have been successful in the past with full text, pinpoint searching. Link to case law cited within any court document via Fastcase.

# **Analytics At Your Fingertips**

Learn what happened the last time a particular judge, opposing counsel or company faced cases similar to yours.

Advanced out-of-the-box PTAB and TTAB analytics are always at your fingertips.

### API

Docket Alarm offers a powerful API (application programming interface) to developers that want to integrate case filings into their apps.

#### **LAW FIRMS**

Build custom dashboards for your attorneys and clients with live data direct from the court.

Automate many repetitive legal tasks like conflict checks, document management, and marketing.

#### **FINANCIAL INSTITUTIONS**

Litigation and bankruptcy checks for companies and debtors.

# **E-DISCOVERY AND LEGAL VENDORS**

Sync your system to PACER to automate legal marketing.
